ABSTRACT

INCREASING THE WRITING SKILL BY USING EDUCATION FILM AT THE SECOND GRADE OF SMA MUHAMMADIYAH 1 METRO

By:

RITA RAHMAWATI

The aim of this research was to show that the use of education film can improve the writing skill and learning activities at the eight grade of SMA Muhammadiyah 1 Metro. The problem which have been identified was the students have low skill in writing learning .

This research is categorized to Classroom Action Research (CAR). In order to acuracy in data collecting, the researcher used data collecting technique such as test, observation, and documentation. This research was conducted in 2 cycles and every cycle consists of 2 meetings. The subject of this research is the students of class VIII of SMA Muhammadiyah 1 Metro.

Based on the result and the discussion of this research, it can be said that the use of film education to improve the writing skill is success because the criteria of success was achieved. This research will be called success if there is 80 % or more of students who passed the minimum standard criteria (MMC) 75. The result show that there were 84,29% of students who passed the minimum standard criteria in the post-test 2. Before the action was conducted, there were just 34,28% of students who passed the minimum standard criteria in the pre-test. It means that , the use of education film can improve the writing skiil at the eight grade of SMA Muhammadiyah 1 Metro.

ABSTRAK

PENGUNAAN FILM PENDIDIKAN UNTUK MENINGKATKAN KEMAMPUAN MENULIS SISWA KELAS 8 SMA MUHAMMADIYAH 1 METRO

OLEH:

RITA RAHMWATI

Tujuan dari penelitian ini adalah untuk menunjukkan bahwa penggunaan film pendidikan dapat meningkatkan kemampuan menulis dan aktifitas belajar kelas VIII SMA Muhammadiyah 1 Metro. Masalah yang telah diidentifikasi adalah siswa memiliki kemampuan menulis membaca yang rendah dalam proses pembelajaran.

Penelitian ini dikategorikan sebagai penelitian tindakan kelas agar terdapat ketelitian dalam mengumpulkan data, peneliti menggunakan teknik pengumpulan data yaitu meliputi tes, observasi, dan dokumentasi. Penelitian ini dilakukan dalam 2 siklus dan setiap siklus terdiri dari 2 pertemuan. Subjek penelitian ini adalah siswa kelas VIII SMA Muhammadiyah 1 Metro.

Berdasarkan hasil dan pembahasan penelitian ini , menunjukkan bahwa penggunaan film pendidikan untuk meningkatkan kemampuan menulis adalah sukses karena kriteria keberhasilan tercapai. Penelitian ini dapat dikatakan berhasil jika 80 % atau lebih siswa dapat meraih KKM 75. Hasil penelitian menunjukkan bahwa 84,29% siswa dapat mencapai KKM dalam post-test 2. Sebelum penelitian dilakukan, hanya ada 34,28% siswa yang dapat mencapai KKM pada pre-test. Maka dari itu artinya, penggunaan film pendidikan dapat meningkatkan kemampuan menulis siswa kelas VIII SMA Muhammadiyah 1 Metro

CHAPTER I

INTRODUCTION

A. Background of Study

English is used to communicate with other people from different country and to read some literatures from the other country. There are four basic skill that should be though to the students, there are listening, speaking, reading, and writing. Writing is frequently useful as preparation for some other activity, in particular when students write sentence as a preamble to discussion activity.

Teaching and learning English is not the same as learning any other subjects. According to communicative approach, those skills should not be ignored since they are essential to support the achievement of learning English. So, the four language skills have to be mastered well. But, writing is one of the four skills which is difficult to be mastered. According to Paul, “writing is generally as the most difficult of the four skills”. Therefore, it is not easy for teacher to teach writing to the students.

As a part of language skills, writing plays an important role for the success of language learning. In writing activity, we can write anything to improve our skill such as letter, poem, make a paragraph and the others. Accordingly, the students can open minded their skill in writing skill especially to learn English language.

Writing is one of the important aspect in language learning. By writing, the students can share information and ideas in the written text. Writing skill

can help them to think critically and to clarify their thoughts. They often discover what they really think and feel about people, ideas, issues, and events only in the actual process of writing. Writing skill is one of the important skills that should be mastered by the students, beside speaking, reading and listening.

Based on the result of the pre-survey at the SMA Muhammadiyah 1 Metro, the researcher found the difficulty by the student there, especially in writingskill. The students difficult to use English because they seldom use foreign language. In learning process the teacher give the exercise of the material and explain it. The researcher assumed it is caused the teacher did not give the variation in his teaching process.

To improve the condition, there should be some actions to do in the classroom with creating and implementing suitable media to make the students interested in learning English, in this research, the researcher want to apply the media teaching by using education film while student study in the class they watch the film that can increas their writing by the actors.

Based on the explanation above, the researcher assumes the film aducation can bring variety and flexibility to the language classroom by extending the range of teaching media and resource,helping student to develop all four communicative skills. For example, a whole film or sequence can be used to practise for writing.

