**AN ANALYSIS OF ENGLISH COMPOUND WORDS
IN NOVEL ENTITLED “THE DUCHESS” BY DANIELLE STEEL**

ABSTRACT

**By:
DELA SILVIANA PUTRI**

The purpose of this research is to find out the types and the meaning of the compound words found in novel *The Duchess* by Danielle Steel, and also the application in teaching and learning English. This research used the compound word theory proposed by Plag (2003).

This research is a qualitative research. The data of this research are compound words that obtained from the novel *The Duchess* by Danielle Steel. To collect the data, the researcher read the novel in order to find out the compound words, then marked by underlining each compound word found.

The study found 153 data of compound word in the novel *The Duchess* by Danielle Steel. Specifically, based on the type of compound words, there were 104 data of nominal compound, 34 data of adjectival compound, and 11 data of verbal compound. Meanwhile, based on the contextual meaning of compound word, there were 76 data of exocentric compound, 75 data of endocentric compound, and 2 data of copulative compound.

Keywords: *compound words, morphology, novel,*

ANALISIS KATA MAJEMUK BAHASA INGGRIS PADA NOVEL BERJUDUL “THE DUCHESS” KARYA DANIELLE STEEL

ABSTRAK

**Oleh:
DELA SILVIANA PUTRI**

Tujuan penelitian ini adalah untuk mengetahui jenis dan arti dari kata majemuk yang terdapat dalam novel *The Duchess* karya Danielle Steel, serta penerapannya dalam pengajaran dan pembelajaran Bahasa Inggris. Penelitian ini menggunakan teori kata majemuk yang dikemukakan oleh Plag (2003).

Penelitian ini merupakan kualitatif. Data penelitian ini adalah kata majemuk yang diperoleh dari novel *The Duchess* karya Danielle Steel. Untuk mengumpulkan data, peneliti membaca keseluruhan isi novel untuk menemukan kata majemuk, kemudian ditandai dengan menggarisbawahi setiap kata majemuk yang ditemukan.

Pada penelitian ini ditemukan 153 data kata majemuk dalam novel *The Duchess* karya Danielle Steel. Secara khusus, berdasarkan jenis kata majemuk, terdapat 104 data kata majemuk nominal, 34 data kata majemuk sifat, dan 11 data kata majemuk verbal. Sedangkan berdasarkan makna kontekstual kata majemuk, terdapat 76 data kata majemuk eksosentrik, 75 data kata majemuk endosentrik, dan 2 data kata majemuk kopulatif.

Kata kunci: *kata majemuk, morfologi, novel,*

DEDICATION PAGE

I proudly dedicate this undergraduate thesis with sincerity and love to:

Firstly, my beloved parents, Mr. Tri Handoyo and Mrs. Puji Astuti who always support and pray for me with their endless love. My beloved sisters and brothers, Dini Auliana Putri, Diva Firahma Putri, Krisna Wenda Darmawan, M. Nathan Darmawan who always give support and encouragement.

Secondly, all of my dearest friends (Amalia, Anita, Indry, Irfan, Lutfia, Putri, Sylva, Vivi, and Yovi). Thank you so much for always help, support, and give me suggestions in finishing this undergraduate thesis.

ACKNOWLEDGMENT

All praise and gratitude to Allah SWT, who never ceases to shower grace and blessings on His creatures. Sholawat and salutations may always be delivered to our prophet, Muhammad SAW, who has guided his people to the right path in life. The researcher is very grateful to Allah SWT for the opportunity to complete this undergraduate thesis entitled, “AN ANALYSIS OF COMPOUND WORDS IN NOVEL ENTITLED “THE DUCHESS” BY DANIELLE STEEL”. This undergraduated thesis is arranged as a fulfillment of requirement for the degree of Sarjana Pendidikan (S.Pd) in English Education Department of IAIN Metro.

In this opportunity, the researcher would like to express her deepest gratitude especially to:

1. Dr. Hj. Siti Nurjanah, M.Ag, as the Head of IAIN Metro Lampung.
2. Dr. Zuhairi, M.Pd, as the dean of the Tarbiyah and Teacher Training Faculty of IAIN Metro Lampung.
3. Andianto, M.Pd, as the chief of English Education Department of IAIN Metro Lampung.
4. Syahreni Siregar, M.Hum as the advisor, thank you so much for the guidance and support during the process of preparing this undergraduate thesis.
5. All lecturers of the English Education Department of IAIN Metro Lampung who have shared their knowledge to the researcher.

6. All of her friends in English Education Department of IAIN Metro part in support system, thanks for everything in helping the researcher to finish this undergraduate thesis.

The researcher hopes this research will be useful for all the readers. Suggestions and criticism will be accepted in order to improve this undergraduate thesis.

Metro, 5th December 2022
The researcher,

CHAPTER I

INTRODUCTION

A. Background of Study

A language is a tool used by humans to interact or communicate with others. Language can be in the form of body movements or sounds produced by our mouth. Language is indispensable and can't be separated in human daily life. In everyday life, humans use language to convey their thoughts, ideas, and feelings. Each country has its own languages, it can even be further divided into regional languages. So, we need one language that can be used internationally, namely English.

English is the world's most commonly used international communication tool. Therefore, learning English has become a top priority in many countries as a communication tool in the age of globalization. Because the demand for foreign language skills is increasing as science, technology, information, and other fields advance. If a person is fluent in a foreign language, he will be able to communicate more freely with people from other countries. According to the various points of view presented above, learning a foreign language is extremely important for all types of needs and extremely beneficial for understanding between individuals, groups, and nations.

In teaching and learning English, learning media is very important to help students master the language. Many types of media can be used in the teaching and learning process, one of which is literary work. Literature plays an important role in teaching basic language skills such as reading, writing,

listening, and speaking, as well as increasing learners' competence in all of these skills. Furthermore, literature helps students improve their grammar as well as their vocabulary. It introduces students to many of the most common structural and syntactical devices in English. Students learn about various ways of pronouncing sentences, conveying ideas, and expressing emotions. As a result, literature effectively and interestingly develops students' communicative abilities.

Moreover, nowadays, interest in literary work, especially novels, is increasing. This situation can be used in learning English, namely using novel media to improve English skills. In the novel, there are thousands of vocabularies that can certainly improve vocabulary mastery. In addition, novels deal with themes and topics that are intrinsically interesting, because they are part of the human experience designed to attract the reader's attention. Novels can also develop oral and written language skills and present a unique way that encourages students to be involved and interested in the reading process.

However, when reading a novel, there may be some vocabularies that we do not understand. By paying attention to the morphological aspect, namely the formation of words, such as compound words, the reader gains clarity in understanding the meaning of the novel, so that the reader can improve the understanding of the text being read. As Obediat states that literature assists students to be proficient in English like a native speaker, expressing their ideas in proper English, learning the features of modern

English, learning how the English linguistic system is used to communicate, seeing how idiomatic expressions are used, speaking clearly, precisely, and concisely.¹

Morphology is the study of the word structure, how the smallest unit of language called morpheme formed a larger unit called word. Word is an important part of a language that conveys meaning. It is a language unit that can stand alone, it can be a single morpheme or a combination of several morphemes. This combination process is called a word-formation process. The word-formation process or it is also called a morphological process is important because it deals with how words are formed and the meaning of those words. There are many ways to form a new word in the word-formation process.

Compounding is one of the word-formation processes that result from the joining of two or more words to produce a new word. This word-formation process not only produces new words but also produces a new meaning. The new meaning that is formed can be in the form of a meaning that is similar or can be also very different from the original words that formed it. Based on the explanation above, it can be seen that compounding is important related to the phenomenon of forming a word.

