AN ANALYSIS OF TEACHER STRATEGIES IN ENGLISH LEARNING DURING ONLINE CLASS AT MA MA'ARIF 9 KOTAGAJAH

ABSTRACT

By:

LUTFIA NIKMATUL FAUZIAH

The purpose of this research is to find out the teachers strategies used by English teachers at MA Ma'arif 9 Kotagajah during online class, the obstacle faced by the teacher in implementation the learning strategies, and the impact of teacher strategies in online class for the students.

This research is a qualitative research. The methods used in collecting data are observation, interview, and documentation. The data analysis technique was data collection, data reduction, data display and drawing conclusion and verification. The subjects of this study were 3 English teacher and 15 students of MA Ma'arif Kotagajah.

The study found that during online class English teachers at MA Ma'arif 9 Kotagajah have various strategies in the process of teaching and learning activities, they are providing material by using online media, creating easy learning, checking students understanding, and giving assignment by using online platforms. Whatsapp is the most media used by the teacher in implementing their learning strategies during online class. There is obstacles faced by teacher in implementing the strategies during online class, they are internet connection, controlling student focus, time management, and students interest in learning. While, during an online class there are decrease of student interest in learning.

ANALISIS STRATEGI GURU DALAM PEMBELAJARAN BAHASA INGGRIS PADA KELAS ONLINE DI MA MA'ARIF 9 KOTAGAJAH

ABSTRAK

By:

LUTFIA NIKMATUL FAUZIAH

Tujuan dari penelitian ini adalah untuk menemukan strategi yang digunakan oleh guru bahasa inggris di MA Ma'arif 9 kotadajah selama kelas online.dan kendala yang dihadapi oleh guru dalam menerapkan strategi pmbelajaran, serta dampak dari strategi yang digunakan oleh guru terhadap siswa selama kelas online.

Penelitian ini adalah penelitian kualitatif.Metode yang digunakan dalam mengumpulkan data adalah observasi, interview, dan dokumentasi.Teknik analisis data yang digunakan adalah pengumpulan data, reduksi data, penyajian data, dan penarikan kesimpulan serta verivikasi.Subjek penelitian ini adalah 3 guru bahasa inggris dan 15 siswa MA Ma'arif 9 Kotagajah.

Pada penelitian ini ditemukan bahwa selama kelas online guru bahasa inggris di MA M'arif 9 Kotagajah memiliki bermacam strategi dalam proses kegiatan belajar mengajar, mereka adalah memberikan materi menggunakan media online, menciptakan pembelajaran yang mudah, memeriksa pemahaman siswa terkait materi pembelajaran, dan memberikan penugasan menggunakan platform daring.Whatsapp adalah media yang paling banyak digunakan oleh guru dalam menerapkan strategi pembelajaran selama kelas online.Ada pula kendala yang dialami oleh guru saat menerapkan strategi diatas adalah, sambungan internet, mengontrol fokus siswa, managemen waktu, dan minat siswa dalam belajar.Selama kegiatan pembelajaran online, siswa menunjukkan penurunan pada minat belajarnya.

Kata kunci: Pembelajaran Bahasa Inggris, Kelas Online, Strategi Guru

MOTTO

لَا تُسْعَى إِلَّا نَفْسًا اللَّهُ يُكَلِّفُ

“Allah does not impose upon any soul a duty to the extent of its ability...”

(Al- Baqarah: 286)

“Allah tidak membebani seseorang melainkan dengan kesanggupannya”

Al – Baqarah: 286

DEDICATION PAGE

I highly dedicate this undergraduate thesis to:

Firstly, my beloved parents, Mr. Nawawi and Mrs. Eka Sumarni, who have been my inspiration in life, always pray for and support me for my success with their endless love. In addition, there is also my dear sister Lulu Alfina Fauziah who have always been my support system and my entire extended family.

Secondly, my lovely adviser Mrs. Syahreni Siregar, M.Hum who have sincerely guided the writer to accomplish this undergraduate thesis in time. Furthermore, my beloved lecturers of English Education Department, and my beloved campus IAIN Metro.

Thirdly, I also want to say big thanks to all my best friends who have always been there until now. They are Anita, Amalia, Dela, Indry, Irfan, Pucan, Sylva, Vivi and Yovi. They always help and support me to finish this undergraduate thesis.

Last but not least, I wanna thank me, for believing in me, for doing all this hard work, for having no days off, for never quitting, for to do more right than wrong, and for just being me at all the time.

ACKNOWLEDGEMENT

Praise thanks to Allah SWT, the lord of the worlds whom without His Mercy and Blessing, none of these would be possible. The writer is very grateful for the chance Allah has given her to accomplish this undergraduate thesis entitled “AN ANALYSIS OF TEACHER STRATEGIES IN ENGLISH LEARNING DURING ONLINE CLASS AT MA MA’ARIF 9 KOTAGAJAH”. Sholawat is also sent to Prophet Muhammad SAW who had delivered the truth to human being in general and Muslim in particular.

In these opportunities, the researcher would like to express her deepest gratitude especially to:

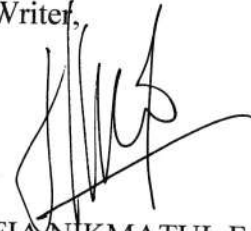

1. Dr. Hj. Siti Nurjanah, M.Ag, as the Rector of IAIN Metro Lampung.
2. Dr. Zuhairi, M.Pd, as the dean of the Tarbiyah and Teacher Training Faculty of IAIN Metro Lampung.
3. Andianto, M.Pd, as the chief of English Education Department of IAIN Metro Lampung.
4. Syahreni Siregar, M. Hum as the advisor, thank you so much for kindness and valuable knowledge and for your support in finishing this undergraduate thesis.
5. All lecturers of the English Education Departmen of IAIN Metro Lampung who have given their thought and shared their experience to the researcher.

6. All of her friends in English Education Department of IAIN Metro part in support system, thanks for everything in helping to finish this undergraduate thesis.

The researcher do apologizes for all mistakes that she has made in writing and presentation items. All comment and criticizes are really welcomed to lighten up the quality of this a research. Hopefully, this undergraduate thesis can be a meaningful benefit for the researcher especially and for our campus and all readers generally.

CHAPTER I

INTRODUCTION

A. Background of Study

English is a foreign language that has an imperative role in international communication. English helps establishing relationships in this era of globalization. In Indonesia, English is not the native language of the nation, and will be an obstacle for the nation's children in establishing an international communication. Therefore, English the mandatory category in subjects at school. For the more at the junior and senior high school.

In the teaching and learning process, the teacher has a role as a determinant of success in these learning activities. The teacher is the one who plays a role in developing and implementing a curriculum itself. In his role, the teacher has the task of implementing the curriculum, one of which is to design a lesson plan. Moreover, the teacher must evaluate the success or failure of the results of the teaching and learning activities carried out. Professional teachers are who have professionals in the teaching and learning process, such as professionals in managing classes, preparing and selecting media, explaining materials, and using language in the teaching and learning process.

The occurrences of the COVID-19 pandemic that was hit Indonesia for more than a year affect the educational environments. Restrictions on activities outside the home make the learning process at school abolished,

then replaced with a learning process through online class. It also happens in MA Ma'arif 9 Kotagajah, which do teaching and learning activities with an online system.

Online learning is a part of e-learning. Which is a learning method based on electronics or technology in the process of learning activities. Online learning uses applications or sites related to education. It is a breakthrough that has been around for a few years. However, it is only used by educational institutions that are already capable in terms of the readiness of resources and facilities. It makes some activities in the educational environment experience changes in their implementation. The changing learning system and activities that are usually done in the classroom must change, adjusting to the circumstances where all learning activities are carried out with online classes.

Furthermore, in online learning process, media online is a tool that supports learning activities to keep going. There are various media online can be used in implementing the learning process during online class. media online that many commonly use are whatsapp group, zoom, youtube, and google classroom. These media online can help the continuity of the learning process during online learning, including providing the material, conducting virtual learning, sharing videos, presenting material through power points, and collecting assignments.

In this case, the teachers' as the one of the main components in learning process. They have a role that is to determine the direction of the

existing learning process. Teachers must be able to master the current situation and conditions so they can continue to carry out their obligations by using available online technology facilities. Teachers have different strategies in managing their class. The strategy applied by the teacher in the process of learning activities is a key determinant of the success of the teaching and learning process.

This online learning situation is a big challenge that must be overcome by teachers. The limited experience of learning online which of course has advantages and disadvantages in its application. Teachers are required to be able to quickly adapt to the current circumstances. However, the teacher has been working with it with several kinds of learning strategies in online learning in the classroom. Both in the preparation of learning materials, learning support media, or activities in the learning process itself.

Based on the results of a pre-survey on March 1, 2022, at MA Ma'arif 9 Kotagajah by giving a questionnaire to second grade students and doing an interview with English teacher. It can be conclude that the learning activities through online learning at MA Ma'arif 9 Kotagajah have several obstacles in the implementation. It can be seen from the number of students who think that learning is easier to do face-to-face compared to using online learning and there are also some differences in understanding the material when learning through online learning. In implementing learning activities through online learning, the teachers also used media

online in providing their learning program. Teachers try to combine the strategi with media online in implementing the learning process during online learning.