The researcher tried to study about improving the students writingskill by using education film. This present research will be held on the eleventh Grader of SMA Muhammadiyah 1 Metro . The researcher got the data of pre-survey on juny 17, 2017 as follows :

Table 1
Student's English Result

| No. | Score | Categories | Frequency | Percentages |
|-------|--------|------------|-----------|-------------|
| 1. | 80-100 | High | 5 | 11,75% |
| 2. | 60-79 | Fair | 10 | 29,4% |
| 3. | 0-59 | Low | 7 | 58,8% |
| Total | | | 22 | 100 % |

Based on data and table above, we can see that there are 10 students have low categories with percentages 58,8% and 7 students have fair categories with percentages 29,4%. And then, only 5 students who have high categories with precentages 11,75%. So, based on the data of pre-surveyat the eleventh Grader of SMA Muhammadiyah 1 Metro, the researcher foundthat the students still face many problems, among the noticeable problems writing slowly.

B. Problem Identification

Based on the research background, the researcher identified some problems of the statements as follows:

1. The students found difficulties to develop their idea into a paragraph.

2. Most of students writing skill still low to write the text.
3. Most of students feel more comfortable to ask anything to their friends than their teacher in class.
4. Most of the students also lack of vocabulary and grammar.
5. Lack of students' motivation in Learning English especially to write the text.

C. Problem Limitation

Based on the problem mentioned above, the researcher limits the problem only to increasing the writingskill by using education film at the second grade of SMA muhammadiyah 1 metro in the Academic year of 2017/2018.

D. Problem Formulation

Based on the problems above, the researcher are formulated as follows:
“Can education film media increase the students writingskill at the second grade of SMA muhammadiyah 1 metro?”

E. Objectives and Benefit of the study

1. Objectives of the Study

The objective of this research is to know whether the education film media increase the students writingskill at the second grade of SMA Muhammadiyah 1 metro

2. Benefit of the study

a. For the student

The students can know how to increase their skill by doing the activity in the class especially their writingskill.

b. For the teacher

The result of this study can be used by the teacher in the program of developing and raising the quality of teaching and learning writing.

c. For the school

The result of the research is expected to improve the quality of English teaching and learning especially in developing writing skill by using education film in studying English in the class.

CHAPTER II

REVIEW OF THE LITERATURE

D. The Concept of Writing Skill

1. The Definition of Writing Skill

Writing is a good way to practice new skills without worrying about a grade.¹ Besides, writing is used for wide variety of purposes it is produced in many different forms.² It means that writing is an important of indirect communication. According to Brown, Writing is sometimes used as a production mode for learning, reinforcing, or testing grammatical concepts.³ The purpose of academic writing is to explain something or to give information about something.⁴

In Addition, Writing encourages students to focus on accurate language use and because they think as they write, it may well provoke language development as they resolve problem which the writing puts into their mind.⁵ Furthermore, Trudy Wallace, et.al. explain that writing is the final product of several separate acts that are hugely challenging to learn simultaneously. Among these separable acts are note-taking, identifying a central idea, outlining, drafting and editing.⁶ Moreover,

⁶ Trudy Wallace, et.al, *Teaching speaking, listening, and writing, Educational Practices Series-14*, (France: Typhon, 2004), p.15.

Jordan explains that writing is a method used by human to conduct intercommunication by means of conventional visible marks or symbols. It is also used to deliver or to communicate nonverbal message, idea, expression, feeling, or thought. Through a piece of writing, human being constructs their communication in various ways.⁷

From the definition above, the writer conclude that writing is an activity of using language in written consisting of a sentence or clause or even only a phrase to express thoughts to the reader in a written form so that it will be easily understood by the reader.

2. The Kinds of Writing Skill

There are four kinds of writing Skill :⁸

- 1) Skill to be able to discribe historical profile, place, time and event.
Here the student should understand a text which will be discribe first.
So they can describe suitable with generic structure descriptive.
- 2) Skill to be able to explain venture profile which deeply about occupation or business. Here, they must to know chronology about work profile. futhermore, the student understand about occuption/business.
- 3) Skill to be ableto report from interview, field observation. students must collect information about something such as someone, thing, place from interview and observation.

⁷ R.R Jordan, *Academic Writing Course*, (England: Longman, 2003), p.41.

⁸Alma Prima Nurlaila. *The Use Of Mind Mapping Technique In Writing Descriptive Text*. Journal Of English And Education 2013, 1(2), 9-15. p. 11.

- 4) Skill to be able to tells about characteristic someone. The students must to know person it self first and then they can tell about characteristic someone.

3. The Characteristics of Good Writing

According Boardman, there are three characteristic of good writing:⁹

- 1) Coherence

A paragraph should consist of coherent sentences that are ordered according to principle. The sentences are made readers understand the paragraph easily. The sentence is put in order so that the reader can understand your idea easily.

- 2) Cohesion

Cohesion is another characteristic of the good paragraph. The supporting sentences connect to each other in their support of the topic sentence. Cohesive device is the method to connect sentence.

- 3) Unity

The final of a well-written paragraph is unity. All the supporting sentences should relate to the topic sentence. Order in text or paragraph is like organization easy, but is smaller in

⁹ Natanael Saragih, et all, "The Effectiveness of Using Recount Text to Improve Writing Skill", *IOSR Journal Of Humanities And Social Science (IOSR-JHSS)*, (www.iosrjournals.org), Vol.XII, 19 February 2014, p.57.

space so it may be simpler to consider order as direction. Thus order chronological steps to express the idea the written form.