Moreover, compound words are very effective at increasing a language's vocabulary. One word can be paired with another to create a new meaning, whether it is a similar meaning or a completely new one. This can

¹ Abdollah Keshavarzi, "Use of Literature in Teaching English" (*Procedia - Social and Behavioral Sciences*, Vol. 46, 2012, 554-559).

explain the role linguistic morphology in teaching and learning English in the classroom. The teacher can use novel as a learning media to create a variety of engaging learning activities, such as finding and analyzing compound words found in novels that can help students improve their English vocabulary mastery. Novels can be utilized as engaging teaching materials for students to learn English compound words. Beside, this research expected to contribute in teaching and learning English as an additional material in teaching Morphology especially the material about Compounding. Furthermore, this research can increase morphological awareness that can help students to familiarize with word formation and with the meaning. The students also tend to have larger vocabulary and better reading comprehension.

Compound words can be found in reading materials such as course books, magazines, newspapers, or novels. In this case, the researcher chooses a novel as the material to be analyzed, it is a novel entitled *The Duchess* written by Danielle Steel. This novel was chosen as the object of the research because this English novel was written by a native speaker, so it can be ascertained that this novel has met the standards of English writing. The vocabulary used in this novel is also very varied so that it can enrich the readers' vocabulary mastery. In addition, the main factor in choosing this novel is that there are many compound words found in this novel. Therefore, this study will be conducted to analyze the types and meanings of compound words because the researcher is interested in knowing more depth about how

a new word is formed, especially through the compounding. Thus, this research is entitled, **AN ANALYSIS OF ENGLISH COMPOUND WORDS IN NOVEL ENTITLED “THE DUCHESS” BY DANIELLE STEEL.**

B. Problem Formulation

Based on the background presented above, the researcher has decided to make formulation of the research question as follows:

1. What are the types of the compound word found in novel The Duchess by Danielle Steel?
2. What is the meaning of the compound word found in novel The Duchess by Danielle Steel?

C. Objective and Benefit of Study

1. Objective

Based on the research question above, the researcher has the objectives of this research as follows:

- a) To find out the types of the compound words found in the novel The Duchess by Danielle Steel.
- b) To know the meaning of the compound words found in the novel The Duchess by Danielle Steel.

2. Benefit of Study

In general, this research would be expected to enlarge the reader's knowledge and understanding about word formation process, especially compound words in the novel "The Duchess by Danielle Steel". Furthermore, the research also expected this research could provide benefits as follow:

a) For the students

Students will develop a better understanding of the meanings of English compound words and enrich their vocabulary mastery. The result of this research also could give some contributions for the English students who want to learn in more depth about the linguistics in the morphology, especially in compound word.

b) For other researchers

The researcher hopes that this research can be an additional reference for other researchers who will conduct similar research on this topic.

D. Prior Research

There are several previous studies that have been carried out related to morphology, especially to the topic of compound word. The first research conducted by Rafli (2019), entitled "*Analysis of Open Compound Words*".² This research conducted to analyze the compound word separated or it is

² Rafli Fadlan Ihsan, "Analysis of the English Open Compound Words" (*Jurnal Ilmiah Pendidikan Scholastic (JIPS)*, Vol.3, No.1, 2019).

called open compound word. The object of this research is Jakarta Post Newspaper. Based on the research, the findings show that compound words can be formed in several ways such as the combination of Noun + Noun, Noun + Verb, Noun + Adverb, Verb + Preposition, Adverb + Adverb, and other ways. Second, the findings show that compounding especially in separate word combination creates a different meaning by combining one word with another word.

Moreover, the other research that analyzed compound words proposed by Gina Lora Yusuf (2017) entitled “*Analysis of The English Closed Compound Words*”.³ This research only focuses on closed compound words, namely compound words that are united or the writing of the words combined found in Jakarta Post. Based on the result, it shows that compound words consist of or combined of Noun + Noun, Noun + Adverb, Noun + Verb, Noun + Preposition, suffix, determiner, pronoun, exclamation, or the other way. Moreover, some compound words have the same meaning as the fundamental term before they are joined, while others have a different meaning after they are combined.

However, there is also the researcher who analyzed the compound word that related to COVID-19 pandemic. This research paper was aimed to describe the formation and the meaning of compound words found in The Jakarta Post’s Health Column Article on Third Week of April 2020. The research was conducted by Felix Stefani Sisvinda (2021) entitled “English

³ Yusuf G, “Analysis of The English Closed Compound Words” (*Jurnal Ilmiah Languae and Parole*, Vol.1, No.1, 2017), 14-23.

Compound Words Used in The Jakarta Post Health Column on Third Week of April 2020”.⁴ The result of this research shows that from 26 total data of compound words, there are 22 data (84.6%) are classified as compound noun, 3 data (11.5%) are classified as compound adjective, and only 1 data (3.90%) classified as compound verb. The most dominant lexical category is from compound nouns which are Noun + Noun and Adjective + Noun.

Based on the previous researches above, the similarity between this research and the three previous researches above is this research will analyze the same object that is compound words. Meanwhile, the distinction of these studies is in the focus of study. The first previous study only focused on analyzing the open compound words, while the second previous study only focused on analyzing the closed compound words and the meaning of compound words, and the third previous study only focused on analyzing the compound words that related to COVID-19 pandemic. Another distinction is that the three previous studies above use news articles as a research media, whereas this study will focus on analyzing all the types and meanings of compound words based on Plag’s theory and will use the novel as a research media. It is a novel entitled *The Duchess* by Danielle Steel.

⁴ Felix Stefani Sisvinda. “English Compound Words Used in The Jakarta Post Health Column on Third Week of April 2020” (*Professional Journal of English Education (PROJECT)*). Vol.4, No. 4, July 2021).

CHAPTER II

THEORETICAL REVIEW

A. The Concept of Morphology

Morphology is one of the sub-fields in linguistics that studies about word formation. The etymology of Morphology is Greek *morph-* which means shape of form and *-ology* which means a subject of study, so Morphology means the study of form as Yule said in his book. The term of Morphology was originally only used in Biology, namely the study of the structure of organisms. However, over time, around the middle of the nineteenth century, the term Morphology also began to be used in the study of language. This Morphology is used to describe the study and analysis of basic elements in language research. These elements are morpheme.⁵ In addition, another definition comes from Lieber, he stated that Morphology is the study of words and word formation.⁶ This includes how new words are coined in the languages and how word forms vary depending on how they're used in sentences.⁷

Furthermore, Aronoff and Fudeman define Morphology as a system involved in word formation or to the branch of linguistics that deals with words, their internal structure, and how they are formed.⁸ The last definition comes from Haspelmath who defines Morphology as the study of the

⁵ George Yule, *The Study of Language 4th Ed* (Cambridge: Cambridge University Press, 2010), 67.

⁶ Rochelle Lieber, *Introducing Morphology* (Cambridge: Cambridge University Press, 2009), 8.

⁷ *Ibid.*, 2.

⁸ Mark Aronoff and Kirsten Fudeman, *What is Morphology? 2nd ed.* (Oxford: Blackwell Publishing, 2011), 2.

combination of morphemes to yield words.⁹ This is the simplest definition and focuses more on how morphemes combine to form a word. Morphology can't be separated from morpheme, which is the smallest unit of language that has meaning and grammatical function that cannot be divided into smaller units. A morpheme can be a word such as *walk* or a meaningful piece of word, such as *-ed* in *walked* or *-ing* in *walking*.

Based on the definitions above, it can be concluded that Morphology is a science that studies words, including the structure of a word and the process of a word formed from elements called morpheme. If the morphemes are combined, there will be affixed word, repeated words, or compound words. For example, the morpheme *cook*. This morpheme can change, which will affect the type and meaning. The *cook* morpheme can change into *cooks*, *cooking*, *cooked*, *cooker*, or *cookbook*.

