## ABSTRACT

### THE USE OF TEXTLESS COMIC MEDIA TO IMPROVE THE RECOUNT TEXT WRITING SKILLS AMONG THE EIGHT GRADE STUDENTS OF SMP N 2 METRO IN THE ACADEMIC YEAR 2018/2019

By: Siti Muhajiroh

The aim of this research was to show that the use of textless comic media can improve the skills of the eight grade students of SMP N 2 Metro to write recount text. The researcher realized that using interesting media in teaching writing can improve students writing skills. This research used quantitative approach in which the writer collects the data in the forms of numbers rather than words or pictures. The researcher realized that using textless comic media can improve the recount text writing skills of the students.

This research was classroom action research it because the research have been conducted to 30 students in the classroom VIIIIF and have two cycles. This research used observation technique and give treatment in every cycle after do the pre-test.

The result of the data analysis showed that there was an improvement in students' ability after they were taught by using textless comic. It could be proven from the improvement of students' mean score from the data as follow: in the pre-test result data the 20% students with the mean score 54,67 who got minimal score  $\geq 70$ . Then, in the post-test 1 the 45% students with the mean score 60,16 who got minimal score  $\geq 70$ . Then, after conducted the cycle 2 the researcher get the result data and it is known that there was improving of the students score. The students who got the minimal score  $\geq 70$  were 21 students or 72% from the 30 students with the mean score 70,33. So, it can be conclude that the use of textless comic media can improve the recount text writing skill among the VIIIIF students of SMP N 2 Metro in the academic year 2018/2019

Key words : *Textless Comic, Recount Text, Writing Skill*

## ABSTRAK

### THE USE OF TEXTLESS COMIC MEDIA TO IMPROVE THE RECOUNT TEXT WRITING SKILLS AMONG THE EIGHT GRADE STUDENTS OF SMP N 2 METRO IN THE ACADEMIC YEAR 2018/2019

Oleh: Siti Muhajiroh

Tujuan dari penelitian ini adalah untuk menunjukkan bahwa penggunaan *textless comic media* dapat meningkatkan kemampuan siswa kelas delapan SMP N 2 Metro dalam menulis teks recount. Penulis menyadari bahwa penggunaan media yang menarik dalam mengajar menulis dapat meningkatkan kemampuan siswa. Penelitian ini menggunakan pendekatan kuantitatif dimana penulis mengumpulkan data dalam bentuk angka daripada kata-kata atau gambar. Penulis mencoba membuktikan apakah penggunaan media *textless comic* dapat meningkatkan kemampuan menulis siswa.

Penelitian ini termasuk dalam Penelitian Tindakan Kelas dimana penelitian ini dilakukan di kelas VIII F dengan siswa berjumlah 30 orang dan memiliki 2 siklus. Penulis menggunakan teknik observasi dan melakukan treatment di setiap siklusnya sesudah melakukan *pre-test*.

Hasil penelitian menunjukkan bahwa ada peningkatan kemampuan siswa dalam menulis setelah diajar menggunakan media *textless comic*. Hal ini dapat dibuktikan dari adanya peningkatan nilai rata-rata siswa dengan data sebagai berikut : dalam siklus 1 kesimpulan pada data *pre-test* diketahui bahwa siswa yang mendapat nilai  $\geq 70$  adalah 20% dengan nilai rata-rata 54,67. Kemudian pada data hasil *post-test* 1 diketahui siswa yang mendapat nilai  $\geq 70$  adalah 45% dengan nilai rata-rata 60,16. Kemudian setelah melaksanakan siklus 2 diketahui bahwa siswa yang mendapat nilai  $\geq 70$  adalah 21 orang atau 72% dari keseluruhan siswa dengan nilai rata-rata 70,33. Jadi dapat disimpulkan bahwa " Penggunaan media *Textless Comic* dapat meningkatkan kemampuan menulis teks recount siswa kelas VIII F SMP N 2 Metro Tahun Ajaran 2018/2019."

# CHAPTER I

## INTRODUCTION

### A. Background of the Study

English is one of the language in the world. Nowadays, English has become an international language that is used by all countries as the first, the second, or the foreign language. In Indonesia, English becomes the first foreign language which has to be taught in school as a compulsory subject.

As we know, English is taught from Junior High School up to University. The primary goal of learning English in school is to develop oral and written communication competence in the four language skills namely listening, speaking, reading and writing. English as communication language has a great role in human activity. The students must be able to master English in order to face the development of science and technology. On the other hand, learning English is expected to help the students in expressing their ideas and feeling to other people logically and acceptably.

According to David Nunan, learning to write is the most difficult skill for all languages, it is regardless the language as the first, second or foreign language.<sup>1</sup> This is true because writing has many crucial components to be analyzed such as content, correct grammar, organization, vocabulary, and good sentences. Therefore, we can conclude that writing is not easy. All those difficulties make learning to write

---

<sup>1</sup> David Nunan, *Discourse Analysis*, (England: Published by Penguin Books Ltd, 1993), p. 35.

becomes a complicated process that combines many interrelated components.

Generally, teaching English has been known that many models used by the teacher in writing activities to enable the learners to face the difficulty. The teacher needs an innovation to teach English. One of the ways is using media. There are media that can be used in teaching English, such as movie, picture, cards, games, comics, song, and so on. Media act as the solution and can improve the student's interest in learning English.

Correspondingly, one of the media that can be used in teaching writing is comic especially textless comic. According to McCloud, comic is some illustrations and other images which are draged in a row in deliberate sequence whose purposes are to convey information and/or to produce an aesthetic reaction of the reader.<sup>2</sup> Furthermore, comic which consist of series of pictures are really appropriate in teaching writing because they provide complete ideas to stimulate students' imagination.

Moreover, the importance of mastery writing skill makes the writing activity to be introduced in Junior High School. Therefore, the students must be taught well in English writing. There are some reasons why teaching writing is important. Firstly, it helps the students to memorize and practice the grammatical structures, correct punctuations, and vocabulary they have been learning. Secondly, the students can express their ideas, feeling, and experiences freely through what they write. The last, students and the readers can bring themselves in the piece of writing.

---

<sup>2</sup> Scott McCloud, *Understanding Comic: The Invisible Art*, (New York: Harper Collins Publisher, 1994), p. 9.

On the other hand, the most important reason that writing is a part of the syllabus in English teaching, so it must be taught by the teacher and must be studied by the students.

Based on the syllabus in the eighth grades students of Junior High School, one of the standard competencies of writing skill in first semester is to express the meaning in the simple functional text and short essay in the form of descriptive and recount to interact with the surrounding environment. Therefore, the researcher intends to improve the students' writing recount text through textless comic.

In this case, the researcher conducted a pre-survey in SMP N 2 Metro. The researcher asked the English teacher not only about the process of teaching and learning activity but also about the students' score of writing recount. Besides that, the researcher asked some of the students to give statement related to their writing skill.

The result of data pre-survey is shown in table below:

The table above represents the students scores related to writing skill. Moreover, the KKM for English subject is about 70. Based on the table above there are many students that got low score.