Therefore, this research was conducted to find out what the strategies of teachers in the process of English learning during online class. It can be seen from the success or failure of the learning process that has been carried out. Therefore, researcher was held with a research entitled “AN ANALYSIS OF TEACHERS STRATEGIES IN ENGLISH LEARNING DURING ONLINE CLASS AT MA MA’ARIF 9 KOTAGAJAH”.

B. Research Question

Based on the results of the background of the problem, it can be drawn several problems that can be discussed in this study including;

1. What are the strategies used by teachers in English learning during online class at MA Ma’arif 9 Kotagajah?
2. What are the obstacles faced by teachers at MA Ma’arif Kotagajah in implementing the strategies during class?
3. How are the impacts of strategies used by teachers during online class for students at MA Ma’arif 9 Kotagajah?

C. Objective and Benefits of Research

1. Objective

Based on the formulation of these problems, it can formulate several objectives to achieve in conducting this research, that is:

- a. To find out the strategies used by teachers in English learning during online class at MA Ma'arif 9 Kotagajah.
- b. To determine the obstacles faced by teachers at MA Ma'arif 9 Kotagajah in implementing a strategies during online class.
- c. To analyze about the impact of strategies used by teachers during online class for students at MA Ma'arif 9 Kotagajah.

2. Benefits in research

a. For teachers

For teachers, this research is expected to find out the strategies that are suitable to use in English learning through online class. It can be used as a reference in providing the learning by utilizing technological developments in the educational environment.

b. For students

For students, this research is expected to give a motivation for students to increase their interest in English learning and can be used as information regarding how to learn English to make it easier to understand.

c. For other researchers

This research serves as information for other researcher that interest to conduct research with the topic about teacher strategies in online learning during online class.

D. Prior Research

This research was conducted on several previous studies related to the existing discussion topics. The researcher will describe the scopes of the study such as objectives, methods, and results.

The first previous research was conducted by Sutarto, Dewi, and Irwan entitled “Teacher Strategies in Online Learning to Increase Students’ Interest in Learning during COVID-19 Pandemic”.¹ The research used qualitative research with phenomenological approach. They found the strategies used by teacher to increase students’ interest in learning were to provide students with an understanding of the importance of learning to make learning material brief, clear and interesting, to use simple and interesting media, and to conduct regular and continuous evaluations. The subjects of this study are the teachers of SDIT Rabbi Radhiyya Curup.

The second research is conduct by Widarini, Putra, and Marsakawati in titled “Teachers Strategies in Online Learning During Covid Pandemic.”² In their research, they use qualitative case study and the subjects of their study are three teachers of public junior high school in Tabanan. This study aims to investigate strategies and challenges faced by the teacher in delivering a material in online learning. It found that teacher used a various strategies, which include the use of google form, google

¹Sutarto, et. al., “Teacher Strategies in Online Learning to Increase Students’ Interest in Learning During COVID-19 Pandemic”, *iicET*, Vol. 8, No. 3, 2020

²Widarini, et.al., “ Teachers Strategies In Online Learning During Covid Pandemic”, *JPBII*, Vol. 9, No. 2, Sepetember 2021

meet, quizzes, and video. And the challenges found by the teachers are they were internet connection, unresponsive students, and problems with the operation of the equipment at the beginning of the pandemic.

The third research was conducted by Firza, Sofian, and Zaitun with the title *Analysis of English Teaching Activities During the Covid-19 Pandemic at Purnama Junior High School Jakarta*³. This reference research has something in common with this research, namely that both studies are looking for learning activities during face-to-face learning activities with online activities.

In this study, they found that there are pronounced differences in activities between learning activities in general (before the pandemic) and online learning. The visible difference is how learning materials are delivered using the instructions provided, such as through Google Classroom, WhatsApp, YouTube, and other applications

The fourth research conducted by Devi, Adi, and Mahendrayana entitled *“Teaching Strategies Used by English Teachers in Online Learning”*.⁴ This study aimed to find out the teaching strategies used by teacher and the subject of this study is English teachers at SMP Negeri 6 Singaraja. They found that English teachers at SMP Negeri 6 Singaraja used learning by doing and learning by reflection in the online learning.

³ Firza, et. al., “An Analysis Of English Language Teaching Activities During Covid-19 Pandemic At SMP PURNAMA JAKARTA”, *Journal Language and Language Teaching*, Vol. 9, No. 2, 2021

⁴ Devi, et. al, “Teaching Strategies Used By English Teachers In Online Learning”, *International Journal of Language and Literature*, Vol.5, No.2, 2021

They stated that there were five obstacles during learning through online classes.

The novelty of this research with the previous research is, in previous research it was explained only teacher strategies in online learning, but in this research the object will be discussed about teacher strategies in English learning during online class and the obstacles and the impact of strategies are used by teacher at MA Ma'arif 9 Kotagajah. And as for the data collection techniques in this research using observation, interview, and documentation.

CHAPTER II

THEORETICAL REVIEW

A. The Concept of Teacher

1. The Definition of Teacher

In the measure of education, the teacher is essentially someone who carries out his role to guide, assist and be responsible for educating. The teacher is an adult who has a role as a guide for a child towards maturity. A teacher is people who are responsible for the implementation of education.

The teacher is an important element in learning activities. According to Djamarah the teacher is someone who provides knowledge to students or professional staffs that can make students plan analyze and conclude problems that occur⁵. Regarding Nawawi, teachers are adults, who are obliged to provide education to students⁶.

The teacher is a designation for positions, and professions for someone who devotes himself to the field of education through educative interactions in a patterned, formal, and systematic manner. Dri Atmaka stated educators or teachers are people who are

⁵ Sri Widayati, "Peranan Guru dalam Pembelajaran Bahasa", *Jurnal Elsa*, Vol.17, No.1, April 2019

⁶ Wahyu Apri Ramadhan, Etika Guru Menurut Imam Nawawi dan Relevansinya Dengan UU RI NO.14. Th. 2005, *Universitas of Malang*, 2013

responsible for assisting students in both physical and spiritual development.

Based on the various definitions of teachers by the experts, it seems that the teacher is an educator who acts as a guide in the growth of students and evaluates students in formal education.

2. The Role of Teacher

Teachers have a very important role in the scope of education. According to Gurkan, Teachers who can guide students in achieving learning goals show the success of an education system because the success of service can be seen from what is produced. In addition, the role of teachers in education is increasingly challenging in this digital era. Teachers must adapt and improve their abilities in utilizing this evolving learning technology. Teachers must be able to be a model for their students

The role of the teacher in the scope of education from Sarabjeet can be stated as follows⁷.

a. The Controller

At this point, the teacher has a full role in all activities in the classroom during the learning process, such as about what students do and what students say in the class. The teacher can give a warning if there are students who do something wrong in class.

⁷ Sarabjeet Kaur, "Role of Teacher in Student Learning Process", *International Journal of Business and Management Invention*, Vol. 8, No. 1, P 42

b. The Prompter

The teacher acts as a figure that encourages students when they have problems when they want to express their opinions or channel their knowledge about something. Teachers can help students only when they need help.

c. The Resource

In education, teachers have a role as a central source of knowledge for students. As someone who acts as a resource person, the teacher must always be willing to offer and provide assistance if students experience difficulties in the learning process. Teachers must also guide students to use the internet as a source of wider and Eternals knowledge for themselves.

d. The Assessor

This role is own by teachers to find out how well the performance of their students. There are various ways that teachers can do to assess students. And this role provides opportunities for teachers to get to know students better, which must be accompanied by sensitivity and support for the students themselves so as not to cause counter-productivity.

e. The Organizer

Giving instructions plays an important role in determining the success of an activity. The teacher acts as the organizer of teaching and learning activities. Teachers play a role in creating

conducive learning conditions and providing feedback to students in order to achieve learning objectives.

f. The Participant

Separated from being a model, the teacher must be a part of activities to improve the classroom atmosphere. However, the teacher also must make students more interested in participating in the activities organized by the teacher.

g. The Tutor

In his role, the teacher acts as a coach when students undergo a work project or study independently by providing advice and guidance to students in the process and giving notes. The teacher must have a limit of only helping without interfering in the completion of the task. So, there is no dependence on students towards teachers who make students unable to evolve.

B. The Concept of Teacher Strategies

1. Teacher Strategies

According to Darmansyah, learning strategy is a component of a learning system⁸. In addition, Sanjaya said that the learning strategy is a plan, method, or activity carried out by teachers and students to

⁸ Darmansyah, *Strategi Pembelajaran Menyenangkan Dengan Humor*, (Jakarta : Bumi Aksara, 2010)

achieve effective and efficient educational goals⁹. Effective and efficient learning is important for the success of learning. In addition, the teacher strategies are the effort made by the teacher in making the learning process run well.

The learning strategy includes everything related to the lesson plan that will be implemented. Such as preparing what material will be delivered, what learning methods are following the material to be delivered, and the form of evaluation and assessment of learning outcomes.

Furthermore, in determining a learning strategy the teacher has an important role in the planning and implementation process. The teacher's strategy is a learning plan created by the teaching teacher as a reference in the implementation of learning by preparing all the stages in learning, materials, and learning methods used during the learning process.