4. Writing skill at The Grades of SMA Muhammadiyah 1 Metro

Writing skill an aspect that needs special attention and instruction. Writing in SMA Muhammadiyah 1 Metro, specially at the grades still now base on the pre-survey result. The student has low vocabulary, so the student difficult to express their idea in writing activity. The students has many error in vocabulary. The student is not active and not focuses in the class, so they need interactive activities with other. So the teacher should find out suitable strategy to teaching writing. Finally the researcher use education film education in the writing activities to increase writing skill.

5. The Measurement of Writing

In order to measure the students writing skill, it is verry essential to provide a guidance of writing skill assesment According to Brown, writing skill is able to be measured through the use of following rubics:¹⁰

¹⁰Douglas H Brown, "*Language Assessment Principles*, p.244.

E. The Concept of Film Education

1. The Definition of Education film

Film is a medium art, but it is also uniquely, a very complex technological undertaking.¹² Film covers a broad range, from practical (as a technical invention it is an important scientific tool) through environmental, on through pictorial, dramatic, and narrative to music. Although we know it best as one of the dramatic arts, film is strongly pictorial, which is why films are collected more often in art museums than in libraries; it also has a much stronger narrative element than any of the other dramatic arts, a characteristic recognized by filmmakers ever since D. W. Griffith, who pointed to Charles Dickens as one of his precursors. And because of its clear, organized rhythms as well as its soundtrack it has close connections with music. Finally, in its more abstract incarnations, film is strongly environmental as well: as display technologies mature, architects increasingly integrate film backgrounds into their more tangible structures.¹³The following chapters will add substance to this form by focusing on practice.

The form of inquiry in film studies involves a three fold distinction:

a) Theory

Films are analysable on the basis of their inherent form and structure. However, this structure is not immediately visible in itself. Instead, certain aspects of it become visible from within a

¹² Monaco james, *How To Read A Film*, (new york oxford university : 2000), p.17

¹³ Ibid, p.29

certain theoretical perspective (and other aspects become visible from other theoretical perspectives). Moreover, theoretical perspectives may overlap in incommensurate ways. In general, the aim of theory is to make visible the invisible structure that orders and confers intelligibility upon films. The invisible structure is unknown and cannot, therefore, be discovered by means of inductive procedures such as taxonomies. At the same time, the structure is not unknowable, for it can be represented as a system of theoretical hypotheses, concepts, or propositions, which only have a tentative or speculative status. Theories therefore offer explanatory depth rather than mere empirical generalizations. A particular theory enables the analyst to identify specific aspects of a film's structure, and to look at and listen to the film from the perspective of its own values. There is no value-free perspective from which we can directly 'see' and 'hear' a film; we can only 'look at' and 'listen to' a film with a particular set of values. The aim of theory is to construct different conceptual perspectives on a film, each informed by a specific set of values.

b) Method

Every discipline establishes standards of professional competence - or, negatively, pressure to conform to professional standards. To gain competence in film studies involves, to a significant extent, the mastery of methods, since the methods of

film studies constitute the 'acceptable' (the profession's preferred) ways of carrying out film analysis. The term 'method' is used here simply to refer to procedural knowledge, rather than declarative knowledge.

c) Analysis

After theory and methods, the third and final part of the answer to the question 'How to study film?' involves analysis. One major objective of close textual reading is to address the problem of cinematic signification: of how a film creates meaning. The question could be phrased in the form of a series of paradoxes. Is there not a contradiction between, on the one hand, the perception of a film as a continuous experience, with the action often starting *in medias res* (without a narrator setting the scene or introducing the characters, and the story developing its own momentum, as it follows a more or less linear trajectory right to the end) and, on the other hand, the fact that when we look at the strip of celluloid, or even when we slow it down on the video player, a film is made up of wholly discontinuous, discrete and separate entities (individual scenes, which themselves consist of segments).¹⁴

2. The Use of Film Education in Teaching Writing Skill

The purpose of academic writing is to explain something or to give information about something. A media of learning is an important

¹⁴ Elcaeser Thomas, *Studying Contemporary American Film*, (Newyork :2002),p.4

aspect in teaching learning process. If we want to be successful in teaching and learning English is suggested to use a good media. Choosing a good media is important. The students will enjoy in studying if the media can make them interested in learning, especially for the students of senior high school. One of the media to teach writing is Talking about film education. The use of film education media will be very helpful to increase students' writing skill because film education is one of teaching media that can improve the students' writing skill. In addition, It can improve students' writing skill because the teacher can monitor the students to be active in the class, not only a student that dominates the writing activity in the class.

3. Procedures of Education Film

There are some several procedures of writing skill by using education film:

- a. Pre-writing
 - 1) Greeting the student
 - 2) Introducing the education film
- b. While writing
 - 1) Playing the film and ask the students to watch and listen to the education movie carefully.
 - 2) Let the students follow the education film say
 - 3) Giving a chance to the students to ask difficult words to pronounce and giving the right pronunciation.

- 4) Make a group, for one group consist four students.
- 5) Playing the education film two until three film and let the students make a sentence or paragraph.
- 6) The students by one in group tell the story of education film and another harped on one string.

c. Past-speaking

- 1) Dooming the answer
- 2) Giving the correct answer to the students.
- 3) The use of education film to increase speaking abilities

The learns of english have some problems in studying writing. The students will feel more difficult in learning english when the media that are used by the teacher are inappopriate in english instruction. There are many media in english. One of them is education film. Films are a type of visual communication which use moving pictures and sound to tell stories or inform. While being thought, the students of senior high school usually feel comfort in the class and easier in comprehend the material when they are bright by the teacher which used media and game in their instruction. In instruction, teacher can use education film to make student easier in comprehending their material.