After doing an observation, the researcher found some problems faced by most of the students in writing recount text, as follows: (1) the student were unable to determine appropriate words and sufficient ideas in order to compose the text, (2) the students used incorrect grammatical sentences, (3) the students were still confused of how they started to write the recount text, and (4) the students lacked interest when they got writing lessons. It can be seen in the writing teaching learning process, the students did not show any enthusiasm.

Dealing with the problem above, the researcher would like to improve the recount text writing skill among the eight grade students of SMP N 2 Metro in the academic year of 2018/2019 with textless comic as a media.

## **B. Focus of the Study**

### **1. Problem Identification**

Regarding to the background of study, the researcher identifies the problems, as follows:

- a. The students have difficulties in generating their ideas in their writing.
- b. The students have difficulties in determining appropriate words.
- c. The students lacked of grammar knowledge.
- d. The students have difficulties in starting the writing recount.
- e. The students lacked of interest to write.

## **2. Problem Limitation**

Based on the problem identified above, the researcher limits this research on the use of textless comic on recount text to improve the students' writing skill at the eighth grades of SMP N 2 Metro.

## **3. Problem Formulation**

Based on the background of the study and problem identification above, the formulated research problem is: "Can textless comic media improve the recount text writing skills among the eight grade students of SMP N 2 Metro in academic year of 2018/2019?"

## **C. Objective and Benefits of the Study**

### **1. Objective of the Study**

Referring to the problem formulation above, the objective of this research is to show that the textless comic media can improve the writing skills among the eight grade students of SMP N 2 Metro.

### **2. Benefits of the Study**

By the study, the researcher expects that this research would give several benefits, both theoretically and practically.

#### **a. Theoretical Benefits**

The result of this research is expected to, as follows :

- 1) Add experience and develop knowledge in teaching English, especially on writing recount text by using textless comics as a teaching media.

- 2) Become a reference for the next researchers whether with the similar or different approach on writing texts.

#### **b. Practical Benefits**

- 1) To the students, they get motivation and interest in writing recount text and get learning experience. Then, it is also expected to improve the students' writing performance.
- 2) To the English teachers, the result of the research will help them to seek more effective media on how to improve their teaching styles (especially in teaching recount text). Then, it also can be used not only to identify students' need and problems but also to give solution.
- 3) To the school, the result of the research will help them to achieve higher quality of education, because of the well-trained teachers and good performance of the students.

#### **D. Prior Research**

To support and prove the originality of this research, the researcher uses some relevant previous studies. There are three previous studies that discuss the teaching writing by using comic.

The first is "Applying Cartoon Series in Teaching Narrative Text", written by Riyana Dewi.<sup>3</sup> The objective of this research is to improve students' writing ability by applying cartoon series in teaching of writing. Cartoon series is considered as a good technique in improving students' writing skill. Cartoon series can motivate the students to learn about the

---

<sup>3</sup> Riyana Dewi, Applying Cartoon Series in Teaching Narrative Text, *Journal*, 9, 2013, p. 108-112

current events and present in a fun way. It can also give the teacher the advantages by using cartoon series in teaching narrative writing. The research design of this study was Classroom Action Research (CAR). It consist of four steps. They were planning, implementing, observing, and reflecting. The procedures of implementing cartoon series in teaching writing were by telling a story to the students and asked them to rewrite it. In the cycle 1, there were six meetings. Each of the meetings was divided into three activities. Based on the result of the observation during the implementation of the procedures for six meetings in cycle 1, it showed that the average percentage of the students' involvement during the writing process achieved 74.4%. the activities of group work and outlining in cycle 1 was not run well. Therefore, the researcher made a modification for the next cycle. In the cycle II, there were four meetings. After the researcher had conducted the research in the cycle II, she found that the students' ability in writing narrative text had increased. Based on the result of the observation, the students' involvement increased from 74.4% up to 77.5%. In addition, based on the result of the students' response to questionnaires, it showed that their motivation in learning narrative writing were high, namely 79.4%. It proved that the use of cartoon series in four-stage strategy and the implementation writing process approach in the cycle II was effective.

Other previous research has been conducted by Victoria Tri Guna entitled "Improving Students's Ability in Writing Narrative Text Through

Textless Comic at SMP N 20 Bandar Lampung”.<sup>4</sup> The objective of this research was to improve the students’ ability in writing narrative text by using textless comic. The method used in this research was a classroom action research. The steps including planning, implementing, observing, and reflecting. Before the researcher conducted steps, he gave test to the students to investigate their writing ability in the preliinary study. The result showed that the students’ average writing score was 56. It meant that the students were not achieved the minimum passing criterion. After conducting the preliminary study, the researcher applied the steps. In the panning steps, the researcher made some preparations before teaching of writing narrative text by using textless comic. In the implementation stage, the researcher started to teach writing to the students as practitioner. Meanwhile, the collaborative teacher observed the students’ progress during the process of teaching and learning narrative text by using textless comic. In the observation stage, the researcher recorded and gathered the data about any aspects and events referring to the criteria of success during teaching and learning process. In the reflection stages, the researcher made two kinds of conclusion, namely the each cycle-based conclusion and the final conclusion. Based on the result, in the first cycle, there were only 23 students of 40 who did not achieve the target. Then, the researcher changed the scenario of planning strategy in teaching narrative writing by using textless comic. In the first cycle, the textless comic was not provided vocabulary with aim to help the students easy in making the draft. Hence

in the second cycle, the researcher provided vocabulary in the picture series. Based on the finding, the result of students' writing achievement in the second cycle was improved. It meant that the use of textless comic in teaching narrative writing was successful.

The last is "The Influence of Using Textless Comics and Make a Match on Students' Writing of Recount Text", written by Solikhatun.<sup>5</sup> The purpose of this study is to find out the effectiveness of using textless comics and make a match in teaching writing of recount text at the tenth grade of SMK N 1 Sayung. The method used in this research was an experimental research. The research was carried out in two classes namely experimental and control class. Based on the research analysis of the data of students score in experimental and control class, it showed that the result of the students' observation was 76.25%, the questionnaire result average percentage was 70.64%. the instrument used in this study was pretest and posttest. It meant that the used of textless comics and make a match in teaching writing of recount text was effective.

These prior research is used by the researcher as a reference in composing and conducting her research. The researcher also can compare the methodology of research and the result between her research and those prior research. The researcher want to prove that textless comic is effective not only in teaching narrative but also to improve students skull to write recount text. This differences between this research with the prior research above is on the textless comic, this research uses Islamic textless comic.

## CHAPTER II

### THEORETICAL REVIEW

This chapter presents some points to be discussed. It is very important because theoretical review is as the basic concept to the research. The theoretical review below present some supporting theoretical description related to the research. The first discussion is the concept of recount text writing skills, the second is the concept of textless comic media, and the last discussion is about using textless comic media to teach recount text writing skills.

#### A. Review of Literature

##### 1. The Concept of Recount Text Writing Skill

###### a. Definition of Recount Text Writing Skill

Before going to the discussion about recount text writing skill, it is important to discuss about writing skills. Marianne Celce-Murcia states that writing is the production of the written what that results in a text but the text must be read and comprehended in order for communication to take place.<sup>1</sup>

In addition, Brown states that written language places a heavier demand on vocabulary use than does speaking.<sup>2</sup> Moreover, writing skills is ability of the writer to show his or her feeling or thought with appropriate language which hopefully the readers understand about his or her minds.