Based on the explanation from the expert, the researcher concludes that the learning strategy by the teacher is an effort made by the teacher by applying appropriate and sequential learning stages to achieve effective and efficient learning objectives.

⁹ Sanjaya, *In Startegi Pembelajaran Berorientasi Standar Proses*, (Jakarta : Kencana Perdana Media Group, 2006)

2. Teacher Strategies in Online Learning

Currently, learning activities are carried out through electronic media or also be referred to as E-Learning. It is in response to the situation that exists during this pandemic. In the current, teachers are required to adapt to teaching through online methods. Teachers need to create online learning strategies as an instrument of delivering lesson plans in the process of teaching English.

Online learning strategy is the teacher's way of conveying a plan, method, learning to convey learning objectives by utilizing digital technology to address the current

Lestyanawati and Arif, are identifying and explaining that three teaching strategies can be applied by teachers during this situation, they are; 1) Online chat only. 2) Videoconferencing and mixing online chat and, 3) Video conference during the teaching and learning process¹⁰.

The teacher is the one who plays a role in providing facilities when doing online learning and also preparing the structure because it will determine the learning outcomes of students. Mitchell mentions several online teaching strategies that can increase students' perceptions of involvement, increase student retention, and student

¹⁰Lestyanawati and Arif, "Strategies and Problem Faced by Indonesian Teachers in Conducting E-Learning System During COVID-19 Outbreak", *CLLiENT Journal*, Vol. 2, No. 1, 2020

learning satisfaction¹¹. They are follows; 1) before the traditional class starts, it is better to open the course, at least one week before. 2) Post a brief introduction about yourself using a picture. 3) Provide links. 4) Discussions are held weekly, informally, or officially. 5) Conduct an assessment in online discussions and assignments using the Rubrics. 6) Provide your syllabus, course schedule, and student expectations. 7) Must match online office hours. 8) Give students your campus office hours and e-mail.

In addition, Sutarto stated that there are strategies that teachers can use to increase students' interest in learning during online learning, as follows: 1) Strategies in growing student interest in online learning. 2) Provide learning motivation to students. 3) Prepare learning materials that are interesting, short, clear, and easy for students to understand. 4) Use simple learning media and attract students' interest in learning. 5) Conduct a final evaluation periodically and continuously¹².

In addition, mentioned from Angelo University, there are several strategies that can be applied from face-to-face learning to online learning, such as¹³:

¹¹ Mitchel, *ONLINE Course and Online Teaching Strategies in Higher Education*. 5, 2017-2019.

¹² Sutarto, et.al, Teacher Strategies in Online Learning to Increase Students' Interest in Learning during COVID-19 Pandemic, *Institut Agama Islam Negeri (IAIN) Curup*.

¹³ Angelo State University, "Online Teaching Strategies and the Role Of The Online Teacher" Section 1.7.

1) Discussion/Forum

This discussion forum is considered to be very helpful in the process of developing knowledge for students. Because in this forum, students can exchange ideas with one another..

2) Self-directed Learning

This is a method which is carried out to increase knowledge, skills, and learning initiatives in students independently.

3) Small Group Work

Learning through online classes can be grouped into small, organized and effective groups. In these groups students can exchange knowledge or ideas about learning.

Based on the strategies regarding teacher strategies in online classes, the researcher uses several types of strategies that can be used by teachers in online learning in implementing existing learning plans.

C. The Concept of Online Learning

1. Definition of Online Learning

Learning is an activity in developing knowledge and natural abilities that exist in students. Learning activities are formal activities carried out in the classroom or have reciprocal interactions between teachers and students. According to Hamalik, learning is a part of growth and change of individuals to be a new behavior as the result of

experience and practice¹⁴. In addition, learning is a development that is passed by individuals during the process of teaching and learning activities. Recently, the world of education was experiencing a change in the teaching and learning process system. Due to a pandemic phenomenon that has hit almost two years, the teaching and learning activities have been online since March 16, 2020¹⁵.

Gartika stated, online learning is a learning process that is carried out remotely using the web or application in the process¹⁶. In other hand, online learning is an open and distributed learning system through the internet and network based technology to facilitate the information of learning process and knowledge.

Online learning is that students spend their time through online, working either directly through the internet or on computers connected to local internets. In addition, in online learning, all activities are carried out through digital technology, in delivering material.

2. Media in Online Learning

Nowadays, technological advances provide very good benefits in life, especially in the world of education. Rusman stated that learning media is a container that is used as an intermediary in the

¹⁴ Oemar Hamalik, *Proses Belajar Mengajar*, (Jakarta : Bumi Aksara, 2001)

¹⁵ Kemendikbud, "Pencegahan Penyebaran Covid-19 di Lingkungan Kemendikbud, KEMENDIKBUD, 2020

¹⁶ Gartika, " Teachers' Encounter of Online Learning: Challenges and Support System", *Journal of English Education and Teaching*, Vol. 5, No. 1, 2021

learning process to stimulate students' thoughts, feelings, interests and willingness to achieve effective learning goals¹⁷.

In the current situation, where school activities must be carried out online, of course, the role of this learning media plays an important role in achieving learning success. Romli in Pangestika stated that online media are types or format media that only accessed by internet connection, containing a text, video, photos, and sound.¹⁸ Online learning media can assist teachers in distributing learning material information that should be given directly, but by using this online learning media everything related to the teaching and learning process can be done without being limited by distance.

The online learning media that are most often used today, there is several media can be used at online learning;

1) WhatsApp

This is one of the messaging applications that is currently used by almost the entire world population. Especially with the current situation. WhatsApp is a free messaging application that is widely used among students as a means of sending messages including photos, videos or audio¹⁹. That makes WhatsApp the

¹⁷ Tri, et.al, "The Important Of Learning Media Based on Illustrated Story Book For Primary School", *POICOCE UM Surakarta*, 2018

¹⁹ Sonia and Alika, "Effectivity of E-Learning through Whatsapp as a Teaching Learning Tool", *MVP Journal of Medical Sciences*, Vol.4, 2017

most widely used media, because in its use WhatsApp does not require a lot of internet quota and is very easy to use.

2) Zoom

Zoom is a meeting service provider with a variety of existing service features. This app is for video conferencing. The application can be installed with devices such as PCs with webcams, laptops with webcams, as well as Android smartphones²⁰. This application is very helpful in the current situation, learning can still be carried out directly through video conferences without having a face-to-face meeting.

3) YouTube

YouTube is a very popular website in the world, where people can find various types of videos uploaded on the website.²¹ In addition, YouTube has become a media that is often used because it is easy to use. YouTube in the world of education has a role in the implementation of the learning process. YouTube can be accessed anywhere and anytime.

²¹ Sylphia, Dumaris, and Lydia. "Students' perception of Using YouTube as English Online Learning Media During Covid-19 Pandemic". *Journal Of Language Teaching*.

3. Advantages and Disadvantages of Online Learning

In practice, of course, this e-learning learning technique has its advantages and disadvantages. According to Valentina, the advantages and disadvantages of online learning²² are:

a. Advantages of Online Learning

There are several advantages of online learning which are composed of several expert opinions. The advantages are;

- 1) Online learning makes it easier for students to access learning without adjusting the place and time at any time.
- 2) Online learning further enhances students' knowledge. It is because students are easier to access the information they want to know without existing limits.
- 3) The existence of a discussion forum, able to improve the relationship between students in exchanging knowledge.
- 4) Online learning is more cost-effective because it doesn't cost money to go to school.
- 5) Online learning considers the individual differences of students. In a sense, students are free to explore any knowledge and not rely on one person

²² Valentina Arkorful, "The Role of E-Learning", 401-402

b. Disadvantages of Online Learning

Online learning, apart from the advantages it has in the scope of education, it also has some disadvantages. The disadvantages of online learning that are include:

- 1) In its implementation, online learning makes students have low interaction, so they feel isolated and experience contemplation.
- 2) Online learning is considered not to be effective in its implementation in the delivery of learning materials compared to traditional learning methods which are carried out face to face.
- 3) Online learning has a negative effect in the context of improving communication among students. They may have more excellent knowledge but are weak in conveying the knowledge they know.
- 4) The assessment carried out in online learning is a challenge for the teacher; because the teacher must choose an appropriate assessment system considering that the assessment process is not accompanied directly and has the risk of students cheating.
- 5) Online learning has a high chance of plagiarism in students because the ease of access tends not to be accompanied by the selection skills of students.

CHAPTER III

RESEARCH METHOD

A. The Types and Characteristics of Research

This study used qualitative research methods with descriptive approach which is this method aims to describe in detail the conditions of a context according to what is in the field of study. Qualitative research is a type of research that produces findings that cannot be achieved using other statistical procedures²³.

Qualitative research involves efforts, such as asking questions and procedures, collecting specific data from participants, analyzing data, and interpreting the results of data analysis²⁴. The methods that are usually used are interviews, observations, and use of documents.

In this case, the researcher desires to analyze the program and activities that occur during the learning process carried out by English teachers during online learning by making an observation that comes from conducting interviews and data provided by the parties concerned directly.