B. The Concept of Compounding

1. The Definition of Compounding

Compounding is one of the word formation processes in Morphology. According to Plag states that, compounding or sometimes also called as 'composition' is the combination of two words to form a new word. This definition makes two significant assumptions. First, compounds are made up of two (and no more) elements. Second, these elements are words. However, justification is required for these two

⁹ Martin Haspelmath, *Understanding Morphology* (New York: Oxford University Press, 2002), 3.

assumptions. After further study, it was found that not all compound words only consist of two elements, but there are also those that consist of three, four, five or even more members.¹⁰ In addition, the elements that make up a compound word are not only consist of words. Roots or even larger units such as phrases can also be elements in the compounding process. Therefore, based on these facts, Plag modify the definition of compound above to become, “A compound is a word that consists of two elements, the first of which is either a root, a word, or a phrase, and the second of which is either a root or a word”.¹¹

A similar definition is also put forward by Katamba and Stonham that a compound word consist of at least two bases which are both words or roots.¹²

Another definition was put forward by Lieber who said that Compounds are words that are composed of two (or more) bases, roots, or stems. In English, the base used to compose compound words is generally a free base, as in *snowman* which consists of two nouns, namely *snow* and *man*; *greenhouse* which consists of an adjective *green* and a noun *house*.¹³

From the three perspectives, it can be concluded that compounding is a morphological process, namely the formation of new words obtained

¹⁰ Ingo Plag, *Word-formation in English* (Cambridge: Cambridge University Press, 2003), 133.

¹¹ *Ibid.* 135.

¹² Francis Katamba and Stonham, *Modern Linguistics Morphology 2nd edition* (New York: Palgrave Macmillan, 2006), 55.

¹³ Rochelle Lieber, *Introducing Morphology* (Cambridge: Cambridge University Press, 2009), 43.

by combining two or more elements (it can be words, roots, or even phrases) to form a new word with a new meaning.

Here is the example of compound word.

Based on the tree diagram above, the word *break* and *fast* combine to form a compound word, *breakfast*. The word *breakfast* includes **nominal compound**. It consists of the word *break* as a verb and the word *fast* as a noun.

Then, the next example with a more complex analysis is:

From the tree diagram above, it can be seen that the compound word *bedroom* is formed from a combination of two elements, namely *bed* and *room*. This compound word is categorized as nominal compound types because the word *bedroom* occupies a word class as a noun in the sentence. It is formed from the noun and noun form, the word *bed* is a

noun and the word *room* is a noun. The word *bed* means a household piece of furniture that is used to lie down while sleeping. The word *room* has the meaning of a place which is a part of the interior of a building that usually separated by walls. These two words, *bed* and *room* combine and form a new word *bedroom* which means a room used to rest or sleep.

2. The Meaning of Compound Word

From the point of view of its ‘head’, compound word is classified into endocentric, exocentric, and copulative to know the meaning of the compound word.

a. Endocentric Compounds

An endocentric compound is a compound that has a head and the compound’s actual meaning is always the same as the referent of its head.¹⁴ It means that we can know the core meaning of a compound word by looking at the meaning contained of its head. For example, *goldfish*. *Goldfish* has a head, *fish*. So, we can know that *goldfish* is a kind of fish which has a similar color like gold. Another example is *sailboat* which has a head, *boat*. Thus, *sailboat* is a kind of boat used for sailing.

We may determine from these two examples that this type of compound has its semantic head inside the compound word, which is why these compound are known as endocentric compound.

¹⁴ Rochelle Lieber, *Introducing Morphology* (Cambridge: Cambridge University Press, 2009), 48.

b. Exocentric Compounds

A compound can be called exocentric if the compound has no head and the meaning of the compound cannot be determined from the elements in the compound. The fact that no internal element determines the word class of these headless compounds (i.e., they have no internal 'centre') has caused some grammarians to label them exocentric – that is, having a 'centre' outside themselves, figuratively speaking.¹⁵

For example *loudmouth* is neither a kind of mouth nor a loud thing, but it is a kind of person who talk a lot in an unpleasant and offensive way. As well as *a killjoy* is neither a kind of joy nor about a kill thing, but it is a kind of person who purposefully ruins the enjoyments of other people.

c. Copulative Compounds

In addition to endocentric and exocentric compounds, there is another type of compound proposed by Plag, namely copulative compounds. This type of compound doesn't have a head since all of the members of the compounds are equally significant, hence no single member can be designated as a head. For example, *bittersweet*. It cannot be said that *bittersweet* is a kind of bitter or a kind of sweet because both members of the compound are equally

¹⁵ Andrew Carstairs-McCarthy, *An Introduction to English Morphology: Words and Their Structure* (Edinburgh: Edinburgh University Press Ltd., 2002), 65.

essential. Other examples are *singer-songwriter*, *sleepwalk*, *doctor-patient*, etc.

From the examples above, we can see the fact that neither of the two members of the compound word seems to be more important than the other. This can happen because they have two semantic heads and neither of which is subordinate to the other. Since neither member is semantically prominent, but both members contribute equally to the compound's meaning, these compounds have been called copulative compound.¹⁶

3. The Characteristics of Compound Word

a. The Structure of Compound

Compounds have internal structure in the same way that derived words do, and that structure can be represented in the form of word trees.¹⁷

¹⁶ Ingo Plag, *Word-formation in English* (Cambridge: Cambridge University Press, 2003), 146.

¹⁷ Rochelle Lieber, *Introducing Morphology* (Cambridge: Cambridge University Press, 2009), 43.

The structure of English compounds:

$[X\ Y]_Y$

$X = \{\text{root, word, phrase}\}$

$Y = \{\text{root, word}\}$

$_Y = \text{grammatical properties inherited from } Y$

It is a compound template which proves us that compounds are binary and which types of elements can occupy which positions. It also indicates that the right-hand member is the head.

b. The Forms of Compounds

Compound words can be written in three forms, namely open compound, closed compound, and hyphenated compound.

1) Open Compound

The term ‘open compound’ refers to a compound word that is written as two separate words but spoken as one word with its own meaning.¹⁸ Open compound is possibly the most difficult to identify. Open compound appears to be two independent words, but they aren't because they describe the same thing. Here are some examples of open form compound: *real estate*, *high school*, *middle class*, *post office*, etc.

¹⁸ Jimmi, Juniato Sidauruk, “Mastering Compound Word for Teachers and Learners of English” (*Wanastra: Jurnal Bahasa dan Sastra*, Vol. 12, No.1, 2020), 32.

2) Closed Compound

Closed compound is the two words are joined without the use of a hyphen or a space. *Baseball, sailboat, windfall, extraordinary, wildcat, worldwide, Northwest, Railway, and birthday* are some other examples of closed compound words.

3) Hyphenated Compound

Hyphenated compound is the easiest compound word to be identified because it is hyphenated, such as: *check-up, check-in, Asian-American, editor-in-chief, mother-in-law, dry-cleaning, well-being, singer-songwriter, one-half, runner-up, sixteen-years old.*

c. More on the Structure of Compounds: The Notion of Head

The vast majority of compounds are inferred from the fact that the left- hand member alters the right-hand member in some way, such as *to deep-fry* is a verb designating a kind of frying. Thus, we can say that the compound exhibits the so-called modifier head structure. The term “head” refers to the most important component of a complicated linguistic structure. Compound in English have a very significant systematic property in terms of their head: their head

always appears on the right-hand side, the so-called right-hand head rule.¹⁹

In addition, the head in compound words mostly inherits its semantic and syntactic components. The head determines the grammatical category, for example, if the head is a noun, then the compound word will have a grammatical category as a noun (e.g. *gentleman*); if the head is a verb, then the compound word will have a grammatical category as a verb (e.g. *sky-dive*).

Another characteristic of the head of a compound word is that when a multiplication occurs, the multiplication occurs in the head, not in the non-head.

d. Stress of Compound

The stress pattern of compounds differs from that of phrases. This is especially true for nominal compound, hence the discussion of compound stress that follows is limited to nominal compound. Compounds are stressed on the first element, whereas phrases are stressed phrase-finally, that is on the last word as Chomsky and Halle capture a systematic difference between phrase and compound stress. They proposed the so-called nuclear stress rule (phrasal stress is on the last word of the phrase) and the so-called compound stress

¹⁹ Ingo Plag, *Word-formation in English* (Cambridge: Cambridge University Press, 2003), 135.

rule (stress is on the left-hand element of a compound).²⁰

Some of pronunciation teachers summarize the entire concept of compound stress in five rules:

- 1) The stress is on the first element in compounds made up of two nouns, for example, *TYPEwriter*, *SUNrise*, *TEA-cup*, *SUITcase*.
- 2) Stress is placed on the second word in compounds with an adjectival first element and *-ed* at the end, for example, *bad-TEMpered*, *heavy-HANDED*.
- 3) Compounds that contain a number as the first element have a high final stress, for example, *three-WHEELer*, *second-CLASS*, *five-FINGER*.
- 4) Adverbial compounds are typically final-stressed, for example, *head-FIRST*, *north-EAST*, *downSTREAM*.
- 5) Compounds with an adverbial first element that functions as a verb are stressed at the end, for example, *downGRADE*, *ill-TREAT*.²¹

²⁰ Ingo Plag, *Word-formation in English* (Cambridge: Cambridge University Press, 2003), 137.