<sup>2</sup> Brown, *Principle of Language Learning and Teaching*,(New Jersey: Prentice-Hall.Inc, 1980), p.342

Writing is commonly about a certain topic in which the writer at first collect data, then elaborate the topic based on a certain idea in order to answer a question, or prove statement, or describe an object, or expose a new truth of certain fact of an abject, or convience the readers to belive or disbelieve a statement, and persuade those readers to take a certain course of action related to the believe or disbelieve.<sup>3</sup>

Furthermore, Thomas explains that writing in its broad sense as distinct from simply putting words on paper has three steps: thinking about it, doing it, and doing it again (and again and again, as often as time will allow and patience will endure).<sup>4</sup> Therefore, writing is a piece of a written text about a topic done by a writer based on the context of language use.

Brown states that written language places a heavier demand on vocabulary use than does speaking.<sup>5</sup> Good writers will learn to take advantage of the richness of the English vocabulary. It can be understood that vocabulary is very important in writing. The more vocabulary that the writer has, the better writing that can produce.

Otherwise, for some English learner, composing ideas to write and using various vocabulary to make the writing product rich and enjoyable is not easy. They often find difficulties in assembling words. Therefore, there are lots of unimportant and boring repetition of words in the writing product because of lack of ideas. By using textless comic,

the researcher wants to see if the process of brainstorming and composing writing will be much more easier and more fun than just writing on a blank paper. Making it fun will boost the students' passion in writing and make writing enjoyable. In conclusion, writing skills is ability of the writer for delivering message or information from the writer to the readers.

A recount recall reconstruct events, experiences and achievements from the past in a logical sequence.<sup>6</sup> A recount has social function. Recount “tell what happened”. The purpose of a social recount is to reconstructs past events in the time order in which they occurred. It involves telling what happened and interpreting or evaluating the experience in some ways.<sup>7</sup> According to Derewianka, the purpose of a recount is to list and describe past experiences by retelling events in the order in which they happened (chronological order). In conclusion, recount text is a piece of text that retells past events, usually in the order in which they happend.

According to Anderson, recount can be personal recount, factual recount, and imaginative:<sup>8</sup>

- 1) Personal recount is retelling activity that the writer has been personally involved in and may be used to build relationship between the writer and the reader, e.g. anecdote, diary, personal letter.

<sup>8</sup> Anderson 2002, p. 48

- 2) Factual recount is reporting the particulars of an incident by reconstructing factual information, e.g. police reconstruction of an accident, news report, historical recount, biographical and autobiographical recount.
- 3) Imaginative recount is applying factual knowledge to an imaginary role in order to interpret a recount events, e.g a day in the life of a Roman slave, an experience fishing.

#### **b. The Features of Recount Text**

Board explains that there are six language features which is used in recount text, they are as follows:<sup>9</sup>

- 1) Using nouns and pronouns (e.g. David, we, his)
- 2) Using action verbs (e.g. went, played, spent)
- 3) Using past tense (e.g. we went for a trip to a zoo)
- 4) Using time conjunction (e.g. and, but, after, finally)
- 5) Using adverb and adverb of phrases (e.g. in my house, slowly)
- 6) Using adjectives (e.g. beautifull, sunny)

#### **c. The Skills to Write Recount Text**

There are some characteristics of a good writing. A text or paragraph may these for to be understood as a visible division of the subject method. In writing a good text or paragraph should have four qualities, e.g. completeness, unity, order, and coherences.

Whenever we think about object systematically, we are compiled to realism, that certain things, come coherence is the clear and orderly

presentation of ideas. Obviously, the ideas closely related with language matter. Usually to measure the student's ability in writing skill teachers give writing test. A good writer must have requirement to result in comprehensible and acceptable piece of writing. Brown purpose the criteria for good writing.<sup>10</sup> They are vocabulary, content (refers to logical development of ideas), organization (introduction, body, and conclusion), syntax, discourse, and mechanic

In brief, the skills to write recount text can be explained from the integration of indicators of good writing and structure and features of recount text, they are as follow:

- 1) Vocabulary (the writers are able to use the appropriate vocabulary)
- 2) Content (the writers are able to generate ideas dealing with story in the past event, the ideas are concrete, relevant to the topic, and thoroughly developed)
- 3) Organization (the writers are able to choose appropriate title and apply the structure of recount text as follow:
  - a. Orientation : the writers are able to write effective introductory, topic is stated, and leads to body, include when the events occurred, who was involved, what happened, and where the activity or events took place, and sometimes what the reason was for the event.

---

<sup>10</sup>Brown, Douglas, *Teaching by Principles An Interactive Approach to Language Pedagogy Second Edition*, (San Fransisco:Longman,2000), p. 356-357.

- b. Series of events: supporting evidence is existed, the writers need to focus on supplying details about the who,what,where and when.
  - c. Re-orientation : the writers are able to rounding off the series of events logically and completely.
- 4) Syntax (the writers are fluency in grammar, correct to use adverbs and adverbial phrases, adjectives, conjunctions, action verb, nouns and pronouns)
  - 5) Mechanic (the writers are able to use the punctuation, capitalization, and spelling correctly).

## **2. The Concept of Textless Comic Media**

### **a. The Definition of Textless Comic Media**

Media, as equipment which is used for assisting educators in learning-teaching process, has several definitions which have been stated by some experts.

The word “media” comes from Latini.e “medòè” (plural) or “medium”(singular) which literally means mediator and introductory. In Oxford dictionary, media is a prime way which help numerous people to get information or entertainment.<sup>11</sup>

According to Van Els et al, instructional media are all aids which can be used by teachers and learners to attain certain educational

---

<sup>11</sup>Hornby, A. S. *Oxford Advanced Learners Dictionary, 7th edition*, (Oxford: Oxford University Press, 2005), p.916.

objectives.<sup>12</sup> Moreover, instructional media can be used in teaching of English, because they can activate and stimulate the students' interest in learning English, and make the acquisition of the result of learning more effective and optimal. However, it must be considered that in the use of instructional media, it is important for the teachers to have certain ability and skill to use media effectively and efficiently.

In conclusion, media in education is components of learning resource which contain instructional material on students environment which can stimulate students to learn.

One of media that can be used in language learning is comic, especially in teaching writing recount text, because comic has similarity or relation to the recount text, both of those contain series of actions for instance. Comic has a lot of definition from the experts.

Furthermore, Edmunds stated comics are part of print in the information society.<sup>13</sup> Comics are a pervasive and influential media form of popular culture. For many years comics were only regarded as recreational reading, but comics become more accepted as a legitimate form of art and literature and they are making their way into classroom.

Scott McCloud stated comic is a book (often shortened to simply comics and sometimes called comic paper or comic magazine) is a

<sup>13</sup> Tracy Edmunds, *Why Should Kids Read Comics?*, (New York: Richard C. Owen Publisher, 2006), p.1.

magazine or book of narrative artwork and (virtually always) dialog and descriptive prose.<sup>14</sup> The style was introduced in 1934.

Furthermore, Brocka states that comics are dynamic combination of visual image and written word of narrative and dialogue.<sup>15</sup> They have just the cohesive and choreographed imagery we need to reach our students. Comic typically appear in three or four square-shape cells, called panels. The panels are arranged in row and are read from left to right (right to left for Japanese manga).