²³ Farida Nugrahani, *Metode Penelitian Kualitatif: Dalam Penelitian Pendidikan Bahasa*, (Surakarta: Ttp, Tt), 4

²⁴ John W. Creswell, *Research Design: Qualitative, Quantitative, and Mixed Methods Approaches*, (California: Sage publication, 2014), Fourth Edition: 5

B. Data Source

Data sources are data that contains existing information and materials to be searched for, observed, and then researched by the researchers. Edi Subroto stated that research data is information contained in everything that is the research target area. Data source can be extracted and collected through various data sources, such as documents sources, a person, events or activities, places or locations, and objects²⁵. The source of data used in collecting the data needed in this research is to use data in the form of primary and secondary²⁶.

In this study, primary data were obtained from interviews, observations, and data obtained directly. Is to conduct interviews with third teacher and fifteen students at MA Ma'arif 09 Kotagajah about teacher strategies in English online learning class.

Meanwhile, secondary data is data that supports theories obtained from primary data. Such as, the script of interview, supporting research journals and pre-existing books.

C. Data Collection Technique

In the process of collecting data, researchers used several kinds of data collection techniques based on the topics discussed in this study. Sources of data used in this study are from interviews, observation, and documentation.

²⁵ *Ibid.*, 211-212

²⁶ G. Anderson, *Fundamental Of Educational Research*, (USA: The Falmer Press, 2005),

1. Documentation

The document is a data collection technique by utilizes notes, archives, pictures, films, photos, recordings, and other documents related to the problem and not just an estimate. In qualitative research, the document is secondary data that functions as a support and complement to research sources.

Documentation in this study refers to the results of an in-depth interview script that done by the teachers and students at MA Ma'arif 09 Kotagajah. Recordings during the interview, complementary data provided by the resource person, and research reference books.

2. Observation

Observation is an activity carried out to analyze individual behavior directly to obtain an overview of the research problem. In contrast to interviews, the object of this observation is not limited to people but can also be carried out on nature, objects, or an activity carried out by individuals or groups.

In this research, the researcher doing an observation about the teachers method, media, and evaluation during online class. and then, the researchers conducted in-depth interviews with respondents or research subjects, researchers will review the results of the interviews. Checking the reliability of the data and then evaluating the results of interviews about the teacher's teaching strategies that have been carried out previously.

3. Interview

The interview is an activity carried out by two people to exchange information and knowledge through a question and answer process²⁷. In this research, the interview is the first step taken by the researcher in the process of obtaining information related to the research topic.

This research focuses on the teacher strategies in English learning during online class. Therefore, interviews were conducted with English teacher at MA Ma'arif 9 Kotagajah. It was done to obtain information needed in the research process and a way to understand how teacher strategies during online class.

In its implementation, the researchers used three teachers and fifteen students in third grade students at MA Ma'arif 9 Kotagajah. In interviews with teachers, researchers conducted direct interviews. While with students, researchers conducted interviews via whatsapp messages.

D. Data Analyze Technique

Data analysis is a step after the implementation of the data collection process. It is done to sort out the data that has been obtained and then choose between data not used. This analysis is carried out by interpreting the data, to find meaning and implications as a result of the research. Milles & Huberman divides data analysis into four components,

²⁷ Sugiyono, *Metode Penelitian Kualitatif, Kuantitatif, dan R&D*, (Bandung: Alfabeta, 2016), 231

there are; data collection, data reduction, data display, and drawing conclusion/ verification²⁸

Figure 3.1

The Components of Data Analysis (Interactive Model) by Miles and Huberman

1. Data Collection

Data collection is the first step taken when analyzing the data that has been collected. In this process the researcher collects the data needed for research purposes.

In this study, the researcher collects data through doing observation of learning activity during online class. Firstly, researcher doing interviews with respondent. The respondents are English teacher and fifteen students at MA Ma'arif 9 Kotagajah. the sources that have been obtained.

²⁸ Matthew B. Miles, A, Michael Huberman, *Qualitative Data Analysis second edition*, (London: SAGE Publication, 1994), p.10-12

2. Data Reduction

In data reduction, selection, focusing, simplifications of all kinds are done to support the information obtained during the data research process in the field. It indicates that when data was collected the reduction step occurs like drawing conclusion, codification, and theme investigation, grouping, and writing a note. This process is done since the researcher selects the case to be studied, and is carried out continuously in conjunction with research.

In its implementation, researchers used several steps in reducing the information data obtained. First, the researcher made an interview script for the interviewees who had been done in-depth. Then the researcher sorts the data from the results of interviews that have been carried out according to the topic of the problem in the study. If the data is not needed, it will be removed so that the research discussion is in accordance with the research topic.

3. Data Display

Data display is a data presentation carried out after the data reduction process. In a study, data display of research results plays an important role in providing a clear picture of the research. Different to quantitative research, which presents data in the form of tables, graphs, pie chart and the like. In qualitative research, the presentation of the data is in the form of narrative text.

In this study, the data displayed are from the results of interviews conducted on research subjects, there are third teacher and fifteen students at MA Maarif 9 Kotagajah. The data presented is in the form of a narrative text about the results of the interviews.

4. Conclusion Drawing and Verification

Drawing conclusion is an interpretation of the result of data analysis and interpretation. Drawing conclusion was carried out after the implementation of the initial two steps of data analysis, that is data reduction and display data. It is done after the data obtained has been dug carefully, completely, and in-depth so that meaning is found in the resulting research. Especially in research using qualitative method. In the conclusion, it is necessary to carry out a verification process so that the meaning can be accounted.

The verification process for the conclusion can be carried out by repeating the research steps, including examining the data collected from the field. Reduction made, and temporary conclusions that have been formulate

CHAPTER IV

RESULTS AND DISCUSSION

A. Description of Research Setting

1. The Profile Of MA Ma'arif 9 Kotagajah

a. A Brief History Of MA Ma'arif 9 Kotagajah

MA ma'arif 9 Kota Gajah was founded by Kh. Aminan on July 16, 1990, chaired by Mr. Ngaliman Marzuki and as his deputy, Mr. Sugiyanto, BA. This Madrasah Aliyah was originally named Madrasah Aliyah Maarif 25 Purworejo which later on July 17, 1997 underwent a refinement to become Madrasah Aliyah 9 Kotagajah until now.

The madrasah was established on an area of 10,000m² and a registered certificate was granted by the Regional Office of the Ministry of Religion of the Republic of Indonesia on 13 November 1991 with Madrasah Statistics number 312180214038. Currently, Madrasah aliyah 9 Kotagajah is led by Mr. Didik Fitri Chayono, S.Si.

MA Ma'arif 9 Kotagajah is under the auspices of the Maarif Nu Educational Institution. MA Ma'arif 9 Kotagajah is located in Purworejo Village, Kotagajah District, Central Lampung Regency, Lampung Provinc

b. Vision and Mission of MA Maarif 9 Kotagajah

1) Vision

"Excellent in achievements based on faith, knowledge and noble character and able to actualize it in the person of society".

2) Mission

- a) Organizing education in an active, innovative, creative, effective and fun way with the aim of Ahlusunnah Wal Jama'ah An Nahdliyah.
- b) Develop language skills both Arabic and English.
- c) Realizing an integrated information and communication technology facility
- d) Organizing worship activities.

2. Organization Structure Of MA Ma'arif 9 Kotagajah

The organizational structure has their respective roles and responsibilities in the teaching and learning process in madrasas as well as in matters relating to the progress and development of madrasas, as follows:

Table 4.1
Organization Structure Of MA Ma'arif 9 Kotagajah

No	NAME	POSITION
1.	Drs. Hi. M. Baedlowi	chairman of the Maarif Nu Kotagajah educational institution foundation
2.	Didik Fitri Cahyono, S.Si	Head master

3.	Heri Santoso	Committee chairman
4.	Subandi S.E	Vice Head Of Curriculum and Public Relations
5.	Syafifah Handayani, S.Pd	Vice Head of student affairs and infrastructure
6.	Ayin Ashari, S.Pd.I	Librarian
7.	Rizki Tri Yulianti, S.Pd.I	head of administrative staff

3. The Conditions of Teachers and Official Employers in MA Ma'arif 9 Kotagajah

The condition of educators and education personnel describes the number of teachers and staff, status and education of teachers. In MA Ma'arif 9 Kotagajah itself, from the number of existing teachers up to this year, there are 37 teaching staff. to be clear, the following are the teaching staff at MA Ma'arif 9 Kotagajah.

Table 4.2
Educator and education staff at MA Ma'arif 9 Kotagajah

No	Name	Position
1.	Didik fitri cahyono, S.Si	Head master
2.	Drs. Usman gatri, M/Pd.I	Teacher
3.	S.Eko Nurono, BA	Teacher

37.	Solekan	Staff

B. Results of the Research

Based on research conducted at MA Ma'arif 9 Kotagajah regarding the strategies implemented by teachers in learning English during online class. Data obtained by observing and conducting in-depth interviews with the subject of research. The subject of this research were three English teacher and fifteen student at MA Ma'arif 9 Kotagajah.

In this research there are three objectives of study, the first is to find out the strategies used by teacher in online class. The second is to find out an obstacles faced by the teacher in implementing the strategy. And the third is the impact of the strategy on student during online class

1. Teacher strategies in English learning during online class

During the implementation of online learning activities at MA Ma'arif 9 Kotagajah, teachers experienced changes in their teaching patterns. The process of delivering material must use technology as an intermediary. At MA Ma'arif 9 Kotagajah, in online learning activities the teacher used several of strategies in implementing English learning.