²¹ Metin Yurtbasi, "Stress Placement on Phrases and Compounds in English" (*International Online Journal of Primary Education*, Vol. 6, No. 2, 2017), 43.

4. The Types of Compound Word

According to Plag, he mentions in his book *Word-Formation in English*, that there are four types of compound word formed from lexical categories, such as nominal compounds, adjectival compounds, verbal compounds, and neoclassical compounds.²²

a. Nominal Compounds

Nominal compounds, also known as compound nouns are made up of two or more nouns that combine to form a single unit. A compound noun is made up of two separate words, words joined by a hyphen, or two words combined. Moreover, a compound noun is a fixed expression composed of two or more words that function as nouns.²³

Compound nouns are the most productive type of compound in English. There are several ways to form nominal compounds. The first process is verb–noun compounds, for example *swimsuit*, *swearword*, and *playboy*. The second process is noun–noun compounds, for example *database*, *suitcase*, and *bar code*. The third process is adjective–noun, for example *blackboard*, *faint heart*, and

²² Ingo Plag, *Word-formation in English* (Cambridge: Cambridge University Press, 2002), 144.

²³ Kassow, H. Nasser, *Compound and Complex Words in English* (University of Zakho, 2013), 10.

bigwig. The forth process is preposition–noun, for example *afterbirth*, *underarm*, and *outpost*.²⁴

b. Adjectival Compounds

A compound adjective is a single adjective that consists of more than one word. To indicate that a compound adjective is a single adjective, the words in the compound adjective are usually separated by hyphens. In an adjectival compound, the non-heads can be nouns or other adjectives. The non-head element can function as a modifier or, given the appropriate adjective head.

Adjectival compounds can be formed in a variety of ways. First, noun–adjective compound, for example *sky-high*, *sugar-free*, and *oil-rich*. The next process is adjective–adjective compound, for example *red-hot*, *grey-green*, and *well-known*. The other process is preposition–adjective compound, for example *overactive*.

c. Verbal Compounds

Verbal compounds are made up of two or more words that combine to form a single verb. Compounding verbs are much less common than affixation verbs. Nevertheless, there are several types that can be distinguished based on their structure. The first process is verb–verb compound, for example *stir-fry* and *freeze-dry*. The second process is called noun–verb compound, for example *sky-dive*

²⁴ Andrew Carstairs-McCarthy, *An Introduction to English Morphology: Words and Their Structure* (Edinburgh: Edinburgh University Press Ltd., 2002), 62.

and *hand-wash*. The next process is adjective–verb compound, for example *whitewash*, *highlight*, and *broadcast*. The forth process is preposition–verb compound, for example *underline*, *overcook*, and *oversleep*.

d. Neoclassical Compounds

Neoclassical compounds consist of lexemes that are originally borrowed from Latin or Greek, but their combinations are of modern origin. Therefore, the combination of the two elements is called neoclassical. An example of a neoclassical compound is *biography*. In Greek, *bio-* has the meaning of *life*. The following are some forms that can be argued to belong to the class of neoclassical forms:²⁵

Table 2.1
The Examples of Neoclassical Compounds

	Form	Meaning	Example
A	<i>astro-</i>	<i>Space</i>	<i>astro-physics, astrology</i>
	<i>biblio-</i>	<i>book</i>	<i>bibliography, bibliotherapy</i>
	<i>bio-</i>	<i>life</i>	<i>biodegradable, biocracy</i>
	<i>electro-</i>	<i>electricity</i>	<i>electro-cardiograph</i>
	<i>geo-</i>	<i>earth</i>	<i>geographic, geology</i>
	<i>hydro-</i>	<i>water</i>	<i>hydro-electric, hydrology</i>

²⁵ Ingo Plag, *Word-formation in English* (Cambridge: Cambridge University Press, 2002), 156.

	<i>morpho-</i>	<i>figure</i>	<i>morphology, morpho-genesis</i>
	<i>philo-</i>	<i>love</i>	<i>philothelist, philo-gastric</i>
	<i>retro-</i>	<i>backwards</i>	<i>retroflex, retro-design</i>
	<i>tele-</i>	<i>distant</i>	<i>television, telepathy</i>
	<i>theo-</i>	<i>god</i>	<i>theocratic, theology</i>
B	<i>-cide</i>	<i>Murder</i>	<i>suicide, genocide</i>
	<i>-cracy</i>	<i>rule</i>	<i>bureaucracy, democracy</i>
	<i>-graphy</i>	<i>write</i>	<i>sonography, bibliography</i>
	<i>-itis</i>	<i>disease</i>	<i>laryngitis, lazyitis</i>
	<i>-logy</i>	<i>science of</i>	<i>astrology, neurology</i>
	<i>-morph</i>	<i>figure</i>	<i>anthropomorph, polymorph</i>
	<i>-phile</i>	<i>love</i>	<i>anglophile, bibliophile</i>
	<i>-phobe</i>	<i>fear</i>	<i>anglophobe, bibliophobe</i>
	<i>-scope</i>	<i>look at</i>	<i>laryngoscope, telescope</i>

C. The Concept of Novel

1. The Definition of Novel

Novel is a literary subgenre which became prominent in the nineteenth century. The term novel refers to a long narrative that is usually an imaginative work of art in the form of prose.²⁶ It is characterized by the action and reaction between the characters, especially between the antagonist and the protagonist.

²⁶ Uche Nnyagu, Adunchezor, Ngozi, "The Novel: Genres, Concepts Introduction and Appreciation" (*SSRG International Journal of Humanities and Social Science (SSRG - IJHSS)* Vol. 4, No. 5, 2017), 78.

The novel contains stories about human life that are fictitious but still rational. The rationale in question is that life events that occur are written in detail and logically so that they make sense for the reader to accept. Novels are popular among literary enthusiasts because, in addition to providing entertainment, they also contain life values that can broaden horizons and be used as a way of life.

2. The Novel “The Duchess”

The novel “The Duchess” was written by Danielle Steel. Danielle Steel has been hailed as one of the world’s most popular authors, with nearly a billion copies of her novels sold. Her recent international bestsellers include *Blue*, *Precious Gifts* and *The Apartment*. She is also the author of *His Bright Light*, the story of her son Nick Traina’s life and death; *A Gift of Hope*, a memoir of her work with the homeless; and the children’s book *Pretty Minnie in Paris* and *Pretty Minnie in Hollywood*.

“The Duchess” was published in 2017 by Delacorte Press in New York. This novel consists of 22 chapters or 352 pages. This novel tells about Angelique Latham who has grown up at magnificent Belgrave Castle under the loving tutelage of her father, the Duke of Westerfield, after the death of her aristocratic French mother. At eighteen, she is her father’s closest, most trusted child, schooled in managing their grand estate. But, when her father dies, her half-brothers brutally turn her out, denying her very existence. Angelique has a keen mind, remarkable

beauty, and an envelope of money her father pressed upon her. To survive, she will need all her resources and one bold stroke of fortune.