4. The steps of film education

To make the media is successful in teaching learning in the classroom, there are some steps to have to do, such as:

- a. Greeting and self-introductions were made.
- b. The teacher prepares the materials and the topic.
- c. Teammates place Talking about film education in the center of the table to make sure everyone contributes to the team discussion.
- d. Each students takes turns talking.
- e. Based on the steps above the students can implement and participating in discussing.

F. Action Hypothesis

Based on the literature review above, the researcher formulates the hypothesis as follow:“Film education can increasing the writing skill at the second grade of the SMA Muhammadiyah 1 Metro in Academic year 2016/2017”

CHAPTER III

RESEARCH METHOD

A. Setting

The researcher will conduct the classroom action research at SMA Muhammadiyah 1 Metro. The school was constructed at 1984 and located at Jln. A.R. Prawira Negara No.1 of Central Metro. SMA Muhammadiyah 1 Metro is one of the oldest high school in Lampung Utara, it has 536 students and 45 teachers.

B. Subject and Object of The Study

The subject of this present research are the students of eleventh grade of SMA Muhammadiyah 1 Metro, Lampung. While, the subject of this research is the students writing skill at class XI MIA 1 of SMA Muhammadiyah 1 Metro. More detail clearly explore at the table as follows :

Table 3
The Subject of the research

| No. | Score | Categories | Frequency | Percentages |
|-------|--------|------------|-----------|-------------|
| 1. | 80-100 | High | 5 | 11,75% |
| 2. | 60-79 | Fair | 10 | 29,4% |
| 3. | 0-59 | Low | 7 | 58,8% |
| Total | | | 22 | 100 % |

Source : data students of the eleventh graders.

The object of this study is the students' increasing the writing skill. The collaborator in this reaserch is the English teacher at the second grade of SMA Muhammadiyah 1 Metro. Her name is Mr. Ngaderi, S.Pd.

C. The Concept of Classroom Action Research

According to Car and Kemmis action research is simply a form of self-reflective inquiry undertaken by participants in social situations, teachers in order to improve the rationality and justice of their own practices¹⁵. It means that through self-reflection the teacher conducted that study in his own class.

Then , Jean McNiff and Jack Whitehead suggest that “Action research is a label given to particular way of researching your own learning.” It means that action research is a way to explore our learning technique in the class¹⁶. Meanwhile, Cresswell states that action research provides the opportunity for educators or teachers to reflect their own practices.¹⁷

In the light of the above notion, the meaning of a study conducted by the teacher in his own class through self-reflection, in order that the teacher while increase his performance as a teacher, the student learning goals to be improved. The researcher would like to divide the research in to two cycles in the classroom action research. According to Kemmis and McTaggart Classroom action research (CAR) has various models but in this research the researcher will use research design. According to Kemmis and Taggart as cited by Anne Burns action research is dynamic and complementary process which consists of four essential phases such as

¹⁵Henning, John E.; Stone, Jody M and Kelly, James L. *Using Action Research to Improve Instruction .: anInteractive Guide for Teachers*, (London : Taylor & Francis Routledge.2009). P.8.

¹⁶Jean McNiff and Jack Whitehead, *Action Research: Principles and Practice*, (Routledg: Falmer, London, 2002), P. 13. B

¹⁷John Creswell, *Educational Research: Planning, Conducting, and Evaluating Quantitative and Qualitative Research*, (Boston: Pearson Education, 2012), P.577

planning, action, observation, and reflection in spiral system.¹⁸Those phases can be seen by following figure :

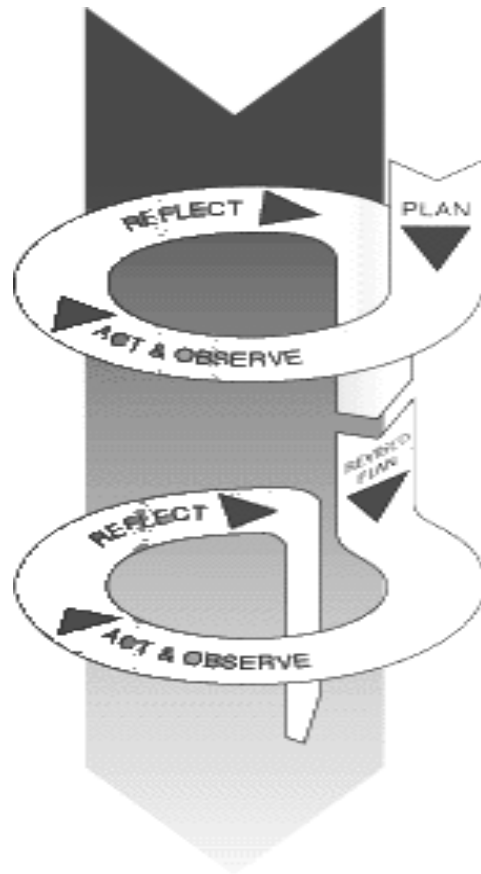

Figure 1
Kemmis and Mac Taggart Model¹⁹

This figure describes the sequence of the research that is preceded by preliminary study and followed by planning, acting, observing, and reflecting that implemented in each cycle in spiral system. The researcher makes plan, how to stimulate the student by the technique and based on the cycle.