#### **b. The Types of Comic**

There are two categories of comic, namely comic books and comic strips. Comic books are series of pictures, narrative dialogues which are printed in book. Comic strip is series of pictures, narrative dialogues which are printed periodically in every week or monthly in the newspaper and internet, it usually consists of 1 until 6 pages.

Textless comic can include in both of two categories of comic. There are some definitions of textless comic from the experts. Hillman states textless comic is pure comic or picture series that contains very minimal text.<sup>16</sup> It means that textless comic uses more illustration and less text to deliver stories or ideas. Moreover, textless comic, as its name, is usually available without text at all. Having no text does not make textless comic unclear. The illustration is able to represent the

<sup>16</sup>Hillman, J. *Discovering children's literature*. (Englewood Cliffs, NJ: Prentice Hall, 1995), p. 7.

story. Therefore, using textless comic in learning a language will help the students learn how to interpret images by using their own style of writing and diction.

In addition, Lukens as cited in Jalongo states that in a high quality wordless comic book, the picture will tell the story.<sup>17</sup> Textless comic tells a story with its illustration without text. However, it does not mean that a textless comic cannot be changed. People has different interpretation through textless comic that they see and they are free to have their own story about that comic in their head. Therefore, textless comic can be used as a writing media to help English learners brainstorm their ideas. In this case, the researcher wants to see how the English learners develop the story that a textless comic has by their own knowledge and imagination.

One of the example of textless comic book is “Owly” written by Andy Runton. It shows on picture 1. Another example of textless comic strips is show on picture 2.

<sup>17</sup> Lukens, *Critical Hand Book of Children's Literature*,(Newyork:Paper Book Inc,1999), p.167

### c. The Characteristics of Textless Comic Media

According to Hillman, textless comic have some characteristics, they are:<sup>18</sup>

1. Comics can motivate students and make them want to pay attention and take apart.
2. Comics contribute to the context in which the language is being used. They bring the words into the classroom.
3. Comics can cue response to questions or substitution through controlled practice.
4. Comics can stimulate and provide to be referred into conversation, discussion, the language they use and storytelling.

From the points above it can be concluded that textless comic is very useful in learning the English language. Teacher and learners are helped by using this media to achieve the learning goals.

### d. Using Textless Comic Media to Teach Recount Text Writing Skill

According to Edelstein and Pival, there are three steps of writing. Those are pre-writing, writing and re-writing. This steps are use to make the process of writing more effisient. Not only are those, but also this use to make the writing process more effective.<sup>19</sup> There are :

#### 1. Pre-writing

Pre-writing refers to the selecting the general subject, restricting the subject, generating the ideas, and organizing the ideas.

---

<sup>18</sup> Hillman, J. *Discovering children's literature*. (Englewood Cliffs, NJ: Prentice Hall, 1995), p. 25.

<sup>19</sup>Edelstein, M. And Pival, M, *The Commitment*, (New York: Harcourt Broce Jovanovich Publisher, 1988), p. 11

## 2. Writing

In this step, the writer sets the ideas in his/her minds into word, sentences, paragraphs on the papers.

## 3. Re-writing

The writer evaluates his/her writing: they are in part of correcting the content and the form, correcting vocabularies, punctuation, and grammar, and correcting writing error, word duplication, and omission.

Referring the statement above the researcher use those steps consist of pre writing, writing and re writing. Here are the procedures of teaching recount text through textless comic.

### 1. Pre writing

- students are divided in some groups.
- students pay attentions to teacher's explanation about generic structure and how to organize recount text.
- teacher gives textless comic to the students and ask students to imagine the chronological event that occurred on the textless comic to stimulate students in generating ideas.
- students observe the textless comic which is given by the teacher.
- students in group discuss about the topic in the comic they receive.

### 2. Writing

- After discussing, students arrange the main idea of recount text in papers according to the textless comic which they received.

- Students in each group write recount text completely on the whiteboard.
- Each member in every group should give contribution in expressing their ideas and opinion.

### 3. Re-writing

- Teacher guides and help the students to correcting their writing.
- Students are asked to re-write if there is error in grammar, vocabulary, content, mechanic, etc.
- Students follow the reflection from the teacher about teaching learning process that they have done.

The process of writing above is integrated with a procedure if teaching learning process adapted from Paltridge. They are:

1. Building knowledge of the field related to the recount texts and their features (including grammar theory of Past tense, noun, pronoun, etc)
2. Modeling of the recount text and writing recount using textless comic.
3. Joint construction of the text (collaborative writing in group).
4. Independent writing as writing test.<sup>20</sup>

The students is given recount text then the students analyzed the generic structure and language features which is used in the text. After that, the researcher give textless comic and it is followed by a modeling on how to write a recount text based on the story in the textless comic. The students will write a recount text in group by following the procedures in modeling. In writing test, the students will write a recount text individually.

## **B. Action Hypothesis**

Hypothesis is the tentative answer to the problem of the research that theoretically considered possibly or highest the level of his or her truth. It is tentative truth determined by researcher that should be tested and proved.

Based on the framework of theories and assumption, the researcher formulates the action hypothesis “The use of textless comic media can improve the recount text writing skill at the eighth grade students of SMP N 2 Metro in the academic year of 2018/2019.”

## CHAPTER III

### RESEARCH METHODOLOGY

#### **A. Research Setting**

This research would be conducted at SMP N 2 Metro. It is one of Junior High Schools in Metro, which is located at Ki Hajar Dewantara street Kampus 15 A Metro, Lampung. The location, that is far from frenzied of city, supports the teaching learning activity. In the academic year of 2018/2019, SMP N 2 Metro consists of 23 classes has 47 teachers, 666 students, and each class consists of 30 students.

#### **B. Research Subject**

The subject of this research is the students of the eight grade in class VIII F of SMP N 2 Metro. There are 30 students consist of 20 girls and 10 boys. The researcher chooses the eight grade students because the age level of these students supposed to be able to write out the English language as a means of communication. The students of this class are very special, they have big curiosities and the ultimate reason is the students hobbies are reading comic. It is appropriate to the media which is brought by the researcher.

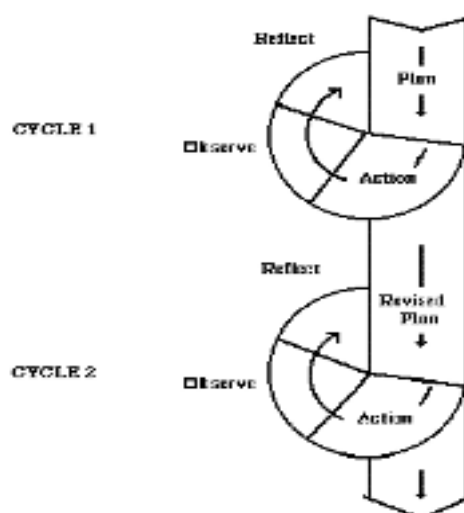

Dealing with English language subject, they have low motivation in learning English. They are lack of produce their knowledge in written form. They can speak it up, but when they are asked to write it down systematically, they found difficulties. They feel hard of arrange and convey their ideas in writing. So, the researcher used textless comic media to improve recount text writing skills of students.