The following are the findings from the results of interviews with English teachers and students at MA Ma'arif 9 Kotagajah obtained by researcher regarding the strategies used by teacher in learning English during online class, as follows:

a. Giving the material using media online

English learning during online class has changes in the process of teaching and learning activities. Especially, in the process of providing learning materials to students during online classes. the results of interviews with teachers, the teachers gave the following statement as follows.

Table 4.3
Result of interview with teachers about teacher strategies in giving the material using online media

No	Questions	Teachers responses
1.	<i>What do you do in the process of providing material during online class?</i>	T1: "...I use whatsapp to send the material to be discussed at the meeting..."
		T2: "...While online, I used whatsapp as a tool to communicate with students and a tool to transfer learning materials. Sometimes I also send learning videos on YouTube to the WhatsApp group..."
		T3: "...I used whatsapp and zoom meeting as means of providing learning materials during online class. Because I think student will be easier to understand the material..."

In light of the information above, the researcher can sum up that the teacher strategies at MA Ma'arif 9 Kotagajah in giving the material during online class used kinds of online media. During the online learning period, the learning activities are carried out without direct interaction. The teacher used online media in the

form of WhatsApp, YouTube, and Zoom as the learning media. The data shows, there are two teachers used WhatsApp as media learning. In practice, the teacher sends material via WhatsApp in the form of documents or video links on YouTube related to learning material.

And one of them is using Zoom as Media learning in providing the material. She considered that students more understand the material presented by interacting directly via Zoom compared to just sending material in the form of documents. The statement from the teacher above is validated by the students, as follows.

Table 4.4
Interview result with students about teacher strategies in giving the material using online media

No	Question	Students responses
1	<i>How do teachers provide learning materials during online class?</i>	S1: "...the teacher gives the material via whatsapp group..."
		S2: "...the teachers send the youtube link to the whatsapp group, then the teachers tells us to watch the video..."
		S3: "...the teacher gives material through the whatsapp group, than explains it through a zoom meeting..."
		S4: "...teacher provides material via zoom meeting and whatsapp group..."
		S5: "...teacher provides material by sending documents or photos of material to the whatsapp group..."

	S6: "...the teacher sends material via whatsapp group..."
	S7: "...the teacher sends YouTube videos to the whatsapp group..."
	S8: "...the teacher will provide material through the zoom meeting..."
	S9: "...the teacher delivers material via whatsapp group..."
	S10: "...the teacher provides material by sending PPT to the whatsapp group..."
	S11: "...usually the teacher sends material to the whatsapp group..."
	S12: "...before starting the lesson, the teacher sends the material to whatsapp..."
	S13: "...sends material to whatsapp group..."
	S14: "...provide material at the time of x=zoom meeting..."
	S15: "...sends materials to whatsapp..."

The result of the interview above stated that teachers at MA Ma'arif 9 Kotagajah in the process of providing material during online classes using various online media. The media used are whatsapp, youtube, and zoom. However, based on students the online media most used by the teacher in providing material is whatsapp.

b. Creating an easy learning for students

The English teacher at MA Ma'arif 9 Kotagajah tries to make the English learning process run effectively. In his role, the teacher creates a learning atmosphere that makes students feel comfortable when participating in learning. Given the results of interview with the teachers, the teachers gave the validation as follows.

Table 4.5
Results of interview with teacher about teacher strategies in creating an easy learning for students

No	Question	Teachers responses
1	<i>What strategies do you use in teaching and learning process during online class?</i>	<p>T1: "...In this online learning, every activity of learning is full of adaptations to its implementation. I personally, during the process of learning activities take place, I try to build a comfortable learning atmosphere. As in delivering material, giving assignment, it is different when online and not online learning. I usually ask students to material to be discussed first, then open a discussion forum on the WhatsApp group, then for assignments such as speaking skill I ask the student to make a conversation in pairs..."</p> <p>T2: "...I gave the material then explained the material. Then give them practice question about the material has been learned..."</p>

		T3: "...I sent the material to the students, and then explained it. Uusually, I also open a discussion forums and doing an asking and answer activity with the students..."
--	--	---

In light of information above, in the process of learning activities during online class, the teacher applies learning activities that are considered capable of creating a good learning atmosphere for students. The learning activity create by teacher are, the firstly is by giving the material for students, then students asked to study the material first independently. Secondly, the teacher will create discussion forum via whatsapp group, the students can do question and answer activities with the teacher, and thirdly the teacher will give assignments by making students into small groups to do the ssignmnets given by the teacher. The information above validated by the students, as follows.

Table 4.6
Results of interview with student about teacher strategies in creating an easy learning for students

No	Question	Students Responses
1	<i>Does the teacher explain learning material in an easy-to-understand way during online class?</i>	S1: "...teacher explains the material in a way that is easy to understand..."
		S2: "...yes, in explaining the material, teacher used a way that is easy to understand..."
		S3: "...I don't think so, because during online class, I didn't really understand the lessons conveyed by the teacher..."

	S4: "...yes, the teacher explains the material in an easy way to learn..."
	S5: "...during the online class, I had difficulty in understanding the material..."
	S6: "I don't think so,because I don't understand the material presented by the teacher..."
	S7: "...the teacher doesn't explain the material well..."
	S8: "...teacher makes the material easier to understand..."
	S9: "...teacher only gives the material;,,
	S10: "...teachers explained the material in an easy-to understand way, by opening discuccion sessions on whatsapp groups, so we can ask if doesn't understand the material..."
	S11: "...the way the teacher explains the material is good.."
	S12: "...the teacher explains the material during online class quite easy to understand..."
	S13: "...yes, teacher explain the material well..."
	S14: "...teachers usually open discussion forums. So, I can better understand the material..."
	S15: "...teacher are good enough in explaining the material..."

In light of information above, students stated that during online class the teacher was able to provide learning in a way that was easily understood by the students. Students are able to receive the material during online learning. However, there are students who find it difficult to receive material during oline class. It shows,

that the teacher strategies in creating easy learning for students still needs to be evaluated to reduce the failure rate of students understanding of learning materials.

c. Checking the students understanding

Checking students' understanding of learning materials has an effect on student learning outcomes. In this case, the teachers in MA Ma'arif 9 Kotagajah doing an checking students understanding after giving an explanation of learning material. So, they provide prom feedback to their students in online class. In the results of interviews with teachers, the teachers gave the following statement as follows.

Table 4.7
Result of interview with teacher about teacher strategies in checking students understanding the material

No	Question	Teachers Responses
1	<i>What is your strategy in asking for feedback on students' understanding of the material presented?</i>	T1: "...To get feedback, usually by asking questions after each explanation of the material, such as, do you have anything to ask? ..."
		T2: "...Usually, after explain the material I ask student if there is something is unclear? If there is, I will ask students to ask about it in the whatsapp group..."
		T3: "...At the end of the meeting, I usually review the previous material by giving time to do question and answers with students. Sometimes give a posttest to students..."

In light of the information above, the teachers at MA Ma'arif 9 Kotagajah always check students understanding of learning material during online class by asking students for feedback on learning activities that have been carried out. In asking for feedback the teacher gives questions like, do you have any question? Do you understand? Is there an explanation that is difficult to understand? Etc. The information above validated by the students, as follows.

Table 4.8
Result of interview with students about teacher strategies in checking students understanding the material

No	Question	Students Responses
1	<i>During online learning, what did your teacher do after the learning activities ended?</i>	S1: "...usually, at the end, the teacher gives us questions..."
		S2: "...usually, there is a question and answer session..."
		S3: "...the teacher gives questions relatef to the material besing discussed..."
		S4: "...there is a question and answer session and assignment from the teacher..."
		S5: "...giving assignment and asking question about the material..."
		S6: "...open a question and answer session..."
		S7: "...collect assignments..."
		S8: "...usually teachers open question and answer session..."
		S9: "...ask students whether they have understood the material or not..."
		S10: "...conducted a question and answer session..."
		S11: "...open question, if no one ask

		the teacher will giving question to us...”
		S12: “...conduct question and answer activities...”
		S13: “...opens the question and answer session...”
		S14: “...giving assignment...”
		S15: “...gives question...”

In light of interview above, the data shows that during online learning in controlling the student understanding related to learning material, the teacher applies strategies in checking students understanding of the material. Students stated, after the learning activities were ended, the teacher gave questions related to students understanding. This strategy was implemented by teachers at MA Ma’arif 9 Kotagajah in seeking quality education during online learning.

d. Giving assignment using online platforms

In MA Ma’arif 9 Kotagajah, the teacher gives an assessment by using WhatsApp application. It is because, whatsapp is a communication application that is the easiest to use and does not absorb a lot of internet quota. In the results of interviews with teachers, the teachers gave the following statement as follows.