¹⁸Anne Burns, *Collaborative Action Research for English Language Teacher*, (Cambridge: Cambridge University Press, 1999), p.32

¹⁹*Ibid*,P.33

In the classroom action research, the researcher would like to hold the research in two cycles. The steps were the follow :

1. Cycle I

a) Planning

Before conducting the research, the researcher explains about what, why, where, who, and doing action²⁰. There are four steps that will be applied in this stage. They are: (a) identifying the problem and finds the problem solving; (b) preparing the material and technique of teaching; (c) preparing the source of learning; and (d) preparing guidance to observe and evaluate. The plan is aimed at the trialing a particular course of action and collecting data on the outcomes of the action.²¹ Then the researcher with the collaborator (teacher) prepare some plans to conduct the classroom, they are following :

- 1) The researcher prepare the lesson plan, procedure, media and relevant material to be applied in classroom.
- 2) The researcher prepare the learning source for student.
- 3) The researcher determines the technique to be applied in acting phase. The researcher will film education to increase students' writing skill.
- 4) The researcher with the collaborator make the criteria of success.

²⁰Jean McNiff and Jack Whitehead, *Action Research: Principles and Practice*, (London :RoutledgeFalmer), P. 3

²¹*Ibid.*,p.37

b) Acting

This step is the implementation of the planning. This step must follow the plan that had been planned in the planning steps. The second step in every cycle is action. In which the researcher put the plan into action through the following steps :

- 1) The researcher tries to arrange the seats at classroom in a line or in groups with the students facing one person in front of the class;
- 2) The researcher lets the students speak English that speaker's platform in front of the class.
- 3) At first stage, teacher allow the students to prepare their self for the presentation.
- 4) The teacher divides the student into 2 groups then they have to share their opinion or idea based on the topic.

c) Observing

Observing is either an activity of a living being, consisting of receiving knowledge of the outside world through the senses, or the recording of data using scientific instruments. The term may also refer to any data collected during this activity. Based on the observing, the researcher decide whether is there anything that the researcher has to be increase soon in order that action achieve the

aim of the researcher goals. The researcher observes them in every activity.

d) Reflecting

The last step that the researcher will be doing is reflecting. The researcher will try to see and think again something that researcher has done. It is also to know whether there is influence to the students' learning process. By reflecting, the researcher can get information the strength and the weakness from the action that the researcher has been done.

If there still found the problems the researcher and collaborator will conduct the next cycle and use the collected data in cycle one as the reference by repairing all the problems or weaknesses in previous cycle.

2. Cycle 2

a) Re-Planning

When the reasercher found the problem in the first cycle, the researcher will repair the problem in the next cycle. It will explained as a follow :

- 1) The researcher will study the reflection result to obtain the solving problem.
- 2) The reasercher creates the material and revise the lesson plan including the media, and teaching procedure based on the problem that appear in cycle 1.

3) The writer will rearrange observation format and also reform the evaluation format to improve the planned indicators that have not been achieved yet in previous cycle

b) Acting

The researcher will apply the same step in previous cycle with the collaborator, but they apply the revise plan such as lesson plan, material, and instrument for evaluation. The they are :

1) Pre teaching activity

- a. The researcher starts the lesson by greeting to the students.
- b. The researcher and students pray together.
- c. The researcher checks student attendance.
- d. The researcher informs to the students about the competence, the indicators and objectives that should be achieved.

2) While teaching activity

- a. The study begins with the introduction of the topic by the teacher. At this point, the teacher can write the topic or do question and answer to the students about the topic given. This step needs to be done so that the students are more prepared to face the new material.
- b. The teacher divided the class into 2 large groups. Suppose if there are 40 children in a class, then each large group consists of 20 people.

- c. On a large group that consist of 20 people divided again into two groups. Each group contains of 10 people arranged face to face with 10 other people with standing position. This pair is called the first couple.
- d. Then the teacher handing out different topics to each spouse to discuss. In this step, the teacher gave enough time to students, so they could discuss the material well.
- e. After discussion, 20 people from every large group who stand facing each other following lined slid a clockwise direction. This way every learner gets new partner and share information different so on. A move clockwise new stop when learners back into its place of origin. The mutual movement shifted and a variety of information that resembles film education movement.
- f. The results of the discussion in every large group presented to the entire class. Teachers facilitate the occurrence of interactive dialogue, integration and so on. Through this activity intended to yield knowledge discussion by each major group can be understood and become knowledge along with the rest of the class²²

²²Huda, Miftahul, *Cooperative Learning*. (Jakarta :2009),P.147.

3) Observing

In the third phase the researcher will observe students' activity, their participation, and makes the note about the learning process.

4) Reflecting

After contrasting the score distribution of pre-test and post-test, the researcher review and reflect on the view and teacher performance whether is positive or negative.

D. Data Collecting Technique

In order collecting the data, the researcher will use the following techniques :

1. Test

According to Douglas Brown test is a technique of measuring a person's competence or knowledge in a given domain²³. The researcher will employ test in form pre-test and post-test.