### C. Research Procedure

This research is a type of classroom action research. Action research is a process in which researchers also as a participants examine their own educational practice systematically and carefully using the techniques of research. The purpose of this research is to gain understanding of teaching and learning within one's classroom and to use that knowledge to increase students learning.

The researcher would also as a teacher and the teacher who carries out the use of textless comic as a media in the class. She would become an observer and make sure that the lesson plan of the use of textless comic media can run well in order that the teaching and learning process run effectively. The writer would use classroom action research approach taken from Hopkins.<sup>1</sup>

**Figure 1: Classroom Action Research Concept by Kemmis in Hopkins**

The researcher will carry out an action research with the following steps:

<sup>1</sup> Hopkins, David. *A Teacher's Guide to Classroom Research*. (Philadelphia: Open University Press, 1993), p. 55

### **1. Planning**

In this step, the writer would offer new technique in improving students writing skill. It is the use of textless comic as a learning media. The action is based on the lesson plan applied in the class. Beside that the writer will also prepare materials that is going to be taught in the class, make lesson plans, the form of observation in order that the class can be observed well, teaching aids, test instrument, etc.

### **2. Acting**

This step is the implementation of the use of textless comic as teaching and learning material. The teacher carry out the lesson plan in the classroom step by step. It will describe how the use of textless comic in the class can promote students writing skill.

To obtain the purpose, the teacher had to create the classroom atmosphere as well as possible. In this case, the teachers took roles as a controller of the students' activities and also provide helps when they got difficulties in doing the tasks.

### **3. Observing**

The teacher was actively involved in this step. The teacher was not only the participant in the class but also as the observer. The writer observed the student participation in the class. The students writing skill improvement was observed directly by the writer through observing their active participation in discussion, doing exercise, and test result.

#### 4. Reflecting

After carrying out the teaching and learning activities that was teaching writing using textless comic, the writer recited the occurrences in the classroom as the effect of the action. She evaluated the process and the result of the implementation of textless comic in the class. The evaluation benefits to decide what the writer should do in the next cycle. It was carried out to know the effect of using textless comic in writing class. By analyzing the strength and the weakness of using textless comic, the writer can decide what the next action will be for the continuing improvement.

#### D. Data Collection Technique

In order to collect the data, the writer will use the following techniques:

##### 1. Test

According to Douglas Brown, test is a method of measuring a persons' ability or knowledge in a give domain<sup>2</sup>.

The researcher will use test in form pre-test and post test.

##### a. Pre-test

The pre-test is given in the first meeting before doing treatments in order to know the ability of students to write recount text before doing the action research.

##### b. Post-test

The post-test is given in the last meeting after doing treatments to find out wheter the treatments gave any contribution to the students achievement in the class or not. The improvement can be

---

<sup>2</sup> Douglas Brown, *Teaching by Principles An Interactive Approach to Language Pedagogy*, Second Edition, (San Fransisco: Pearson ESL, 2001), p.384.

seen if the average score of the post-test is higher than pre-test. This step was done after the treatment to know the influence by using textless comic as a media in teaching writing especially recount text.

## **2. Observation**

According to Seltiz, observation can be defined as election, modification, registration, and coding behavior circumstance which is connected with organism based on the empiric purpose<sup>3</sup>.

In this research used observation sheet to observe the students activities. The purpose of the observation si to explain the situation being investigated; activities, people or individuals are involved in data collecting strategy in which the activities of subjects are visually examined. The researcher guide the collaborator to observe the students in VIIIF of SMP N 2 Metro in the academic year of 2018/2019.

## **3. Documentation**

The researcher would use the documentation technique to collect the data about history of the school, the total number of the teacher and official employers, the organization structure, the facilities of the school, pictures of learning activities in classroom of VIIIF SMP N 2 Metro in the academic year 2018/2019.

## **4. Field Note**

To collect the data more accurately, the researcher will use the field note; it will make the data analyzer simpler. In many professions, it is a manner of good practice to make “field note” while actually engaging in

---

3 Claire Selltiz, *Research Methods in Social Relations*, (Cambridge University, 1986), p.125

professionals.<sup>4</sup> Field note is various observations on aspects of learning, the classroom atmosphere, classroom management, teacher interaction with students, student interaction with students and some other aspects.

### **E. Research Instrument**

Gery Anderson defines “an instrument includes test and questionnaire, observations schedules and any other tool used to collect data.”<sup>5</sup> Therefore, instrument is an important device for collecting data in a research. Usually, a test is used as the instrument to measure the students` achievement in education.

In this research, the researcher will use written test as an instrument to collect the data. There are three written tests conducted. The first is pre-test of writing that is conducted to know the preliminary data about students` writing ability. The second is written post-test in cycle 1 that is administered in order to know the achievement of the students in writing recount text. The last written post-test of cycle 2 is conducted to know the final result after implementing textless comic as a media to teach writing in the classroom. Students are asked to write the recount text based to the textless given. They will use their own idea and imagination in all of tests. Here is the table about the standardization of measurement of English writing skill which has been adapted from Jacob (et.al) with analytical scoring, as follows: <sup>6</sup>

**The Standardization Assessment of English Writing Skill**

<b>Competences</b>	<b>Scores</b>	<b>Levels</b>	<b>Standardization</b>
Content	30-27	Excellent	a. Essay addresses the certain topic; the ideas are concrete and throughly developed; no irrelevant material; essay reflect thoughts.
	26-22	Good	b. Essay addresses the issues but misses some points; ideas could be more fully developed; some irrelevant materials are present.
	21-17	Fair	c. Development of ideas is not complete; paragraphs are not divided exactly right.
	16-13	Poor	d. Ideas incomplete; essay does not reflect careful thinking or was hurriedly written; less enough effort in area of content.
Organization (introduction, body, conclusion)	20-18	Excellent	a. Appropriate title, effective introductory, topic is stated, leads to body; transitional expression used; supporting evidence is existed; conclusion logical and complete.
	17-14	Good	b. Enough title; introduction, body and conclusion is acceptable; but lack of evidence and the idea not developed well; sequence is logical but transitional expression is missed.
	13-10	Fair	c. Less of introduction and conclusion; problems with the ideas of the body; not supported evidence.
	9-7	Poor	d. Minimally introduction; fully problems of ideas and organization; no evidence and illogical conclusion.
Vocabulary	20-18	Excellent	a. Appropriate vocabulary usage use of parallel structure; brief.
	17-14	Good	b. Good vocabulary and not wordy.
	13-10	Fair	c. Some of vocabulary missed and too wordy.
	9-7	Poor	d. Problems in vocabulary and lack of variety structure.

Grammar/ Language use	25-22	Excellent	a. Fluency grammar; correct of clauses, preposition, articles, verb forms, modals, tense sequencing.
	21-18	Good	b. Advanced in grammar although the reader aware of them.
	17-11	Fair	c. The readers get the ideas but the grammars are in the problem.
	10-5	Poor	d. Much problems of grammar appears so as to make the reader difficult to read.
Mechanical consideration (punctuation and spelling)	5	Excellent	a. No errors of spelling and correct punctuation usage.
	4	Good	b. Some problems of punctuation and error spelling.
	3	Fair	c. Spelling problems disturb the reader and punctuation errors disturb the ideas.
	2	Poor	d. Serious problems of punctuation in sentence and spelling.