Table 4.9
Results of interview with teacher about teacher strategies in giving
assignment using online platforms

No	Question	Teacher Responses
1	<i>What are the strategies you use in giving assignments during online classes?</i>	T1: <i>"...For the assignments, after giving an explanation related to the material. Then I gave assignments via Whatsapp and then collected the result based on agreed deadline..."</i>
		T2: <i>"...After sending the learning video, I gave questions related to the material via whatsapp group..."</i>
		T3: <i>"...Assignment depending on the material. Sometimes I take photo of the question on the questions in the student worksheets and then send it to whatsapp group. For the video too. Because whatsapp is easier to use than others..."</i>

In light of the information above, it can be concluded in the assignment of teachers at MA Ma'arif 9 Kotagajah using the WhatsApp online platform. The teachers send questions, assignments, and so on to the whatsapp group. It is because whatsapp is the easiest application for the teachers and student to communicate during online class. The information above validated by the students, as follows.

Table 4.10
Result of interview with students about teacher strategies in giving
assignment using online platforms

No	Question	Students Responses
1	What does your teacher do in giving assignments during online class?	S1: "...teacher gives assignments via whatsapp group..."
		S2: "...teacher sends list of questions in the form of photos to the whatsapp group..."
		S3: "...teacher usually sends assignments to the whatsapp group, then collects them via provate delivery to the twachers whatsapp..."
		S4: "...the teacher sends assignments via whatsapp..."
		S5: "...assignment are gave after learning has ended. The teacher sends assignmnents via whatsapp group. Assignmnets are usually in the form of photos of questions that must be done..."
		S6: "...teachers gave assignment by sending question phoyos to the whatsapp group..."
		S7: "...usually the teacher asks us to make video, for example a pair conversation..."
		S8: "...teacher gave assignments, then asked us to send them via whatsapp..."
		S9: "...teacher gave assignment during the zoom meeting..."
		S10: "...teachers prepared question related to the discussion..."
		S11: "...teachers asked to make summary..."
		S12: "...sending assignment via

		whatsapp...”
		S13: “...asks us to upload the work...”
		S14: “...make large or small groups according to the task...”
		S15: “...sending assignmnets via whatsapp...”

Th light of information above, whatsapp is the most online platform used by the teacher in the way in giving the assignment during online class. The teacher at MA Ma’arif 9 Kotagajah used whatsapp in their strategy in giving an assignment by sending quizzes or assignments in accordance with the discussion of the material.

Based on the results of the analysis of interview conducted by researchers, there are various strategies used by teacher at MA Ma’arif 9 Kotagajah in implementing English online learning. The various strategies are as follow.

Table 4.11
Result of the analysis of data interview with teachers and students at MA Ma’arif 9 Kotagajah

No	Teacher Strategies	strategies implemented by English teachers in online class
1.	Giving the material using online media	Using Whatsapp and Zoom as tool in delivering learning material.
2	Creating an easy learning for student	1. Self-directed learning 2. Discussion 3. Making small group work
3	Checking the student understanding the material	Asking for feedback
4	Giving assignment by using online platforms	Using whatsapp as online platforms

2. Obstacles faced by teacher in implementing strategy during online class

In implementing strategies in English learning during online class, the English teachers at MA Ma'arif 9 Kotagajah faced a several obstacles in the process of learning activities. The obstacles faced by teachers are external problem such as the internet network. And interna; problems encountered in the students itself. In the result of interview with the teachers, the teachers gave the following statement as follows.

Table 4.12

Results of interview eith teachers about the obstacles faced by teacher in implementing the strategies during online class

No	Question	Teacher responses
1	<i>In applying strategy in teaching English, do you faced any obstacles?</i>	<p>T1: "...during the online learning period, I faced several obstacles when implementing learning strategies, the first obstacles is the internet connection. And the last is controlling student focus during the learning process..."</p> <p>T2: "...As for the obstacles in implementing the strategy, the first is on the students'. During online learning, the students' focus in learning is quite bad. There are indeed some students who still follow the learning activity well. But, those who do not focus on the class are also tolerable. I think because the teacher can't control the students directly when studying. The internet network also a major problem. Learning will not work if the internet is jammed. And also, an</p>

		ineffective study in time. Sometimes it is delayed, but sometimes at the start of learning there are still students who have not appeared...”
		T3: “...The first obstacle is the internet network. How can the learning process run if the internet is difficult, right? So yes, they often complain that it is difficult to download material because the internet is slow. So yeah, that’s the major problem for me. Second, the focus of students in learning when online is quite bad. They are more focused on other things. Then, student’s interest in learning is enough to hinder the learning process. They tend to just follow what is going on, without understanding about the teachers explanation...”

From the result of the interview above, in implementing learning strategies during online class, the teacher at MA Ma’arif 9 Kotagajah faced obstacles. The obstacles faced by teacher during online class such as, the first is internet connection. In online learning, the internet is the most important thing in supporting online learning activities. In this case, the teacher found that the main obstacle during online was an internet connection. This causes the process of learning activities during online to be less effective.

The second is student focus. Teachers revealed that students experienced a decreased focus on learning during online class. Students become more passive when participating in learning activities. It is becomes an obstacle to the success of the strategies implemented by

teachers during online class. The third is students' interest in learning. Learning activities carried out online affect students' interest in learning. Teachers found students' interest in learning during online class decreased. The decreased of students' interest in learning hinders the smooth learning process during online class.

And the last is time management. The online learning activities made teacher unable to fully supervise students during learning. It makes students become uncontrollable. Especially, at the time of learning students are often late in attending lessons and always give the same reason that is there are other needs at home. The information above validated by the students, as follows.

Table 4.13
Results of interview with students about obstacle in learning during online class

No	Question	Students responses
1	<i>Do you face problems in participating in english learning activities during online class?</i>	S1: "...my problem is in the internet connection..."
		S2: "...the problem during online class is the network and I also get bored easily..."
		S3: "...the problem is on the network, and often feel bored because of studying alone at home..."
		S4: "...on the internet, I find it difficult to access the material..."
		S5: "...online class require a lot of quota, so my problem is the cost of buying internet quota..."
		S6: "...my problem is in internet, sometime the internet connection is too bad, so I can not access the zoom application..."

		S7: "...problem with the internet connection..."
		S8: "...it's hard to focus when studying..."
		S9: "...signals..."
		S10: "...its easy to get bored because im study alone at home..."
		S11: "...the first is signlas and the second is quicly bored..."
		S12: "...internet signal is often lost so it is difficult to access the material..."
		S13: "...difficult to follow the lesson because the signals doesn't support..."
		S14: "...the learning time that interrupted and of course the signal..."
		S15: " becomes unfocused and easily focused on other things than learning material.."

In light of interview above, the data shows that students also face problems in following the learning process during online class. The most problrm faced by the students is the internet connection. A bad internet connection makes it difficult for students in participate the learning activities and in access learning materials. Furthermore, the students quickly get bored during online learning. This supports statements form teachers related to student focus and student interest in learning during online class.

Based on the data analysis above, the researcher find out a several obstacles faced by the teacher in implementing their strategies during online class, they were internet connection, student focus, student interest in learning, and time management.

Table 14
Result of analysis data interview about the obstacles faced by
teacher during online class

No	The obstacle during online class	Obstacles faced by teacher at MA Maarif 9 Kotagajah in implementing strategy during online class
1.	Internet Connection	Teacher found it difficult in providing the material and in learning activities during online class.
2.	Controlling students focus	During online class, students focus in learning is bad. The students cannot focus on learning, but they are more focus on another application on their ponsel.
3.	Time management	Time management that is not run effectively. The students often late for learning activity.
4.	Students interest in learning	The students quickly felt bored so they are not interest in learning during online class

3. The Impact of teacher strategies for student during online class

Data was generated from observation and in-depth interviews with fifteen students and English teacher at MA Ma'arif 9 Kotagajah, interview were conducted to obtain information about the impact of the teacher strategies on student during online class.

Based on the results of interview with English teachers at MA Ma'arif 9 Kotagajahin implementing a learning strategies during online class, the teacher stated that the strategies applied had an impact on student learning, firstly on students understanding related to the material presented during online class and secondly on students interest in

learning during online class. In the result of interview with the teachers, the teachers gave the following statement as follows.

Table 4.15
Result of interview with teachers about the impact of the strategies on students during online class

No	Question	Teachers Responses
1	<i>How do you think the quality of students in learning during online class?</i>	T1: "...during the online class, for sure the decrease of students interest in learning. They become more passive during learning activities. They also get bored quickly, and do not follow the lesson well..."
		T2: "...students experience a decrease interest in learning, but I think they still understand the material I convey during online class. They still defend their scores on the final exam..."
		T3: "...I think the quality of students in understanding the material is quite good. And the concern is that during learning activities they do not participate in learning to the fullest. They didn't seem interested in participating in this English learning during online class.

In light of interview above, teachers stated that the learning strategies they used were able to make students understand the material delivered by teachers during online class. This is supported by student learning outcomes during online class. Meanwhile, the learning strategies used by the teacher have not able to make students more interested in English learning during online class. Students feel bored easily and make

tem not participate in learning activities properly. It can be concluded, the impact of teacher strategies in English learning during online class they are, firstly on students understanding the material and secondly students interest in learning.

a. Students understanding in learning

The first impact is on students understanding of learning materials. The following is a table of the results of interview with students about their understanding of the material during online class.