2. Pre-test

In the first meeting the researcher administered pre-test of the researcher in order to find out the difference between the individual who have similar level. The pre-test employed in this research is in the form of writing skill test. In order to know the student's writing skill, the researcher employ oral question. It would be administrated orally by the teacher.

²³H. Douglas Brown, *Teaching by Principles an Interactive Approach to Language Pedagogy*, Second Edition, San Fransisco State University, 2001, p.384.

3. Post-test

After treatment to know the influence of the technique whether it is able to increase the student's writing skill. It will be held after they have gotten the treatment. Both of prepare test and post-test are different. In order to know the student's writing skill, the researcher uses oral question. It will be administrated orally by the teacher.

4. Observation

In this present research, observation is used to know the student performance in learning procedure.

5. Documentation

Documents are a readily accessible source of data in action reaserch as many already exist in institutional system. There is awide rank of documents that could be pertinent to the reaserch focus, including student portfolios of written work, student records and profile, lesson plans, materials, letters, class memos and news letters, and previous test or examination papper²⁴. In this present research, the researcher also employs documentation for to know all data of SMA Muhammadiyah 1 Metro Lampung.

6. The Field Note

To gather the data more accurately, the researcher uses the field note; it is making the data analyzing simpler. In many professions, it is a manner of good practices to make "field note" while actually

²⁴ Burns, Anne *Collaborative Learning*,p.140

engaged in professional²⁵. This note has been prepared systematically and given interpretation by the research.

E. Data Analysis Technique

To find out how does education film can increase writing skill, the researcher administered the pre-test before using education film media and after using education film media.

To analyze the data, the researcher computer data of the average rates of pre-test (X-pre) and post-test (X-post) by using formula as follows:

$$\bar{X} = \frac{\sum X}{N}$$

\bar{X} : Mean of average score

$\sum X$: Total score

N : Total number of student.²⁶

Then, to know the result the researcher will compare between pre-test and post test. The result will be matched by the minimum standard in this school at least 65. If from cycle I there are some students not successful, so we would conducted cycle II. The minimum cycle in CAR (Classroom Action Research) is two cycles, if from cycle II all of the students were successful, the cycle able to be stopped until cycle II only.

²⁵Michael J. Wallace, *Action Research for Language Teachers*. (Cambridge University Press, 1997) p.57

²⁶ Ary Donald, *Introduction to reasearch Education*.(USA :Wadworth) P.110.

F. Criteria of Success

To know the gain the data will be conducted in each test by taking the average score of pre-test and post-test furthermore. After the result is suitable by the minimum standard of writing skill in this class at least 65. If the goals score of the student has been fulfilled more than 75, and 75% of the students has been passed, so the researcher can sftop the research. But if there are some students not successful, and it is about less than 75% of the total students, so the researcher have to continuous in cycle II. The minimum cycle in classroom research action is two cycles.

RESULT AND DISCUSSION

A. Description of Research Setting

1. The Description of Research Location

a. The History of SMA Muhammadiyah 1 Metro

Senior High School Muhammadiyah 1 Metro was established in 1983. Since 1983 this school undergone school headmaster change the condition of leadership since its establishment in 1983, Senior High School Muhammadiyah 1 Metro had several headmaster as follows : Mr. Sirajudin Jahidin from 1983-1987 as the first principal, the next year 1987-1991 was led by Mr. R. Ahmad Matin, BA. As second principal, the next year 1991-1995 was led by Mr. Sarjono, S.Pd as the third principal, the next year 1995-1999 was led by Mr. Tukiman as the fourth principal, after that in 1999-2005 was led by Mr. M Bashori as the fifth principal, the next year 2005-2013 lead by Mr. Nurhasim, S. Ag as sixth principal and the last was led by Drs. Ruslani M. Ro'i, as the seventh principal in 2013 until now.

A. Description of Result Finding

This research was classroom action research (CAR). It was carried out at the tenth graders students (TKJ 1) of the State Vocational high school Muhammadiyah 1 Metro. This research was conducted in two cycles, each cycles consisted of four stages that were planning, acting, observing and reflecting and accomplished in three meetings in each cycle. The students' result of descriptive writing skill was gained through test which consisted of pre test and post test in the beginning research and in the end of each cycles while the students' activities were gained from observation during the learning process. The schedule of the research is as follow:

Based on the result of student's pre-test score, it can be inferred that there was only 36,36% or 8 students passed the Minimum Mastery Criteria (MMC) that was 75 while 63,63% or 14 students did not pass the Minimum Mastery Criteria (MMC) or less than 75. It indicated that the result of students writing was still low. By calculating and analyzing the result of pre-test, the writer and collaborator made a plan to implement the action that consisted of planning, acting, observing, and reflecting in each cycle to repair the weakness.

B. Description of the Research

1. Cycle I

a. Planning

In the cycle, the researcher and collaborator (Mr.ngaderi, S.Pd) would like to make and discuss about the lesson plan. The minimum mastery criteria (MMC) at SMA Muhammadiyah 1 Metro for English was 75. The lesson is writing, Descriptivewriting especially. In this meeting, the students were expected by the teacher got specific information of the descriptive. In the first and second

meeting, the teacher would explain about writing and the education film. Therefore, in the last meeting, the teacher would evaluate for the 22 students of IPA 1 class. The evaluation was about writing.