### F. Data Analysis Technique

In analyzing the quantitative data, the researcher used descriptive statistic. The data would be conducted by taking average score of the pre-test and post-test. To know students achievement after the actions, the researcher would conduct and give test at the early cycle and the last cycle. Then, the researcher would tabulate the result of the test and find the average score of pre-test and post-test of each cycle. According to Burns the formula of the average of the test can be calculate as follow:

$$M = \frac{\Sigma x}{N}$$

Note : M : the average score

$\Sigma x$  : total of the score every cycle

N : total of students that follow the test

The researcher get score from the two cycle conducted in the research. Mean of score from first cycle will be compared with mean of score from second cycle. It is to know how far the progress of students in this research.

### **G. Indicator of Success**

This research will take the indicator of success to know improving the students' writing skill using textless comic in English learning. The indicator of success of the improvement of the students' performance in writing recount text are:

1. The students can achieve the passing grade (KKM) of the writing test of 70.
2. At least 70% of students in the class have passed the minimum mastery criteria of writing skill.
3. The students' participation during teaching and learning process at least 70% of students in the class active in doing the class.

## CHAPTER IV

### RESEARCH FINDINGS AND DISCUSSIONS

This chapter describes the results of the research based on the actions that were implemented by the researcher in the class.

#### **A. Research Findings**

##### **1. Description of Research Setting**

###### **a. A Brief History of the Establishment of SMP Negeri 2 Metro**

SMP Negeri 2 Metro was originally a filial school from SMP Negeri 1 Metro which became a diffed state school with the Decree of the Minister of Education and Culture of the Republic of Indonesia Number: 0364/O/1977, dated August 25<sup>th</sup> 1977. This school is one of the excellent schools of Metro. Geographically SMP Negeri 2 Metro is located on the border with East Lampung Regency. Such conditions provide opportunities for elementary school graduates to compete to become students of SMP Negeri 2 Metro.

Demographically, the livelihood of the parents / guardians of students is very heterogeneous, such as profession as civil servant / civil servant, private employee, entrepreneur, farmer, trader, laborer, becak driver, and other unskilled laborers. This has implications for income levels that bring a diversity of their socio-economic level. The socio-economic condition of the community had an impact on supporting parents towards school programs, let alone the local government for free education. Meanwhile, the local government has not responded to the education budget of 20% of

APBN and APBD I and APBD II, so many schools that cannot develop as expected.

In 2007 SMP Negeri 2 Metro was verified to be the organizer of National Standard School Stubs (SSN) based on the Decree of Director of Junior High School Development, Directorate General of National Education Management Number: 818a / C3 / KEP / 2007, April 24th, 2007, it provides motivation and spirit new for all school citizens to be more active in improving quality, learning innovation, and school achievement.

Since becoming an SSN provider, SMP Negeri 2 Metro has implemented a school program emphasis on the fulfillment of eight standards as mandated by Government Regulation Number 19 Year 2005 on National Education Standards (SNP), both content standards, processes, competencies of graduates, educators and personnel education, management, infrastructure, financing, and assessment standards.

## 2. Description of Research Data

This research use action research approach. That has purpose to increase the activity and the study result of students at SMP N 2 Metro conducted in 2 cycles. The first cycle consists of three meetings and the second cycle consists of two meetings. Each cycle consists of planning, actions, observation and reflection. The students test result was gotten through the test that was given to the students in the begining research and the end in every cycle, while the activity data was gotten from the observation in learning activity was happened. The findings can be explained as follows.

### a. The Condition Subject of Study

The condition was find after the researcher give the pre-test to the students that was conducted on Tuesday, January 15<sup>th</sup>. This meeting used as the pre-test before the students was given action. This meeting was started by praying, greeting, checking the attendance list, and asking the

students' condition. The kind of test was writing a story about school holiday in 3 paragraphs. The researcher correct the result of the assignment. The result of this meeting was most of the students got difficulty to write a story, because from 30 students only 6 students could passed of this test.

From the pre-test data above, the researcher found some problems as follow :

- 1) The students could not develop the idea in writing.
- 2) The students could not construct the paragraph into coherently and cohesively
- 3) Grammatical errors occurred in writing.
- 4) The teacher did not provide interesting media to the students.
- 5) The teacher was used a course book in teaching writing.
- 6) The media was not sufficient.
- 7) The class seemed very noisy.
- 8) The students looked not enthusiastic to write a text.
- 9) Students have no clear explanation about the materials.

**b. Cycle 1**

**1) Planning**

In this stage, the researcher and the collaborator prepared several things related to teaching and learning process such as: preparing the lesson plann, preparing the material, preparing textless comic media, making the items that will be examined as the pre-test and post-test 1 in the cycle 1.

**2) Action**

The action in the cycle 1 consist of three meetings, first and second meeting for the action, and third meeting for the post-test 1. There were as follow:

**a. The first meeting**

The first meeting was used as the implementation of the action in the cycle 1. The second meeting was conduct on thursday, January 17<sup>th</sup>, for 2 x 45 minutes. The objective in this meeting was to give the students clear understanding about a recount text by giving examples of a recount text related to the textless comic. The activities in this meeting were :

1. The meeting was started by praying, greeting, checking the attendance list, and asking the students condition.
2. The teacher gave some questions to build students' background knowledge and gave modeling of the text by showing the textless comic and recount texts to the students and discussed the content of the text.
3. Students got the explanation about the generic structure of a recount text, language features; simple past tense and words showing order.
4. In the practice, the teacher implemented the procedures of the use of textless comic media to teach recount text as follows :
  - a. Pre writing
    - students pay attentions to teacher's explanation about generic structure and how to organize recount text.
    - teacher give textless comic to the students and ask students to imagine the chronological event that occurred on the textless comic to stimulate students in generating ideas.
    - students observe the textless comic which is given by the teacher.
  - b. Writing
    - After discussing, students arrange the main idea of recount text in papers according to the textless comic which they received.
  - c. Re-writing
    - Teacher guide and help the students to correcting their writing.

**b. The second meeting**

The second meeting was used as the implementation of the action in the cycle 1. The second meeting was conduct on Monday, January

21<sup>st</sup>, for 2 x 45 minutes. The objective in this meeting was to give the students clear understanding about a recount text by giving examples of a recount text related to the textless comic. The activities in this meeting were :

1. The meeting was started by praying, greeting, checking the attendance list, and asking the students condition.
2. The teacher gave some questions to build students' background knowledge and gave modeling of the text by showing the textless comic and recount texts to the students and discussed the content of the text.
3. Students got the explanation about the generic structure of a recount text, language features; simple past tense and words showing order.
4. In the practice, the teacher implemented the procedures of the use of textless comic media to teach recount text as follows :
  - a. Pre writing
    - students are divided in some groups.
    - students pay attentions to teacher's explanation about generic structure and how to organize recount text.
    - teacher give textless comic to the students and ask students to imagine the chronological event that occurred on the textless comic to stimulate students in generating ideas.
    - students observe the textless comic which is given by the teacher.
    - students in group discuss about the topic in the comic they receive.
  - b. Writing
    - After discussing, students arrange the main idea of recount text in papers according to the textless comic which they received.
    - Students in each group write recount text completely on the whiteboard.