CHAPTER III

RESEARCH METHOD

A. The Type and Characteristics of the Research

The researcher used qualitative methods in this study to identify and analyze the types and meanings of language phenomena, specifically compound words found in a novel. Qualitative research is “interpretive” research, in which you make personal assessment to describe and understand a case using language, words, and sentences. The interpretation you give to a transcript, for example, differs from the interpretation given by someone else. This does not indicate that your perception is better or more accurate; rather, it simply indicates that you bring your own point of view to your interpretation.²⁷

The researcher used a qualitative descriptive research approach in this research, with the aim of making a description of the phenomenon being investigated. According to Nassaji, the goal of descriptive research is to describe a phenomenon and its characteristics. This research is more concerned with what rather than how or why something has happened.²⁸ Basically, descriptive research is research that seeks to describe and interpret something, for example situations and conditions with existing relationships, developing opinions, consequences or effects that occur, etc. The data

²⁷ John W. Creswell, *Educational Research: Planning, Conducting, and Evaluating Quantitative and Qualitative Research*. (Boston: Pearson. 2012), 238.

²⁸ Hossein Nassaji, “Qualitative and descriptive research: Data type versus data analysis (*Language Teaching Research*, Vol. 19(2), 2015), 129.

obtained in descriptive research is in the form of words, pictures, and not numbers, as in quantitative research.

B. Data Source

The source of the data is the origin of the information, and it must be obtained from the appropriate source, because otherwise, the data collected will be irrelevant to the problem under study. Qualitative data is data in the form of words, not in the form of numbers. There are two sources of data used in this study, primary data and secondary data. Primary data is a data source that directly provides data to the researcher. Moreover, secondary data is a data source that does not directly provide data to the researcher.²⁹ Secondary data sources are used to support information provided by primary data sources, namely in the form of library materials, literature, books, articles, journals and previous research and internet sites.

In this case, the primary data of this research is a novel entitled “The Duchess” by Danielle Steel which was published by Delacorte Press in 2017. The data are compound words found in the novel. For the purpose of this research, the researcher had analyzed the data from the novel which consists of 22 chapters or 352 pages. In addition, the researcher also used books, dictionaries, and websites on the internet that are related to this case and can help carry out this research as the secondary data.

²⁹ Sugiyono, *Metode Penelitian Kuantitatif, Kualitatif, R&D* (Bandung: Penerbit Alfabeta, 2013), 225.

C. Data Collecting Technique

Data collection is an important step in qualitative research. Data collection technique is the best step determined by the researcher to be used in collecting data in a research. These data were obtained from data sources (subjects and research samples). Qualitative data is obtained through various data collection techniques, such as interviews, document analysis, or observation.

To collect the data in this research, the researcher had used documentation. A valuable source of information in qualitative research can be documents. Documents are records of events that have passed. Documents can be in the form of writing, pictures, or monumental works of someone. Documents in the form of writing such as diaries, life histories, stories, biographies, regulations, policies. Documents in the form of images, for example photos, live images, sketches and others. Documents in the form of works such as works of art, which can be in the form of pictures, sculptures, films, and others.³⁰

The data of this research are compound words that obtained from the novel. To collect the data, the researcher had used two steps. The first step is the researcher read the novel *The Duchess* by Danielle Steel in order to find out the compound words. The second step is the compound words found in the novel are then marked by underlining each compound word found.

³⁰ Sugiyono, *Metode Penelitian Kuantitatif, Kualitatif, R&D* (Bandung: Penerbit Alfabeta, 2013), 240.

D. Data Analysis Technique

Data analysis is the process of finding data collected through interviews, field notes, and documentation. The data is then organized systematically by organizing into categories, splitting into units, compiling it into patterns, deciding which ones are important data and what will be studied, and the last, drawing conclusions that are easily understood by ourselves and others.³¹ The data collected during the research is meaningless if they are not processed, analyzed, and presented carefully and systematically. The ultimate goal of qualitative data analysis is to obtain meaning, generate understandings, concepts and develop new hypotheses or theories.

In conducting this research, the researcher will use the concept given by Miles, Huberman, and Saldana to analyze the data.

1. Data Collection

The first step in conducting this research is data collecting. In this phase, the researcher obtained the data in the form of compound words from a novel entitled “The Duchess” by Danielle Steel as the data source.

2. Data Reduction

Data reduction is defined as the process of determining whether or not a set of data is relevant to the research objectives. At this stage, the data from the field as raw materials is sorted, focused, summarized, simplified, and condensed to make it easier to control so that the data that

³¹ Sugiyono, *Metode Penelitian Kuantitatif, Kualitatif, R&D* (Bandung: Penerbit Alfabeta, 2013), 244.

has been collected can be presented and concluded in the next stage.³² In this phase, the researcher analyzed the data to reduce data that is irrelevant with the compound word theory proposed by Plag.

3. Data Display

Display data is the third phase in this data analysis technique. A display, in general, is an organized, compressed collection of information that allows for conclusion drawing and action. Data display is a collection of information gathered in the field that is sorted and entered into a matrix. Data representations can include various types of matrixes, graphs, networks, and charts.³³ In this phase, the researcher displays the data which are the compound words according to the types and compound words according to the meaning in the form of tables and charts.

4. Conclusions

The final phase of the data analysis process is drawing conclusions or verification, which is interpreted as drawing the meaning of the data that has been displayed as far as the researcher's understanding and interpretation. In this section the researcher expresses the conclusions from the data that has been obtained during the research.³⁴

³² Matthew B. Miles, A. Michael Huberman, Johnny Saldana, *Qualitative Data Analysis: A Methods Sourcebook 3rd Edition* (Los Angeles: SAGE Publications Inc., 2014) 12.

³³ Matthew B. Miles, A. Michael Huberman, Johnny Saldana, *Qualitative Data Analysis: A Methods Sourcebook 3rd Edition* (Los Angeles: SAGE Publications Inc., 2014) 13.

³⁴ *Ibid.*

Furthermore, to understand the types of compound words that is most commonly found in the article. The data is calculated and displayed in a table of percentages using the following formula:

$$P = \frac{F}{N} \times 100\%$$

Note :

P = Percentage

F = Frequency or Number of data

N = Number of total data

CHAPTER IV

RESULTS AND DISCUSSION

A. Results of the Research

In this chapter, the researcher discusses the results from the research that has been conducted. The results of the data collected from the novel entitled “The Duchess” by Danielle Steel.

1. The Types of English Compound Words in Novel *The Duchess*

Based on the first objective of the research, namely to find out the types of compound words, the researcher found the types of compound words in the novel “The Duchess” by Danielle Steel that are appropriate with the compound word theory of Plag. The types of compound words found are as follows:

a. Nominal Compound

1) Noun + Noun

- a) She knew each of their **footmen** and housemaids by name,
.... (p. 10)

From the tree diagram above, it can be seen that the compound word *footmen* is formed from a combination of two lexemes, namely *foot* and *men*. This compound word is

categorized as nominal compound types because the word *footmen* occupies a word class as a noun in the sentence. It is formed through the process Noun + Noun, the word *foot* is a noun (N) and the word *men* is a noun (N).

- b) ..., he turned back toward his **bedroom**, leaning on Angelique and exhausted from the effort. (p. 13)

From the tree diagram above, it can be seen that the compound word *bedroom* is formed from a combination of two lexemes, namely *bed* and *room*. This compound word is categorized as nominal compound types because the word *bedroom* occupies a word class as a noun in the sentence. It is formed through the process Noun + Noun, the word *bed* is a noun (N) and the word *room* is a noun (N).

2) Adjective + Noun

- a) ..., due to arrive shortly, and a **wet nurse**, since Eugenia thought nursing babies was repulsive. (p. 82)

From the tree diagram above, it can be seen that the compound word *wet nurse* is formed from a combination of two lexemes, namely *wet* and *nurse*. This compound word is categorized as nominal compound type because the word *wet nurse* occupies a word class as a noun in the sentence. It is formed through the process Adjective + Noun, the word *wet* is an Adjective (Adj.) and the word *nurse* is a noun (N).

- b) ... trays off the **dumbwaiter** then and set the table

(p. 145)

From the tree diagram above, it can be seen that the compound word *dumbwaiter* is formed from a combination of two lexemes, namely *dumb* and *waiter*. This compound word is categorized as nominal compound type because the word *dumbwaiter* occupies a word class as a noun in the

sentence. It is formed through the process Adjective + Noun, the word *dumb* is an Adjective (Adj.) and the word *waiter* is a noun (N).