Table 4.16
Result of interview with students about the impact of teacher strategies
on students understanding the material

No	Question	Students Responses
1	<i>Do you understand the material delivered by the teacher during online class?</i>	S1: "...yes, I understand the material..."
		S2: "...I understand the material..."
		S3: "...I understand material delivered by the teacher..."
		S4: "...I can understand the teacher explanation about the material..."
		S5: "...I can not understand the material..."
		S6: "...I don't understand the material..."
		S7: "...during online class, I'm difficult to understand the material..."
		S8: "...I understand the material..."
		S9: "...yes, I understand..."
		S10: "...I don't understand the teacher explanation while online class..."
		S11: "...I'm difficult to understand

		the material during online class...”
		S12: “...yes, I can understand the material by the teacher...”
		S13: “...I didn’t understand..”
		S14: “...I understand the material;..”
		S15: “...yes, I understand...”

In light of the interview above the data shows that nine of fifteen students at MA Maarif 9 kotagajah are able to understand the material delivered by the teacher during online learning. They stated that they received well the learning material presented by the teacher. Meanwhile, there are six of students can not understand the learning material during online class. Those who do not understand the learning material said that is difficult to accept learning material during online class. In conveying learning material during online, the teacher must be able to organize learning activities, so that they run effectively to achieve learning objectives in the strategy used by the teacher in delivering material during online class was good.

b. Students interest in learning

The second impact is on student interest in learning. Teachers have an important role in increasing student interest in learning. During the online learning period, students’ interests in learning are decreased. At MA Ma’arif 9 Kotagajah, out of fifteen respondents, eight of them experienced a decrease in interest in learning. It is shown in this table as follows.

Table 4.17
Result of interview with students about students interest in learning

No	Question	Students Responses
1	<i>Do you enthusiastically participate in the learning during online class?</i>	S1: "...I don't think so, because studying online is make me feel bored..."
		S2: "...I don't, I don't like studying online..."
		S3: "...Im not enthusiastic, because studying online makes me feel bored quickly..."
		S4: "...online makes me feel lazy to learn..."
		S5: "...I am not enthusiastic, because I cannot understand the material..."
		S6: "...I don't. I think online is boring..."
		S7: "...no, online learning makes me not understand the material..."
		S8: "...yes I am. Because online learning makes me don't have to go to school..."
		S9: "... the teacher is good enough in learning activity, so I am quite enthusiastic in learning..."
		S10: "... I don't think so, studying online is boring..."
		S11: "...I quite like online class..."
		S12: "...no, because it's boring..."
		S13: "...I don't like online class. I can't understand the material..."
		S14: "...yes, because usually the teacher give a game or something..."
		S15: "...no, online class are boring..."

In light of interview above shows that students at MA Ma'arif 9 Kotagajah have a bad interest in learning during online learning. Students stated that during online learning, they were not enthusiastic in

learning. Students quickly get bored while participating in the process of online learning activities. It means, the teachers strategy in online learning has not had a good impact on students interest in learning during online class.

Table 18

The result of data analysis of interview with teachers and students about the impact of teacher strtaegies in English learning during online class for students

No	The Impact of teacher startegies in English online learning for students
1.	Students are still able to understand the English material provided by the teacher during online class.
2.	Students experienced a decline in interest in learning English during online class

C. Discussion

Based on data collection, the researcher sound the teachers strategy during online class, the obstacles faced by teacher, and the impact of the teacher's strategy on students at MA Maarif 9 Koatagajah. The displaying discussion as follows;

1. Teacher strategies in English learning during online class

Based on the result of the research above, English teacher at MA Ma'arif 9 Kotagajah used various strategies in implementing English learning during online class. they are, giving the material by using online media, creating an easy learning for students, checking the

students understanding, and giving assignment by using online platforms. The strategy used by teacher is as follows.

a. Giving the material using online media

English teachers at MA Ma'arif 9 Kotagajah, in the process of teaching and learning activities during online learning using online media that is WhatsApp, YouTube, and Zoom meetings. Whatsapp is the most used by the teacher in learning process during online class. It is because whatsapp does not require a lot of internet quota and easy to use.

b. Creating an easy learning for student

During the Online learning period, teacher made various efforts to make teaching and learning activities run effectively as when learning face to face. The effort made by teacher is on organize the activities carried out during the process of online learning activities, according to Angelo University there is strategies that can be applied on online class at MA Ma'arif 9 Kotagajah, as follows,²⁹

1) Self-Directed learning

At the time of learning, the teacher provide the material will be discussed. Then, the teacher gives time to student to study the material. Student can explore the material. This activity is

²⁹Angelo State University, "online Teaching Strategies and The Role of The Online Teacher", Section 1.7

considered capable of making students easier to understand the material.

2) Discussion

In this activity, teachers provide a forum for students to be able to discuss the results of self-directed learning has been done before. This activity is expected to develop student knowledge.

3) Small group work

In this activity, teachers make a small group after doing discussion forum to evaluate the result of the learning. In addition, these activities also used in develop thinking skills on students, because in this activity students can exchange their idea and then combining the ideas they have.

c. Checking students understanding the material

The third strategy used by the teacher during online class is checking students understanding of the learning material. This activity carried out by the teacher after the teacher gives an explanation regarding the material has been studied, the teacher gives question to get feedback from students in online class. It means, the online learning activities, the teacher stives for students to understand the material conveyed through online media. Feedback is obtained by asking questions to students, such as *Do you have any question? Is there any material that is not clear?* Etc.

d. Giving assignment by using online platform

The last of strategies used by teacher in learning during online class is give assignments through online platform. To find out the extent of student knowledge regarding the material that has been given by the teacher during online class, the teacher needs to give assignments to students. In this case, the teacher gave assignments through the WhatsApp platform. Because student found it easier to access. This assignment carried out by teacher at the end of lesson.

2. The obstacles faced by teacher in implementing strategy during online class

Based on the finding of the research, English teachers at MA Ma'arif 9 Kotagajah faced obstacles in implementing strategies during online class. the statement of the teachers was validated by the students. The obstacles faced by the teacher as follows,

a. Internet connection

This online learning activity makes the internet a major component in online learning. Teachers find internet connection be the main obstacles in implementing learning strategies. During the learning process, the student find that they often have difficulty accessing material and participating in learning due to a weak of

internet connection. In addition, problems on the internet connection will hinder the learning process during online class.

b. Controlling student focus

During the online class, students focus on learning decreases. Its because the learning activities carried out in online makes teacher difficult on control students during the process of learning activities. In this case, the teacher must make more efforts so that students always participate in learning activities.

c. Time management

During online learning, teachers find it difficult to manage time. Students are often late in participating in learning activities. Also, in collecting assignments, students collect assignments past the limit of deadline. It makes teacher always limit attendance when learning.

d. Student interest in learning

Student is the one of the component in process of the teaching learning activities. During online class, teachers found student interest to be an obstacles in the occurrence of effective learning activities during online class. Students become more passive and do not follow the lesson enthusiastically.

3. Impact of teacher strategies for students during online class

In the research data, the strategies used by teachers during online class have an impact on students. The teacher strategies are a plan, method and efforts made by teacher to achieve efficient and effective objective of educational.³⁰ The following is the impact of teacher strategies in English learning during online class for student,

a. Students understanding of the learning material

Students understanding of learning material show the success or failure of the teachers' efforts in explaining the learning material. In this case, the data shows that most of the students understand the material provided by the teacher during online class. It validate with the interview with students, nine of fifteen students can understand the material delivered by the teacher in English learning during online class.

b. student interest in learning

During online learning, student showed decreased interest in learning. In this case, the strategy implemented by the teacher has not been able to build students interest in learning during online class, its because, most of student show their disinterest in learning during online class.

CHAPTER V

CONCLUSION AND SUGGESTIONS

A. Conclusion

Based on the results of the research, the researcher concluded that English teachers at MA Ma'arif 9 Kotagajah have learning strategies during online learning. There are five strategies used by teacher, they are providing material by using online media such as whatsapp, youtube and zoom. And creating easy learning for students, then checking students understanding of the material, and the last is giving assignments using online platform. In the process of learning activities during online class, whatsapp is the most by English teachers as a medium in implementing their learning strategies. Teachers find it easier to provide learning by using whatsapp compared to other media.

Moreover, in implementing the strategies above, the teacher at MA Ma'arif 9 Kotagajah encountered several obstacles. The following obstacle faced by teacher, such as internet connecting, controlling student focus, time management, and student interest in learning. Internet connection is the main obstacle faced by teachers in implementing the learning strategies during online class.

The strategy implemented by teachers also has some impact on student. The following is the impact of the strategies used by teacher on student during online classes online, the firstly is Students understanding

of English material, the teacher strategies in English learning during online class at MA Ma'arif 9 Kotagajah have been able to maintain students understanding related to the learning material. It is supported by the students statement related to their understanding of the material during online class. Secondly is Students interest in learning. The strategies used by teachers at MA Ma'arif 9 Kotagajah in English learning during online class cannot. Increase students interest in the material during online class. It is because students are not focused on learning during online class.

B. Suggestion

1. English teachers in MA Maarif 9 Kotagajah

At that time of teaching during online learning, the teacher must be able to create a comfortable learning so that learning process goes well and effectively. And clearly in delivering the learning material. Whereas in controlling the focus on students, it is better when learning activities insert a fun activity so that students don't get bored easily.