- Each member in every group should give contribution in expressing their ideas and opinion.

c. Re-writing

- Teacher guide and help the students to correcting their writing.
- Students are asked to re-write if there is error in grammar, vocabulary, content, mechanic, etc.
- Students follow the reflection from the teacher about teaching learning process that they have done.

c. **The third meeting**

The third meeting was conducted on Wednesday, January 23<sup>rd</sup>, for 2 x 45 minutes. this meeting used to get the data of post-test 1. This meeting was started by praying, greeting, checking the attendance list, and asking the students condition. In this meeting, researcher designed two activities because one of the two activities took a long time to produce it. First, the teacher explained more about past tense. Then, the researcher gave post test to the students. The students had to produce a story about recount text based on the textless comic. In this section, the students had to work individually using procedure pre-writing, writing and re-writing and they have to submit it in that day. In the post-test 1, only 14 students who got an appropriate score ( $\geq 70$ ), but the result of the students test was better than the students' test before giving treatment.

### 3) Observation

The observation of the students activity was conducted when the teaching and learning process. This observation was conducted with the collaborator by using observation sheet.

1. The student pays attention to the teacher explanation.
2. The student asks question to the teacher.
3. The student answers the teacher's question.
4. The student uses dictionary when writing the recount text.
5. The student does the task.

#### 4) Reflection

In the end of cycle 1, the researcher and collaborator did reflection together. The researcher found that some of indicators had not been achieved,

such as language features. However, the students' development of ideas in writing is improved. They seemed as if they did not have any difficulty in developing ideas when the teacher used textless comic to create a recount text. The researcher found that the students' writing still had inappropriate word choice and grammatical errors. Some students did not bring the dictionary.

The reflection result can be inferred as follow:

1. The researcher should be more assertive and paying more attention in order that the students can pay attention to the teacher when explaining the material.
2. The researcher should give more attention to the students were less responsive.
3. The researcher should give more interesting comic in order to increase the students motivation to write.
4. The researcher should in around to monitor one by one of the students.

Therefore, the researcher needed to continue the second cycle. The researcher and the teacher decided to conduct the Cycle 2 because the students still made mistakes in terms of language feature and diction.

In conclusion, the first cycle did not successfully achieve the learning indicators. Then, researcher planned to conduct the second cycle and observation to improve the students' writing skill of recount text by using textless comic.

### c. Cycle 2

#### 1) Planning

Based on the observation and reflection in cycle 1, the researcher tried to arrange the planning for cycle 2. In the second cycle, the

researcher planned to have two meetings. These meeting was planned to improve the students' writing skills by improving the materials of recount texts and more interesting textless comic. The researcher made the planning as follow: preparing the lesson plan, preparing the material, and preparing the observation sheet of the students activity.

Based on the reflection in the first meeting, the researcher found that there were a few of problems and they should be solved. The problems were the students' difficulty to use the right language features and grammar when writing. In addition, the researcher took a role as a teacher and they had a partner as a collabolator and an observer in this research. The researcher chose a partner as a collabolator and an observer in this cycle because the teacher could not come to the school.

## 2) Action

The action in the cycle 2 consist of two meetings. One meeting for the action, and one meeting for the post-test 2. They were as follow:

### a) The first meeting

The first meeting was conducted on Tuesday, February 5<sup>th</sup>, 2019. The class started at 08.30 am. The researcher started the class by greeting and checking the students' attendance. Then, the researcher told the purpose of the meeting to the students.

In the practice, the teacher implemented the procedures of the use of textless comic media to teach recount text as follows :

#### a. Pre-writing

- The teacher gave textless comic to the students
- The teacher asked the students what it is they are going to write based on the pictures of textless comic
- The teacher asked the students the purpose of their writing
- The teacher suggested the students to imagine the chronological events that happened on the textless comic.

b. Writing

- After the students could generating ideas to write, the teacher asked the students to write recount text into 3 paragraphs completely based on textless comic.

c. Re-writing

- The teacher guided the students to evaluate his/her writing by give comments and suggestion. Perhaps the order of the information is not clear, the students may use a different form of words or vocabularies for a particuar sentences, or on the detailed features such as grammatical accuracy and punctuation.
- The students re-write they final result of their writing that has been evaluated.
- The students collect their paper to the teacher.

The researcher asked one of the students in the class to help her. He was asked to help her to attach the textless comic and the text on the board. Then, the teacher asked for the students' attention. She discussed the material with the students. The students paid their attention when the researcher explained about the generic structure and the language feature of a recount text attached on the board. The teacher gave a chance for the students to ask the question about the explanation before. Then, students was given chance to ask questions. The teacher answered clearly. After that, the researcher asked the students to make groups of five or six. Then, there were five groups in the class. Each group had to choose a friend as a leader of the group. Then, the leader of each group came in front of the class to draw of a lottery to choose the textless comic. The textless comic divided based on the generic structure of recount text. After that, they discussed and wrote a story based on the textless comic that they choosen.

Then, the researcher walked around and checked the students' discussion. Students seemed enthusiastic in the discussion. In addition, they were aware to use the dictionary during writing a story. Almost groups asked the teacher to help them when they met a problem in writing. Next, the leader of each group wrote a story in the board. The researcher discussed with the students about the story written by each leader. She discussed the language features in the story written by the students.

In this meeting, the condition of the class was more effective than before. In the end of meeting, the teacher summarized the lesson, gave motivation and stimulate the students to practice writing skill at home. Then, the researcher closed the lesson by saying good bye to the students.

**b) The second meeting**

The second meeting was conducted on Monday, February 11<sup>st</sup>, this meeting used to get the data of post-test 2 in the end of cycle 2. For 2 x 45 minutes after the students is given the action, the researcher gave post-test to the students. In this meeting, most of the students could write the recount text well. It can be seen from the result of post-test 2. There were 21 students got an appropriate score.

2. The student asks question to the teacher.
3. The student answers the teacher's question.
4. The student uses dictionary when writing the recount text.
5. The student does the task.

#### 4) Reflection

From the result of the post-test in the second cycle, it can be concluded that students' writing skill is improved, because it is more than 70% students got minimal score 70. Their result was satisfactory because the textless comic helped the students to develop their idea and their ability in writing. It could be seen from several aspects when the researcher conducted the second cycle. First, they can develop their ideas to make a story. From the students' writing, it can be seen that textless comic helped them in writing. The second aspect is the students' writing ability in construct paragraph coherently and cohesively improved. It could

be seen in the result of their writing. The third aspect is the students were very enthusiastic in teaching and learning process and they showed positive attitude to the activities that were conducted by the researcher. Besides that, there were some students who were active and often asked the questions when they found some difficulties in writing.

In conclusion, the use of textless comic could improve students' writing skills of a recount text in terms of developing ideas. In addition, their writing ability was improved in the aspect of language feature. Then, the students' attitude towards teaching was positive and they could construct the paragraph coherently and cohesively. Therefore, the researcher took a decision to stop in this cycle.