3) Preposition + Noun

- a) It seemed like a vast **fortune** to her and was a very handsome sum. (p. 15)

From the tree diagram above, it can be seen that the compound word *fortune* is formed from a combination of two lexemes, namely *for* and *tune*. This compound word is categorized as nominal compound type because the word *fortune* occupies a word class as a noun in the sentence. It is formed through the process Preposition + Noun, the word *for* is a Preposition (P) and the word *tune* is a noun (N).

- b) Willfred said in an **undertone**, looking embarrassed. (p.42)

From the tree diagram above, it can be seen that the compound word *undertone* is formed from a combination of two lexemes, namely *under* and *tone*. This compound word is categorized as nominal compound type because the word *undertone* occupies a word class as a noun in the sentence. It is formed through the process Preposition + Noun, the word *under* is a Preposition (P) and the word *tone* is a noun (N).

4) Adverb + Noun

- a) She could add a bit of lace at the neck for Fabienne for her **outfits** as lady's maid.... (p.183)

From the tree diagram above, it can be seen that the compound word *outfits* is formed from a combination of two lexemes, namely *out* and *fits*. This compound word is categorized as nominal compound type because the word *outfits* occupies a word class as a noun in the sentence. It is formed through the process Adverb + Noun, the word *out* is an Adverb (Adv.) and the word *fits* is a noun (N).

- b) She watched Paris and the **outskirts** slip away as they traveled into the countryside toward the port. (p.260)

From the tree diagram above, it can be seen that the compound word *outskirt* is formed from a combination of two lexemes, namely *out* and *skirts*. This compound word is categorized as nominal compound type because the word *outskirts* occupies a word class as a noun in the sentence. It is formed through the process Adverb + Noun, the word *out* is an Adverb (Adv.) and the word *skirts* is a noun (N).

5) Verb + Noun

- a. Angelique said as they sat down for a minute and sipped their tea, before Bridget made their **breakfast** in the nursery pantry. (p. 51)

From the tree diagram above, it can be seen that the compound word *breakfast* is formed from a combination of two lexemes, namely *break* and *fast*. This compound word is categorized as nominal compound type because the word *breakfast* occupies a word class as a noun in the sentence. It is formed through the process Verb + Noun, the word *break* is a Verb (V) and the word *fast* is a noun (N).

b. Adjectival Compound

1) Adjective + Adjective

- a) She wondered for a moment if he was delirious, but he seemed entirely lucid, and **wide awake**. (p.13)

From the tree diagram above, it can be seen that the compound word *wide awake* is formed from a combination of two lexemes, namely *wide* and *awake*. This compound word is categorized as adjectival compound type because the word *wide awake* occupies a word class as an adjective in the sentence. It is formed through the process Adjective +

Adjective, the word *wide* is an Adjective (Adj.) and the word *awake* is an Adjective (Adj.)

2) Adverb + Adjective

- a) He had been **well aware** too that there were several who would have liked to do so on the ship, (p.274)

From the tree diagram above, it can be seen that the compound word *well aware* is formed from a combination of two lexemes, namely *well* and *aware*. This compound word is categorized as adjectival compound type because the word *well aware* occupies a word class as an adjective in the sentence. It is formed through the process Adverb + Adjective, the word *well* is an Adverb (Adv.) and the word *aware* is an Adjective (Adj.)

3) Noun + Adjective

- a) ..., and
- sky-blue**
- eyes as her mother. (p.6)

From the tree diagram above, it can be seen that the compound word *sky-blue* is formed from a combination of two lexemes, namely *sky* and *blue*. This compound word is categorized as adjectival compound type because the word *sky-blue* occupies a word class as an adjective in the sentence. It is formed through the process Noun + Adjective, the word *sky* is a Noun (N) and the word *blue* is an Adjective (Adj.).

- b) It made her
- homesick**
- , thinking about them, (p.66)

From the tree diagram above, it can be seen that the compound word *homesick* is formed from a combination of two lexemes, namely *home* and *sick*. This compound word is

categorized as adjectival compound type because the word *homesick* occupies a word class as an adjective in the sentence. It is formed through the process Noun + Adjective, the word *home* is a Noun (N) and the word *sick* is an Adjective (Adj.).

c. Verbal Compound

1) Verb + Verb

- a) I **daresay** every man of means and power turns up here at some point, (p.234)

From the tree diagram above, it can be seen that the compound word *daresay* is formed from a combination of two lexemes, namely *dare* and *say*. This compound word is categorized as verbal compound type because the word *daresay* occupies a word class as a verb in the sentence. It is formed through the process Verb + Verb, the word *dare* is a Verb (V) and the word *say* is a Verb (V).

2) Preposition + Verb

- a) She woke with a start several times that night, afraid she'd **oversleep** in the morning. (p.48)

From the tree diagram above, it can be seen that the compound word *oversleep* is formed from a combination of two lexemes, namely *over* and *sleep*. This compound word is categorized as verbal compound type because the word *oversleep* occupies a word class as a verb in the sentence. It is formed through the process Preposition + Verb, the word *over* is a Preposition (P) and the word *sleep* is a Verb (V).

- b) ..., dismissing the nanny, who **withdrew** quietly with a knot of panic in her stomach, (p.121)

From the tree diagram above, it can be seen that the compound word *withdrew* is formed from a combination of

two lexemes, namely *with* and *drew*. This compound word is categorized as verbal compound type because the word *withdrew* occupies a word class as a verb in the sentence. It is formed through the process Preposition + Verb, the word *with* is a Preposition (P) and the word *drew* is a Verb (V).

3) Adjective + Verb

a) She fell into a **deep sleep** , (p.16)

From the tree diagram above, it can be seen that the compound word *deep sleep* is formed from a combination of two lexemes, namely *deep* and *sleep*. This compound word is categorized as verbal compound type because the word *deep sleep* occupies a word class as a verb in the sentence. It is formed through the process Adjective + Verb, the word *deep* is an Adjective (A) and the word *sleep* is a Verb (V).

- b) “Let’s not **whitewash** this, Andrew.” (p.269)

From the tree diagram above, it can be seen that the compound word *whitewash* is formed from a combination of two lexemes, namely *white* and *wash*. This compound word is categorized as verbal compound type because the word *whitewash* occupies a word class as a verb in the sentence. It is formed through the process Adjective + Verb, the word *white* is an Adjective (Adj.) and the word *wash* is a Verb (V).

4) Adverb + Verb

- a) “..., He was so **outraged**. I’ll speak to him tomorrow”.
(p.295)

From the tree diagram above, it can be seen that the compound word *outrage* is formed from a combination of two lexemes, namely *out* and *rage*. This compound word is categorized as verbal compound type because the word

outrage occupies a word class as a verb in the sentence. It is formed through the process Adverb + Verb, the word *out* is an Adverb (Adv.) and the word *rage* is a Verb (V).

2. The Meaning of English Compound Words in Novel *The Duchess*

In this section, the researcher analyzes the meaning of compound words based on the second objective of the research. The meaning of compound words that the researcher discovered in the novel *The Duchess* can be determined in three different ways, which are endocentric compound, exocentric compound, and copulative compound.

a. Endocentric Compound

1) Bedroom

The compound word *bedroom* is formed from a combination of two lexemes, namely *bed* and *room*. The meaning of *bed* is a household piece of furniture that is used to lie down while sleeping. Meanwhile, the meaning of *room* is a place which is a part of the interior of a building that usually separated by walls. These two words combine and form a new word *bedroom* which means a room used to rest or sleep. The meaning of *bedroom* can be identified from the head *room* and considered as an endocentric compound.

2) Fireplace

The compound word *fireplace* is formed from a combination of two lexemes, namely *fire* and *place*. The meaning of *fire* is the flames, light and heat, and often smoke produced by things that are burning. Meanwhile, the meaning of *place* is any particular position, point, building, area, town, or country. These two words combine and form a new word *fireplace* which means a place where a fire can be lit in the area on the wall and floor surrounding the room. The meaning of *fireplace* can be identified from the head *place* and considered as an endocentric compound.