Based on the evaluation, the students were expected to be able to achieve the minimum mastery criteria (75). Then, they discussed about what education film is and the procedure of education film, because the researcher would be implemented the education film in writing lesson.

b. Acting

The implementation of this cycle was conducted in two meetings. The first meeting was done on Thursday, October 25th, 2017. In this meeting the collaborator was being the teacher and the researcher was being the observer. This meeting was started by praying and greeting, checking the attendance list, and asking the students' condition. Before doing the next action, the teacher explained education film for students.

In the second meeting was conducted on Monday, October 30, 2017. In this meeting, the researcher was being the teacher and the collaborator was being the observer. The meeting was started by praying and greeting, checking the attendance list, and asking the students condition. In this meeting, the researcher reviewed the assignment that the students have done at the first meeting and the teacher asked the students what they understanding about education

film. Then, the teacher would explain education film and after that the researcher gave a test. The teacher and the students made conclusion together before closed the meeting.

Source: The result of post-test 1 on Oktober 25th 2017.

Based on the result of student's post-test score, it could be inferred that there was 31,81% or 7 students did not passed the Minimum Mastery Criteria (MMC) that was 75 while 68,18% or 15 students passed the Minimum Mastery Criteria (MMC) or more than 75 and the average score was 71. It indicated that the result of students descriptive writing skill was improved if it compared with the pre-test score that was 71,36 but viewed from the indicator of success of this research stated that 75% of the total students must pass the MMC. It means that the result was unsuccessful to achieve the indicator of success.

c. Observing

In observation of the researcher's action, the researcher presented two meetings in cycle I of learning to write descriptive writing. The teacher explained the mind of education film to the

students. Although the teacher explained education film, but the students confused about what should they do and got difficulty to express their idea into word and how construct sentence become a good paragraph.

In the second meeting, the researcher explained the mind education film before giving the students assignment by using English fully. In this meeting, the students began active. They also began to be interested in teaching and learning process. In the test, there were 15 (68,18%) out of 22 students got good score. Although, only 15 students who got good score. But, the result of the students' test was better than the students' test before giving treatment.

According to the result of observation above, it can be concluded that the learning process was sufficient. Although there some of students made noisy, it can be inferred that the learning process has done well. It can be seen in the first meeting the students did 6,98% of positive activity in learning process,16,28%,the students interested, 46,51% enough active and then 30,23% not active in the class. Therefore the second meeting the students more active than first meeting. It can be seen that more than 50% from all class was active in the learning process.

d. Reflecting

Based on the result of the first meeting, it can be seen that the most of the students got difficulty to write about descriptive. It happened because the teacher has not explained more about

education filmyet. Occasionally, in doing the assignment, the students face difficulty and they felt bored following the class.

Moreover, in the second meeting the teacher explained Education film more. So, it has positive effect to the students in teaching and learning process. It can be seen from the result of the assignment in the first meeting and the test in the second meeting.

Got score more than 75 only, but there was increase in it. It proves that implement the education film was better than not implement it. The teaching and learning process will be effective if the teacher used bilingual language, those are English and Indonesian.

Although there was increasing of the result from the first and second meeting, but the research should be continued to the next cycle because the students' average have not achieved the minimum mastery criteria yet.

2. Cycle II

a. Planning

In the planning, the researcher would like to made and discuss about the lesson plan. The lesson was ,writing especially. In this meeting, the students expected able to get specific information of the descriptive text. In the first and second meeting, the teacher would explain more about writing and the procedure of education filmtechnique. Therefore, in the last meeting, the teacher would

evaluate for the 22 students of IPA 1 class. The evaluation was write about film. Then, they discussed more about education film is and the procedure of education film, because the researcher would like to implement the education film in writing lesson.

b. Acting

The action of this cycle was conducted in two meetings. The first meeting was done on Thursday november 2017. In this meeting, the collaborator was being the teacher and the researcher was being the observer. The meeting was started by praying and greeting, checking the attendance list, and asking the students condition. After that, the researcher explained the material. The material was the descriptive. Therefore, the teacher explained the education film more.

The second meeting was conducted on Tuesday October 25 2017. In this session, the researcher was being the teacher. This meeting was started by praying and greeting, checking the attendance list, and asking the students condition. After that the teacher asked to the students to explain about what descriptive is and what education film is. After some students explained, then the teacher gave a test to write descriptive. In this meeting, most of the students could answer well. It can be seen from the result of test who gave by the teacher. There were 36 out of 22 students could do well.

Regarding to the result of student's post-test score, it could be seen that the mean score in post-test II was 76. Based on the indicator of success of this research that was 75 % of the total students could pass the score at least 76 so it could be inferred that 76,74 % or 33 students from the total of students had passed the minimum mastery criteria (MMC) in post-test II of cycle II. In addition, there was only 23,26 % or 10 students did not pass the minimum mastery criteria (MMC). Meaning to say, the cycle II was successful.

c. Observing

From the observation of the researchers' action, she presented two meetings in cycle II. The researcher implemented the education film for the descriptive writing lesson. It expected able to help the students to write of descriptive easily. In this meeting, the students were seriously in following the class. They interested in write descriptive.