## 2. Analysis of the result

### a. The result of students pre-test

To know the students writing skill before implementing the treatment, the researcher conducted the pre-test. It was done on Tuesday, January 15<sup>th</sup>. The researcher got result of pre-test, in this test most of the students difficult to write. Language feature, grammar, vocabulary, generic structure and mechanic of students work was still error. Based on table 4 the students average were 54,67. It shows that most of the students were not passed yet to achieved the minimum mastery score (70). In this stage, only 6 students (20%) from 30 students were passed of the minimum mastery score.

### b. The result of students post-test 1

To see the students writing skill after implementing the treatment, the researcher conducted the post-test 1. It was done on Wednesday, January 23<sup>rd</sup>. Based on table 5 the students average

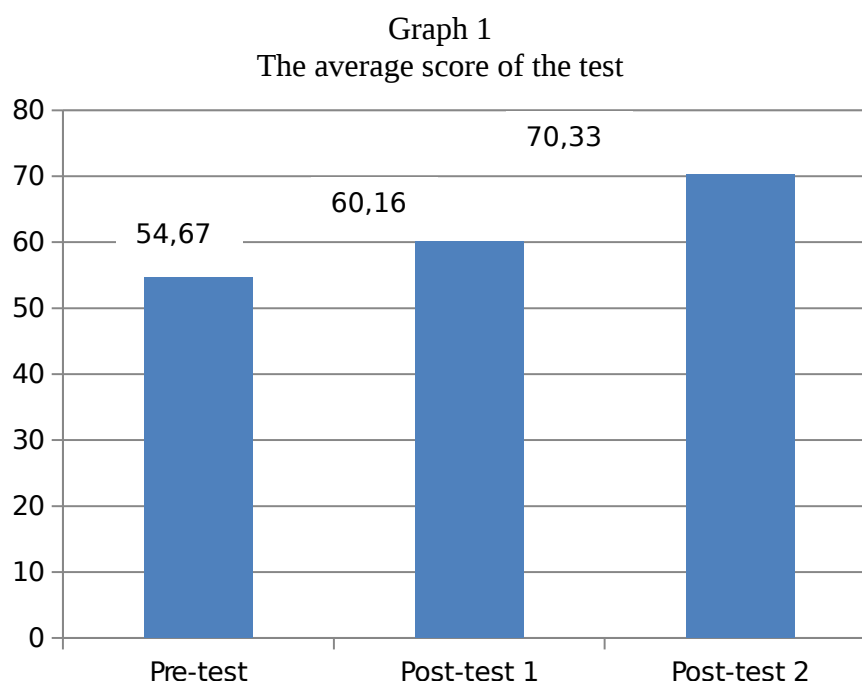

score was 60,16, it shown that most of the students were not passed yet to achieve the minimum mastery score (70). In this stage, only 14 students (45%) from 30 students were passed of the minimum mastery score. It meant that most of the students were not understand yet about the material.

**c. The result of students post-test 2**

To see the students writing skill after implementing the second treatment, the researcher conducted the post-test 2. It was done on Monday, February 11<sup>st</sup>. Based on table 7 the students average score was 70,33, it shown that most of the students passed the minimum mastery score (70). In this stage, 21 students (72%) from 30 students were passed of the minimum mastery score. It meant that most of the students were achieved the material.

According to the indicator of success which has been set in this research is considered success the 70% of the students get minimal score 70. While from the result data of the cycle 1 is known that there are increasing of the students score in the pre-test and post-test 1. In the pre-test result data the students who got minimal score  $\geq 70$  were 6 students or 20% from 30 students. Then, in the post-test 1 the students who got minimal score  $\geq 70$  were 14 students or 45% from 30 students. The increment of the students score in cycle 1 can not reach the indicator of success. Then, after conducted the cycle 2 the researcher get the result data and it was known that there were increasing of the students score. The students who got the minimal score  $\geq 70$  were 21 students or 72% from 30 students. It meant that the indicator of success

achieved in cycle 2. Therefore, this research is considered success until cycle 2. Based on table 9 above, it described in the graph 1 as follow:

Based on the table and graph above, in the cycle 1 from the pre-test to the post-test have progress average score from 54,67 to 60,16, there was improvement about 5,49 point. Then from cycle 1 to the cycle 2 have progress average score from 60,16 to 70,33 there is improvement about 10,17 point. The improvement of score was caused by using textless comic as a media to teach recount text writing skill. Therefore, it can be conclude that textless comic media can increase the students writing skill especially in write recount text.

### 3. Observation result of students' activity

This observation result was gotten when the learning process happened by collaborator. From the table 4 and table 6 the result of the students activity observation can be seen in this table below:

Based on the table above, it can be inferred that the students learning activity was happened increasing from the cycle 1 to the cycle 2. Therefore, this research is use for the students activity side to reach the target. It was caused on the learning in the cycle 2 the students have begun to responsible to themselves, so that it can bring the good effect to increase the students score and create positif atmosphere in learning process. The improvement of the students activities during the teaching

learning process is because the teacher used textless comic as a media to teach recount text writing skill.

## **CHAPTER V**

### **CONCLUSIONS AND SUGGESTIONS**

This chapter presents the conclusions and suggestions of the research. The further explanation of each part will be described as follows.

#### **A. Conclusions**

The conclusion found on the discussion in the previous chapter is that textless comic media can be used to improve the recount text writing skill. The improvement could be seen through some points. The first point is the improvement of their skill in developing ideas. The second point is that the students' improvement can be clearly seen from the mean score of the pre-test, the post-test 1 and post-test 2 . In the pre-test, the students mean score is 54.67, in the post-test 1 the mean value is 60.16, while in the post-test 2 the mean value is 70.33.

#### **B. Suggestions**

After conducting the research, the researcher proposes suggestions for the English teacher, and other researchers as presented below.

##### **1. For English teachers**

Teachers are suggested to choose an appropriate technique which improve the students' motivation in teaching and learning process. It is better if the teachers use interesting media. One of the media to teach writing is textless comic.

## **2. For other researchers**

This research discusses the implementation of textless comic to improve students' writing skills in SMP Negeri 2 Metro. It is expected that the result of the study can be used as an additional reference for other researchers, especially researchers dealing with the teaching of writing.

## DOCUMENTATION

## CURRUCULUM VITAE

Siti Muhajiroh was born in Banjarrejo on July 16<sup>th</sup>, 1992, and spent her childhood in 38 B Banjarrejo, a remote area in East Lampung. Ethnically speaking, she comes from Javanese family descent. She is the first child of the late Kasdi and Tarbiyatun.

She took her elementary school at SDN 2 Metro, and then she took her Junior High School at SMPN 2 Metro for three years. Having graduated from Junior High School she continued her study on Vocational High School level at SMKN 1 Metro in Hotel Accomodation Programe and was finished in 2010. After graduating from Vocational High School she decided to have lecture in English major at IAIN Metro. To merely study in the classroom is not enough for her, accordingly she joined the English organization (JSEC) to increase her English performance. She was active at UKM LKK Al-Ishlah as a head of Syiar Department, she wants to learn more about Islam and become a good moslem. She was also become a leader at IKABIM (*Ikatan Mahasiswa Bidik Misi*) IAIN Metro. She was also active in National Bidik Misi Organization as Treasurer. She was also member of SEMA, BEM Tarbiyah and KAMMI. She hopes that one day she can continue her study to master of degree.