3) Nightshirt

The compound word *nightshirt* is formed from a combination of two lexemes, namely *night* and *shirt*. The meaning of *night* is the part of each day when the sun has set and it is dark outside, it is the time when people usually sleep. Meanwhile, the meaning of *shirt* is a piece of clothing that wear on the upper part of the body. These two words combine and form a new word *nightshirt* which means a long, loose shirt worn in bed when someone is sleeping. The meaning of *nightshirt* can be identified from the head *shirt* and considered as an endocentric compound.

4) Teatime

The compound word *teatime* is formed from a combination of two lexemes, namely *tea* and *time*. The meaning of *tea* is a drink made by pouring boiling water to tea leaves. Meanwhile, the meaning of *time* is what we measure in minutes, hours, days, and years. These two words combine and form a new word *teatime* which means a time during afternoon or early evening when people have the meal called tea or/and sandwiches or cake. The meaning of *teatime* can be identified from the head *time* and considered as an endocentric compound.

5) Moonlight

The compound word *moonlight* is formed from a combination of two lexemes, namely *moon* and *light*. The meaning of *moon* is a round object in the sky at night that moves around the earth. Meanwhile, the meaning of *light* is an energy that emits a brightness which comes from sources such as the sun, moon, and lamps. These two words combine and form a new word *moonlight* which means the light that comes from the moon at night. The meaning of *moonlight* can be identified from the head *light* and considered as an endocentric compound.

b. Exocentric Compound

1) Handsome

The compound word *handsome* is formed from a combination of two lexemes, namely *hand* and *some*. The meaning of *hand* is the part of the body at the end of the arm, including the fingers and the thumb. Meanwhile, the meaning of *some* is the word that used with uncountable nouns or plural countable nouns to mean 'an amount of' or 'a number of'. These two words combine and form a new word *handsome* which means a boy/man who have an attractive appearance or good-looking. The meaning of *handsome* can't be identified from the particular part of the compound word because the head is outside the compound word. Thus, this word considered as an exocentric compound.

2) Breakfast

The compound word *breakfast* is formed from a combination of two lexemes, namely *break* and *fast*. The meaning of *break* is to be damaged and separated into two or more parts, as a result of force. Meanwhile, the meaning of *fast* is happening, moving, or doing something quickly or in a short time. These two words combine and form a new word *breakfast* which means the first meal of the day which usually eaten in the morning. The meaning of *breakfast* can't be identified from the particular part

of the compound word because the head is outside the compound word. Thus, this word considered as an exocentric compound.

3) Dumbwaiter

The compound word *dumbwaiter* is formed from a combination of two lexemes, namely *dumb* and *waiter*. The meaning of *dumb* is someone who slows to learn or understand; lacking intellectual acuity. Meanwhile, the meaning of *waiter* is a man who works in a restaurant to serve customers at their table. These two words combine and form a new word *dumbwaiter* which means a small lift used to carrying food and plates from one floor of a building to another. The meaning of *dumbwaiter* can't be identified from the particular part of the compound word because the head is outside the compound word. Thus, this word considered as an exocentric compound.

4) Breathtaking

The compound word *breathtaking* is formed from a combination of two lexemes, namely *breath* and *taking*. The meaning of *breath* is the process when the air that you take into your lungs and send out again. Meanwhile, the meaning of *taking* is the act of someone who picks up, carry, or move something from one place to another. These two words combine and form a new word *breathtaking* which means extremely beautiful, very exciting or impressive. The meaning of *breathtaking* can't be

identified from the particular part of the compound word because the head is outside the compound word. Thus, this word considered as an exocentric compound.

5) Whitewash

The compound word *whitewash* is formed from a combination of two lexemes, namely *white* and *wash*. The meaning of *white* is kind of color that is having the color of fresh snow or milk. Meanwhile, the meaning of *wash* is to make something/somebody clean using water and usually a substance such as soap or detergent. These two words combine and form a new word *whitewash* which means an attempt to hide or cover up unpleasant facts or truth about something. The meaning of *whitewash* can't be identified from the particular part of the compound word because the head is outside the compound word. Thus, this word considered as an exocentric compound.

c. Copulative Compound

1) Freezing-cold

The compound word *freezing-cold* is formed from a combination of two lexemes, namely *freezing* and *cold*. The meaning of *freezing* is the temperature where it is extremely or uncomfortably cold. Meanwhile, the meaning of *cold* is having a lower than usual temperature. These two words combine and form

a new word *freezing-cold* which means the weather, the temperature in a place that is extremely and unpleasantly freezing and cold. The meaning of *freezing-cold* can be identified from the both part of the compound word because both elements of the compound word can equally contribute to the meaning. Thus, this word considered as a copulative compound.

2) White-blonde

The compound word *white-blonde* is formed from a combination of two lexemes, namely *white* and *blonde*. The meaning of *white* is kind of color that is having the color of fresh snow or milk. Meanwhile, the meaning of *blonde* is the color of hair that is pale gold. These two words combine and form a new word *white-blonde* which means shade of blonde that is have kind of white tones. The meaning of *white-blonde* can be identified from the both part of the compound word because both elements of the compound word can equally contribute to the meaning. Thus, this word considered as a copulative compound.

The researcher found many compound words in this novel which were then classified into the types of compound word based on the first problem formulation and analyzes the meaning of compound words based on the second problem formulation of the research. From the data collected, the researcher find out three types of compound words, which

are nominal compound, adjectival compound, and verbal compound.

Furthermore, the researcher will present the data on the table as follow.

Table 4.1
The Data of Compound Words Found in Novel *The Duchess*

No.	Types of Compound	Compound words
1	Nominal Compound	Groundsmen, heirloom, fairytale, horseback, grandmother, outside, bedside, afternoon, housekeeper, footmen, housemaid, groundskeeper, doorway, downstairs, upstairs, bedroom, bookcase, candlelight, lifetime, fortune, breakfast, fireplace, cupboard, coachmen, girlhood, newspaper, hatbox, outline, armbands, lineage, undertone, tonight, half-day, weekend, head butler, under butler, headmistress, dining hall, nightshirt, nurserymaid, farmhand, motherhood, teatime, dinnertime, oatmeal, goodbye, dumbwaiter, ballroom, showplace, snowman, undernanny, half-sister, grandchildren, baby nurse, wet nurse, bedtime, eyebrow, countryside, nightgowns, heartbeat, daybed, childhood, forehead, gingerbread, grandson, suppertime, houseguest, evening gowns, moonlight, stableboy, groundwork, outfit, underclothes, background, borderline, sunlight, underworld, dressmaker, housewives, underwear, underthings, grandparents, seaside, granddaughter, half-brother, midday, henchmen, hallway, headache, nickname, self-defense, aftermath, farewell, outskirts, well-wisher, stateroom, congressman, dockworkers, landmark, whorehouse, honeymoon, landslide, policemen, grandfather.
2	Adjectival	Handsome, self-centered, white-blonde, sky-blue, good-hearted, stone-faced, book-lined,

	Compound	leather-bound, high-necked, self-important, well-born, hard-hearted, mean-spirited, well-tended, stern-faced, severe-looking, red-headed, lowborn, homesick, freezing-cold, tiresome, viselike, bloodshot, newborn, lifelong, good-looking, well-suited, fearsome, straightforward, coffee-colored, spectacular-looking, light-hearted, highborn, breathtaking, ill-fated, bloodstained, well-aware, old-fashioned.
3	Verbal Compound	Overseen, deep sleep, overlooked, foreclose, oversleep, whitewash, withdrew, daresay, overthrow, settled down, outrage.

Table 4.2
Distribution of Compound Words Found in Novel *The Duchess*

No	Types of Compound Words	Frequency	Percentage
1	Nominal Compound	104	68%
2	Adjectival Compound	38	25%
3	Verbal Compound	11	7%
	Total	153	100%

Based on the table above, it shows that there were three types of compound word found in the novel *The Duchess* by Danielle Steel, namely nominal compound, adjectival compound, and verbal compound. Additionally, the researcher describes the data in the following chart.