In the second meeting, the researcher explained the education film before giving the students a test. In this meeting, the students

began active. They also began to be interested in teaching and learning process. In this meeting, the teacher gave the test. The result was good because most of the students could do the test easily. The students who got score more than 75 were 33 (76.74%) out of 22 students.

According to the result of the observation above, it can be concluded that the learning process was successful. It can be inferred that the learning process has done well and the students were active in the class than cycle I.

d. Reflecting

Based on the result of the first meeting, it can be seen that the most of the students have not difficulty to express their idea into word and how construct sentence become a good paragraph. It happened because the teacher explained education film more. The students have serious in doing the assignment. In this meeting, most of the students got good score. It happened caused the teacher and the researcher has revised and improved the teaching and learning process in cycle I.

In the second cycle, the students were also active to do the assignment and test than before. They also felt confidence to answer the question. It means that the education film is effective media to increase the student's writing skill. The students who got score more than 75 were 33 (76,74%) out of 22 students. This research was stated finish and could be stopped in cycle 2 because the result of the

students' activities had achieved the indicator of success that was 75%.

C. Discussion

1. The Result of Pre-test

To see the students' writing skill before implementing the treatment, the researcher conducted the pre-test. It carried out on Monday, November 23, 2017.

From the result of pre-test shown that most of the students difficult for answering the test., it can be seen that the students' average was 63.55. It shows that most of the students have not passed yet in achieving the minimum mastery criteria (75). Therefore, only 8 (18.61%)out of 22 students passed of the minimum mastery criteria. It can be seen that most of the students failed in achieving materials. So, it needs improvement by education film.

2. The Result of Post-test Cycle I

To see the students writing skill after implementing the treatment, the researcher conducted the post-test. It carried out on Tuesday, September 27, 2017., it can be seen that the students' average was 72,23, it shown that most of the students have not passed yet in achieving the minimum mastery criteria (75). Therefore, only 20 (46.52%) out of 22 students passed of the minimum mastery criteria. It can be seen that most of the students failed in achieving materials. So, it needs improvement by education film.

3. The Result of Post-test Cycle II

To see the students' descriptive writing skill after implementing the treatment, the researcher conducted the post-test. It carried out on Thursday, October 25, 2017. It can be seen that the students' average was 76.69, it shown that most of the students passed in achieving the minimum mastery criteria (75). Therefore, there are 33(76,74 %) out of 22 students passed of the minimum mastery criteria. It can be seen that most of the students passed in achieving material.

4. The Comparison of Pre-test, Post-test I and Post-test 2

Based on the table, it can be seen that there is progress from 71,81 to 72, 23 to 77.22. From pre-test to the post-test cycle I, there is increase, and from the post-test cycle I to the pot test cycle II, there is increase for about. To know clearly about the increase of the pre-test, post-test cycle I and cycle II, the researcher shows the line of table and graph.

Source: The result students' activity in cycle I and cycle II

Based on the table and graphic above, it could be concluded that there was an improving of students' activities during the learning process of cycle I and cycle II through using descriptive text. It means that descriptive text had positive effect to improve the teaching learning process.

Related this research until cycle II, the result score and the result activities of the students was achieved the target that was decided on indicator of success 75% from students got minimum score 75. Based on the result of this research was known that more

than 75% from the students got minimum score 75. So, it can be said that this research was finish and didn't need to be continued to the next cycle.

D. Interpretation

The research is success if the students able to achieving of the minimum mastery criteria (MMC), that is 75. Based on the result of pre-test and the post-test, it can be seen that education film is able to increase the students' descriptive writing skill significantly. It can be seen from the students' average before and after given the treatment. The students' average in the pre-test is 18, 61, in the post-test I is 46, 52, and in the post-test II is 76, 74. There are gains from the result of pre-test to post-test I, and post-test I to the post-test II. The gain from the pre-test to the post-test I is 27,91 points, and from post-test I to the post-test II is 30,22 points.

There is increasing of the students who got score from the pre-test to the post-test cycle I and from post-test cycle I to the post-test cycle II. From 8 students (18.60%) in pre-test to the 20 students (46, 52%) in post-test I, and to the 22 students (77,22%) in post-test II. This increase shows that the education film can increase the students .

Thus, the writer assumes that education film is one of the media which can increase the writing, therefore, this research was stated finish and could be stopped in cycle 2 because the result of the students' activities had achieved the indicator of success that was 75%.

CHAPTER V

 - 4.1.1 Memahami isi teks filmpendidikan.

C. TUJUAN PEMBELAJARAN

Setelah pembelajaran ini diharapkan:

1. Peserta didik dapat mengetahui struktur isi teks filmpendidikan.
2. Peserta didik dapat mengetahui ciri bahasa teks filmpendidikan.
3. Peserta didik dapat memahami isi teks filmpendidikan.
4. Peserta didik dapat mengetahui ciri-ciri teks film pendidikan.

D. MATERI PEMBELAJARAN

1. Pengenalan struktur isi teks film pendidikan.
2. Pengenalan ciri bahasa teks film pendidikan.
3. Pemahaman isi teks film pendidikan.
4. Analisis isi teks film pendidikan.
5. Analisis bahasa teks film pendidikan.

6. Penyuntingan bahasa sesuai dengan: struktur kalimat, ejaan, dan tanda baca.
7. Langkah-langkah membuat sinopsis teks film/drama.