2. The students

During online learning, students should use their free time to explore the material provided by the teacher by utilizing the features of the learning technology that exist today. Students are expected to be more focused when learning activities take place.

3. Other Researchers

This research is expected to be useful for researchers who want to conduct research by raising the same topic. Further researcher can conduct more in-depth research related to this research

This interview sheet is intended to obtain information and data that will be used as a reference in the study of An Analysis Of Teacher Strategies In English Learning During Online Class. Therefore, we are asking you to be able to answer the following questions according to the facts.

List of Question for Teacher

No	Question	Answer
1	How do you prepare before starting learning during online classes?	
2	What strategies do you use in teaching English during online classes?	
3	What strategies do you use in explaining English material during online classes?	
4	Do you make your own learning media?	
5	Before doing the lesson, did you explain in advance the learning media used?	
6	In applying strategy in teaching English, do you faced any obstacles?	
7	What is your strategy in asking for feedback on students' understanding of the material presented?	
8	What are the strategies you use in giving assignments during online classes?	
9	How do you think the quality of students in learning during online class?	

LIST OF INTERVIEW TEACHER

Name : IYW

1. How do you prepare before starting learning during online classes?
 Answer: Pada saat memulai pembelajaran, saya biasanya meminta anak untuk melakukan absensi. Lalu memberikan materi yang akan dibahas. saya menyiapkan materi berupa link youtube ke grup whatsapp.
2. What strategies do you use in teaching English during online classes?
 Answer: Dalam pembelajaran daring ini, setiap kegiatan pembelajaran sarat dengan adaptasi pelaksanaannya. Saya pribadi, selama proses kegiatan belajar berlangsung, saya berusaha membangun suasana belajar yang nyaman. Seperti dalam penyampaian materi, pemberian tugas, berbeda ketika pembelajaran daring dan tidak daring. Saya biasanya meminta siswa untuk materi yang akan didiskusikan terlebih dahulu, kemudian membuka forum diskusi di grup WhatsApp, kemudian untuk tugas seperti keterampilan berbicara saya meminta siswa untuk melakukan percakapan secara berpasangan.
3. What strategies do you use in explaining English material during online classes?
 Answer: Saya menjelaskan materi dengan mengirimkan video penjelasan terkait materi yang dibahas pada saat itu. Biasanya juga membuatkan resume terkait materi pembelajaran.
4. Do you make your own learning media?
 Answer: Ya, saya membuat power point, juga video pembelajaran.
5. Before doing the lesson, did you explain in advance the learning media used?
 Answer: Selama online ini saya hanya menggunakan whatsapp, dimana saya rasa semua siswa sudah mampu mengoperasikan aplikasi tersebut. mungkin saya hanya akan menjelaskan terkait dengan materi, penugasan dan lainnya.

6. In applying strategy in teaching English, do you faced any obstacle?

Answer: Selama masa pembelajaran online, saya menghadapi beberapa kendala dalam menerapkan strategi pembelajaran, kendala yang pertama adalah koneksi internet. Dan yang terakhir adalah mengontrol fokus siswa selama proses pembelajaran

7. What is your strategy in asking for feedback on students' understanding of the material presented?

Answer: Untuk mendapatkan feedback, biasanya dengan mengajukan pertanyaan setelah setiap penjelasan materi, seperti ada yang ingin ditanyakan?

8. What are the strategies you use in giving assignments during online class?

Answer: Untuk tugas, setelah diberikan penjelasan terkait materi. Kemudian saya memberikan tugas melalui Whatsapp dan kemudian mengumpulkan hasilnya berdasarkan deadline yang telah disepakati

9. How do you thing the wuality of studentin learning during online class?

Answer: Selama kelas online, pastinya siswa mengalami penurunan terhadap minat belajar mereka. Mereka menjadi lebih pasif selama kegiatan belajar. Mereka juga cepat merasa bosan. Dan tidak mengikuti pelajaran dengan baik

LIST OF INTERVIEW TEACHER

Name : IS

1. How do you prepare before starting learning during online classes?
 Answer: Saya mengirimkan link youtube ke siswa lewat whatsapp grup. Atau biasanya file dokumen tentang materi.
2. What strategies do you use in teaching English during online classes?
 Answer: Strategi yang saya gunakan itu selama mengajar online saya menggunakan whatsapp untuk berkomunikasi dengan siswa. Melakukan kegiatan belajar dengan mengirimkan materi dan juga soal.
3. What strategies do you use in explaining English material during online classes?
 Answer: Dalam menjelaskan materi, saya biasanya membuat video pembelajaran lalu menguploadnya ke youtube. Kemudian saya kirimkan link youtube tersebut ke grup kelas sehingga video tersebut dapat diakses kapan saja oleh siswa.
4. Do you make your own learning media?
 Answer: Ya, saya membuat video pembelajaran untuk siswa.
5. Before doing the lesson, did you explain in advance the learning media used?
 Answer: Sebelum mulai, biasanya saya memberitahu kepada siswa aplikasi apa yang akan dipakai. Tapi dalam pelaksanaannya whatsapp itu yang paling sering digunakan. Jadi ya tidak perlu dijelaskan kembali.
6. In applying strategy in teaching English, do you face any obstacles?
 Answer: Adapun kendala dalam penerapan strategi tersebut, yang pertama adalah pada diri siswa. Selama pembelajaran daring, fokus siswa dalam belajar cukup buruk. Memang ada sebagian siswa yang masih mengikuti kegiatan pembelajaran dengan baik. Tapi, yang tidak fokus ke kelas juga lumayan. Saya pikir karena guru tidak bisa mengontrol siswa secara langsung ketika belajar. Jaringan internet juga menjadi masalah utama. Belajar tidak akan berhasil jika internet macet. Dan juga, studi yang tidak

efektif tepat waktu. Terkadang tertunda, namun terkadang pada awal pembelajaran masih ada siswa yang belum muncul

7. What is your strategy in asking for feedback on students' understanding of the material presented?

Answer: Biasanya setelah menjelaskan materi saya bertanya kepada siswa apakah ada yang kurang jelas? Jika ada, saya akan meminta siswa untuk menanyakannya di grup whatsapp

8. What are the strategies you use in giving assignments during online class?

Answer: Setelah mengirimkan video pembelajaran, saya memberikan pertanyaan terkait materi melalui whatsapp group

9. How do you think the quality of student learning during online class?

Answer: Minat belajar pada siswa menurun. Tapi saya pikir mereka masih mengerti dengan materi yang saya sampaikan selama kelas online. hal itu dibuktikan dengan nilai akhir mereka yang tetap baik

LIST OF INTERVIEW TEACHER

Name : TED

1. How do you prepare before starting learning during online classes?
 Answer: Saya menyiapkan materi sesuai dengan tema yang akan dibahas, biasanya mengirim ke grup whatsapp kira-kira hari ini akan dibahas lks halaman sekian. Begitu
2. What strategies do you use in teaching English during online classes?
 Answer: Strateginya saya memberikan materi kepada siswa, menjelaskan juga, lalu memberikan tugas.
3. What strategies do you use in explaining English material during online classes?
 Answer: Saya menjelaskan materi menggunakan xoom meeting dengan menjelaskan secara langsung terkait dengan materi.
4. Do you make your own learning media?
 Answer: Untuk media pembelajaran, saya menyiapkan sendiri. Berupa video penjelasan, materi ppt, dan juga soal-soal penugasannya.
5. Before doing the lesson, did you explain in advance the learning media used?
 Answer: Sebelum dimulainya kegiatan belajar, saya biasanya menginformasikan kepada siswa, kalau misalnya hari ini akan menggunakan youtube. Saya akan meminta siswa untuk mempelajarinya.
6. In applying strategy in teaching English, do you face any obstacles?
 Answer: Kendala pertama adalah jaringan internet. Bagaimana proses pembelajaran bisa berjalan jika internet susah ya. Jadi ya mereka sering mengeluh susah download materi karena internet lemot. Jadi ya, itulah masalah utama bagi saya. Kedua, fokus siswa dalam belajar saat daring cukup buruk. Mereka lebih fokus pada hal lain. Kemudian, minat siswa dalam belajar cukup menghambat proses pembelajaran. Mereka cenderung hanya mengikuti apa yang terjadi, tanpa memahami penjelasan guru

7. What is your strategy in asking for feedback on students' understanding of the material presented?

Answer: Diakhir pertemuan biasanya saya mereview materi sebelumnya dengan memberikan waktu untuk melakukan tanya jawab dengan siswa. Kadang-kadang memberikan posttest kepada siswa.

8. What are the strategies you use in giving assignments during online class?

Answer: Tugas tergantung pada materi. Kadang-kadang saya mengambil foto soal yang ada di lembar kerja siswa kemudian mengirimkannya ke grup whatsapp. Untuk videonya juga. Karena whatsapp lebih mudah digunakan daripada yang lain

9. . How do you thing the wuality of studentin learning during online class?

Answer: Saya pikir kualitas pemahaman materi pada siswa cukup baik. Yang menjadi perhatian adalah siswa tidak mengikuti pembelajaran dengan maksimal. Mereka terlihat tidak tertarik dalam berpartisipasi selama kelas online.