Figure 1
*Distribution of Compound Words found in novel *The Duchess**

From the table and the chart above, it shows that there are three types of compound word found in the novel *The Duchess* with the number of compound words found as many as 153 data, which nominal compound is the most dominant type of compound words. It has percentage about 68% with the number of data are 104 compound words. Then, adjectival compound which has percentage about 25% with the number of data are 38 compound words. The last, verbal compound which is the least type of compound word found in this novel. It has percentage of 7% with data as many as 11 compound words.

Meanwhile, to recognize the second problems of this study, the researcher analyzed the meaning of compound words found in novel *The Duchess*. According to Plag, there are three kinds of meaning based on

its head, which are endocentric compound, exocentric compound, and copulative compound.

Table 4.3
The Data of Compound Words Meaning in Novel *The Duchess*

No.	Types of meaning	Compound words
1	Endocentric	Groundsmen, fairytale, horseback, sky-blue, outside, bedside, housekeeper, footmen, housemaid, groundskeeper, policemen, doorway, downstairs, upstairs, bedroom, underwear, whorehouse, candlelight, deep sleep, fireplace, coachmen, dockworkers, well aware, congressman, stateroom, hatbox, outline, armbands, dressmaker, bloodstained, nickname, daresay, undertone, tonight, half-day, settled-down, headache, groundwork, head butler, under butler, dining hall, over sleep, nightshirt, nurserymaid, teatime, dinnertime, oatmeal, ballroom, showplace, undernanny, half-sister, half-brother, henchmen, baby nurse, wet nurse, tiresome, bedtime, nightgown, heartbeat, newborns, gingerbread, suppertime, houseguest, evening gown, seaside, lifetime, moonlight, stableboys, underclothes, borderline, sunlight, midday, daybed, newspaper, coffee-colored.
2	Exocentric	Heirloom, afternoon, bookcase, landmark, hallway, housewives, overseen, handsome, foreclose, fortune, breakfast, cupboard, overlooked, girlhood, fearsome, background, lineage, headmistress, red-headed, farmhand, motherhood, goodbye, dumbwaiter, homesick, snowman, eyebrow, countryside, vise-like, childhood, forehead, withdrew, outfit, landslide, straightforward, underworld, breathtaking, honeymoon, hard-hearted,

		overthrow, whitewash, aftermath, outrage, outskirt, light-hearted, stone-faced, farewell, grandmother, grandchildren, granddaughter, grandparent, grandfather, grandson, well-wisher, weekend, ill-fated, lifelong, underthings, bloodshot, old-fashioned, well-born, lowborn, highborn, self-centered, self-important, mean-spirited, self-defense, high-necked, good-hearted, well-tended, stern-faced, severe-looking, book-lined, leather-bound, good-looking, well-suited, spectacular-looking.
3	Copulative	Freezing-cold, white-blond.

The distribution of compound word meaning in the data can be seen from the table below.

Table 4.4
Distribution of Compound Words Meaning in Novel *The Duchess*

No	Compound Meaning	Frequency	Percentage
1	Endocentric Compounds	75	50%
2	Exocentric Compounds	76	49%
3	Copulative Compounds	2	1%
	Total	153	100%

The table above represents the frequency of the compound word meaning found in the novel *The Duchess*. As the table show, the researcher found three kinds of meaning based on its head, which are endocentric compound, exocentric compound, and copulative compound. Additionally, the researcher describes the data in a chart. It can be seen on the below.

Figure 2
Distribution of Compound Words Meaning found in novel The Duchess

There are 76 data of exocentric compound which are distributed in novel *The Duchess* and it has percentage about 50%. Moreover, it is followed by endocentric compound. There are 75 data of endocentric compound which has percentage about 49%. The last is copulative compound with the number of data is 2 and has percentage about 1%.

B. Discussion

1. The Types of English Compound Words in Novel *The Duchess*

Based on the result of the research above, it shows that there were 153 data found in the novel *The Duchess* by Danielle Steel, it shows that only three of the four types proposed by Plag were found in the novel. The researcher did not find one type of compound word, namely neoclassical compound. Neoclassical compound tend to be rare because they are borrowed the elements from Latin or Greek. Neoclassical

compound are usually found in non-fiction such as science. Besides that, the neoclassical compound was formed in the modern time while this novel has a time setting in the kingdom era in the 18th century.

Meanwhile, three types of compound words are found in this novel, namely nominal compound, adjectival compound, and verbal compound. Nominal compound is a fixed expression composed of two or more words that function as a noun. This compound is the most dominant type of compound word found in the novel entitled *The Duchess* by Danielle Steel. There are five ways to form nominal compounds found in this novel which are Noun + Noun, Adjective + Noun, Preposition + Noun, Adverb + Noun, Verb + Noun.

The second type of compound word is adjectival compound. An adjectival compound is an adjective that consists of more than one word and it is usually separated by hyphen. The researcher found three ways to form adjectival compound in the novel *The Duchess*, which are Adjective + Adjective, Noun + Adjective, Adverb + Adjective.

The last type of compound word is verbal compound. A verbal compound is made up of two or more elements that function as a verb. There are four different ways to form the verbal compound that the researcher found in the novel *The Duchess*, which are Verb + Verb, Preposition + Verb, Adjective + Verb, Adverb + Verb.

2. The Meaning of English Compound Words in Novel *The Duchess*

The meaning of compound words that the researcher discovered in the novel *The Duchess* can be determined in three different ways. First off, the meaning can be related to the word's origin and has the inside head known as an endocentric compound. Second, the meaning is different from the original word and there is no head inside the word known as exocentric compound. Third, both elements of the compound word can equally contribute to the meaning known as copulative compound. As much as 76 data or 50% of compound word has no head inside the word or exocentric compound, 75 data or 49% of compound word has the head inside the word or endocentric compound, and 2 data or 1% of compound word has a meaning derived from the two elements of the word of copulative compound. It shows that the exocentric compound is the most dominant compound. It is also explains how compound words not only produce a new word but also produce a new meaning.

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

The researcher found and analyzed three of the four types of compound word proposed by Plag, which are nominal compound, adjectival compound, and verbal compound. The most dominant type of compound word found in the novel entitled *The Duchess* by Danielle Steel is nominal compound. From a total of 153 compound words found, there are nominal compound (104 data or 68%), adjectival compound (38 data or 25%), and verbal compound (11 data or 7%). In nominal compound, it was found five formations, which are Noun + Noun, Adjective + Noun, Preposition + Noun, Adverb + Noun, and Verb + Noun. In adjectival compound, it was only found three formations, which are Adjective + Adjective, Noun + Adjective, Adverb + Adjective and Adverb + Verb. Meanwhile, in verbal compound, it was found four formations, which are Verb + Verb, Preposition + Verb, Adjective + Verb, and Adverb + Verb.

Furthermore, the researcher analyzed the meaning of compound word. There are three classifications. First, exocentric compound (76 data or 50%) is a compound that the meaning is different from the original word and there is no head inside the word. Second, endocentric compound (75 data or 49%) is a compound word that the meaning can be related to the word's origin and has the inside head known. Third, copulative compound (2 data or 1%) is a

compound which both elements of the compound word can equally contribute to the meaning.

B. Suggestion

After conducting the research and according the result, the researcher would like to recommend some suggestions, as follow:

1. For the students

This study can be used as resource to learn more about Morphology, particularly compound words. The students should study more about compounding since it can help to understand how words are formed or the word formation process, especially in the English Department. Novels can be utilized as a media for students to learn English compound words. So, the student can more easily understand how words are formed through the compounding process.

2. For further researchers

The researcher hopes that the findings of this study will serve as a useful guide for other researchers who are interested in learning more about word formation, especially compound words in novels. However, there are various aspects of word formation that can be studied, such as many things that can be analyzed in word formation such as derivation, back formation, blending, conversion, clipping, acronym, etc. The researcher would also like to suggest the next researchers to analyze

things other than novel. The researchers can utilize a movie, song, newspaper, or article as a media or object to be analyzed.
